Managerial Accounting for Managers, 2nd Edition by Noreen/Brewer/Garrison is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen book was created to serve customers who do not wish to teach the financial accounting-oriented content that is included in the Garrison book. Of our three books (the Brewer book, the Garrison book, and the Noreen book), the Noreen book is the most

pure management accounting textbook. The other two books have greater amounts of financial accounting content. Managerial Accounting for Managers, 2nd Edition is geared towards professors who love Garrison's market-leading managerial accounting content, but have been bothered by the debits and credits included in the book. It includes the same coverage of managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization without the journal entries. The job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting--planning, control, and decision making.

Managerial Accounting for Managers John Wiley & Sons

Managerial accounting gives managers the information they need to make decisions for the future. That's why managerial accounting and cases are a perfect fit because both focus on future decision-making. While textbooks explain concepts and allow students to master problems, cases go above and beyond. Cases challenge students to critically examine the facts, analyze alternatives from a quantitative and qualitative perspective, and make recommendations. Canadian Managerial Accounting Cases presents cases on a variety of topics at either an introductory or intermediate level of difficulty. There is at least one case on each topic in a typical managerial accounting textbook so that instructors can use the case method throughout their course. Cases are a great way to support learner-centered teaching. Classes become a forum for instructors and students to go beyond lectures and problems by discussing and analyzing the case together. Detailed teaching notes

help instructors plan their lessons and facilitate in-class discussions. Students are given a framework for analyzing managerial accounting cases, similar to the framework used in the professional accounting exams, as well as questions to help them in their case analysis. These questions vary in the level of detail so students can grow their case analysis skills. Students learning managerial accounting with cases can see how managerial accounting is used in organizations. They'll gain experience in examining the facts, analyzing alternatives, and making decisions—all valuable skills no matter where students' career paths take them.
