 Managerial Finance provides a clear and readable explanation of the most important topics managers should understand about business finance. These include resource management, investment and decision making, as well as the practical use of financial ratios and performance indicators. Real examples and case studies are used throughout to illustrate points in a practical context. The book is based upon the Management Charter Initiative's Occupational Standards for Management NVQs and SVQs at Levels 4 & 5 and is also particularly suitable for managers on Certificate and Diploma in Management programmes, including those accredited by the IM and Edexcel (formerly BTEC). Managerial Finance is part of the highly successful series of textbooks for managers which cover the knowledge and understanding required as part of any competency based management programme. The books cover the three main levels of management: supervisory/first-line management (NVQ level 3), middle management (Certificate/NVQ level 4) and senior management (Diploma/NVQ level 5). Alan Parkinson is the Hill Samuel Senior Lecturer in Accounting & Finance at the Open Business School. He was previously responsible as Director of the Open University MBA Programme for launching the highly successful MBA Course.

Due to ongoing advancements in technology, new legislation, and other innovations, the field of finance is rapidly changing. Developments in financial markets and investments necessitate that students be exposed to these topics as well as to financial management, the traditional focus of the introductory finance course. Introduction to Finance develops the three components of finance in an interactive framework that is consistent with the responsibilities of all financial professionals, managers, intermediaries, and investors in today's economy. To show the interrelationships between the areas of finance, the text emphasizes how investor activities monitor firms and focuses on the role of financial markets in channeling funds from investors to firms.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

The successful evaluation of capital projects requires not only a thorough understanding of traditional techniques of capital budgeting but advanced techniques as well. Riahi-Belkaoui examines the multidimensionality of capital budgeting in its various facets and in ways that executives with no special facility in the subject can follow. He covers replacement decisions, capital rationing, capital budgeting under inflation uncertainty, capital budgeting in a multinational setting with attention to political risks, social project evaluation, and concepts of wealth measurement and distribution. The result is a wide ranging treatment for executive decision makers in finance, banking, investment, and general management, and for their colleagues with similar interests in the academic community. Riahi-Belkaoui begins by examining the principles underlying the time value of money. In Chapter Two he introduces capital budgeting and in Chapter Three moves to advanced capital budgeting. There he discusses such advanced topics as replacement decisions, capital rationing, and capital budgeting under uncertainty and inflation. In Chapter Four he takes up the same issues associated with capital budgeting but in a global context, and in Chapter Five, the determination of political risk and its use in capital budgeting internationally. Chapter Six compares the techniques of leasing versus purchasing and their reliance on capital budgeting techniques. In Chapter Seven he turns to the techniques of capital budgeting applied to social projects, and ends the book with an examination of the behavior and cognitive implications of wealth measurement and distribution. This is a useful survey and examination of the traditional and advanced techniques of capital budgeting and their applications in domestic and international contexts.

This richly illustrated collection profiles the bold innovators in landscape architecture who, around the turn of the twentieth century, ventured into the nation's heartland to develop a new style of design celebrating the native midwestern landscape. The pioneers of landscape architecture in the Midwest are responsible for creating some of the most recognizable parks, cemeteries, recreation areas, and other public gathering places in the region. **Midwestern Landscape Architecture** includes essays on Adolph Strauch, who introduced a new concept of visually integrated landscape treatment in Cincinnati's Spring Grove Cemetery; William Le Baron Jenney, designer of Chicago's diverse West Parks; and Jens Jensen, who created the American Garden in Union Park in Chicago (a celebration of native flora) and founder of The Clearing, a unique school of the arts and humanities in Wisconsin. Other major figures include Frederick Law Olmsted Sr., co-designer of New York's Central Park, whose work in the Midwest included the layout of the 1893 World's Columbian Exposition, and Ossian Cole Simonds, who helped reconcile the formal approach of the City Beautiful movement with the naturalism of the Prairie School in urban park design. This volume also details the contributions of crusaders for ecological awareness and an appreciation of the region's natural heritage. These include horticultural writer Wilhelm Miller, who spread the ideals of the Prairie style, and Genevieve Gillette, a landscape architect and conservationist whose preservation efforts led to the establishment of numerous Michigan state parks and wilderness areas. **Midwestern Landscape Architecture** fosters a better understanding of how landscape design took shape in the Midwest and how the land itself inspired new solutions to enhance its understated beauty. Despite Olmsted's assessment of the Illinois prairie as "one of the most tiresome landscapes that I ever met with," the Midwest has amassed an important legacy of landscape design that continues to influence how people interact with their environment in the heartland.
