ReCreating Strategy Simon & Schuster

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper

anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Footwear design has become the new dream career, and this book is the first guide to show the key skills and tips behind the trade, for both budding designers and anyone interested in shoes. Since Christian Louboutin and Manolo Blahnik became household names, footwear design is now one of the most lucrative strands of any fashion brand. Aki Choklat explores the footwear design process, explaining the differences between the anatomy of the foot and the anatomy of a shoe, showing how one constrains the other, before moving onto the research and design development processes and the art of creating a complete collection. The all-important presentation is then discussed, including illustrative techniques, before the book ends with advice for those wishing to pursue a career in footwear design. Illustrated throughout with inspirational sketchbooks detailing the design process and specially commissioned images of cutting-edge shoe design, the book also contains case studies featuring an array of international shoe designers.

Kobe Bryant will forever be remembered as one of the most influential figures basketball has ever known. The Black Mamba's path to iconic status started quietly with the 13th pick of the 1996 NBA Draft, but Kobe left his mark in Los Angeles and beyond as a fierce competitor who lifted those around him and never settled for anything less than the best. This is a profound remembrance of an extraordinary life cut short, covering 20 years of hardwood genius plus a rich existence off the court as a father, filmmaker, mentor, and entrepreneur. Including nearly 100 full-color photographs, fans are provided a glimpse into Kobe's early days bursting onto the NBA scene, the five NBA championships with the Lakers, his transcendent 60-point final game, and his multifaceted second act in retirement.

`Cummings' book is very interesting, refreshing and intellectually stimulating... It should be a mandatory textbook for all serious students of management' - Management Learning `Stephen Cummings' Recreating Strategy is currently the best book on strategy, combining a holistic and critical understanding of the issue' -Stewart Clegg, University of Technology, Sydney `An imaginative attempt to bring together and apply the many analytical frameworks relating to the organization as a whole into strategy theory and practice. Written for students on strategy, change management and more general management and organization theory courses. Encourages students to question assumptions and think creatively about strategy and management. Stimulating and original' - Long Range Planning `In this intriguing book [Cummings] claims to be surprised that academics critical of management theory don't critique its history, and proposes a kind of liberation theology in response, but this is not as doctrinaire. It's more like replacing some well-justified habits with a refreshing originality of approach. The outcome is stimulating.... The author offers a cogently argued deconstruction of some well-known frameworks in strategy, and delivers his own reinterpretation of strategic discourse. There are five longer case studies in the book and several shorter vignettes scattered throughout early chapters, as well as pedagogical aids at the end of each chapter' - Best of Biz, The Business Information Site `Do you worry about organizations becoming slaves to markets? Do you wish that organizations had the nerve to build their own ethos rather than just grubbing for profit? Do you aspire to inspiration rather than perspiration? Why does management practice get in the way of thinking and creativity? Stephen Cummings provides insight and guidance in a book of genuine scholarship and creativity' - John McGee, President of the Strategic Management Society, USA `Management courses need more of what Stephen is offering. He wants us to go on an `unlearning curve', one which leads to fresh thinking about strategy and the emerging roles and responsibilities of business and companies. This book not only tells us where we are coming from but, more importantly, it inspires us to think profoundly about where we could go. It's also a very good read' - Josephine Green, Director of Trends and Strategy, Philips `ReCreating Strategy provides a challenging examination of the emergence of management which combines postmodern and orthodox perspectives. Stephen Cummings is able to provide not only a fresh treatment of strategy and ethics but also to engage with a variety of potential audiences. He provokes and informs in equal measure' - Richard Whipp, Cardiff University `A truly eclectic approach to strategy! Intellectually capturing, the book is great fun to read at the same time. A must for those who want to discuss management beyond styles, fads and fashions' - Hubert Wagner, Qonsult ReCreating Strategy is written for students of strategy, change management and more general management and organization theory courses. It will provide a better understanding of how to bring together and apply the many analytical frameworks relating to the organization as a whole. Stephen Cummings challenges the view that there is never one best framework and shows why the latest theory is not necessarily better than earlier ones. The textbook includes short and long case studies, interesting pictorial aids and examples, and a generally more participative and rewarding approach than that offered by more mainstream texts. PowerPoint slides to accompany the book are now also available by clicking on the link to `Sample Chapters and Resources' in the left hand margin. The book also offers more scope for individual lecturers who wish to encourage students to question assumptions and think creatively about strategy and management. **Figure Poses for Fashion Illustrators** "O'Reilly Media, Inc."

Jay Shetty, social media superstar and host of the #1 podcast On Purpose, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity -How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the Forbes magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, On Purpose, is consistently ranked the

world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

This is the first edited collection of its kind to analyse the distinct but overlapping topics of dress, costume, sport and leisure history. For researchers of bodily adornment and movement, sport and costume history are both primarily concerned with industrial practice and embodied experience. The ways in which bodies are adorned, embellished and clothed (or revealed) highlights the hybrid nature of dress history, encompassing as it does the everyday clothing solutions of the mass of people and the unusual or more ceremonial aspects of costume, as well as elite high fashion. Although this is as yet an under-researched area, there are an increasing number of fashion and clothing undergraduate and postgraduate courses that specialise in sport and leisurewear. This publication is intended to give an introductory overview of the historical and contemporary issues as it does for the growing number of sport marketing and sports studies courses concerned with dress, costume history and branding. This book was published as a special issue of *Sport in History*.
