Your project went off without a hitch--but somebody else got the credit...You averted a crisis brilliantly--but no one noticed...You came to the meeting with a sensational idea--but it was ignored until someone else said the same thing... HOW CAN YOU GET CREDIT & GET AHEAD? In her extraordinary international bestseller, *You Just Don't Understand*, Deborah Tannen transformed forever the way we look at intimate relationships between women and men. Now she turns her keen ear and observant eye toward the workplace--where the ways in which men and women communicate can

determine who gets heard, who gets ahead, and what gets done. An instant classic, *Talking From 9 to 5* brilliantly explains women's and men's conversational rituals--and the language barriers we unintentionally erect in the business world. It is a unique and invaluable guide to recognizing the verbal power games and miscommunications that cause good work to be underappreciated or go unnoticed--an essential tool for promoting more positive and productive professional relationships among men and women.

Balance  
This is a book about life, how to make the most of it, how to find your balance when you are working long days and trying to be happy and fulfilled. Mireille Guiliano has written the kind of book she wishes she had been given when starting out in the business world and had at hand along the way. She draws on her own experiences at the forefront of women in business to offer lessons, stories, helpful hints - and even recipes! - that can make the working world a happier and more satisfying part of a well-

balanced life. Mireille talks about style, communication skills, risk taking, leadership, etiquette, mentoring, personal relationships and much more, all from a perspective of three decades in business. This book is about helping women (and a few men, peut-etre) feel good about themselves, being challenged and engaged in our working lives, and always looking for pleasure in every single day.

An unparalleled exploration of the mysteries underlying women's sexuality that rivals the culture-shifting Kinsey Report, from two of America's leading research psychologists Do women have sex simply to reproduce or display their affection? When University of Texas at Austin clinical psychologist Cindy M. Meston and evolutionary psychologist David M. Buss joined forces to investigate the underlying sexual motivations of women, what they found astonished them. Through the voices of real women, Meston and Buss reveal the motivations that guide women's sexual decisions and explain the deep-

seated psychology and biology that often unwittingly drive women's desires—sometimes in pursuit of health or pleasure, or sometimes for darker, disturbing reasons that a woman may not fully recognize. Drawing on more than a thousand intensive interviews conducted solely for the book, as well as their pioneering research on physiological response and evolutionary emotions, *Why Women Have Sex* uncovers an amazingly complex and nuanced portrait of female sexuality. They delve into the use of sex as a defensive tactic against a mate's infidelity (protection), as a ploy to boost self-confidence (status), as a barter for gifts or household chores (resource acquisition), or as a cure for a migraine headache (medication). *Why Women Have Sex* stands as the richest and deepest psychological understanding of female sexuality yet achieved and promises to inform every woman's (and her partner's) awareness of her relationship to sex and her sexuality.

An updated edition of the Sunday Times Bestseller Britain's best-known

classicist Mary Beard, is also a committed and vocal feminist. With wry wit, she revisits the gender agenda and shows how history has treated powerful women. Her examples range from the classical world to the modern day, from Medusa and Athena to Theresa May and Hillary Clinton. Beard explores the cultural underpinnings of misogyny, considering the public voice of women, our cultural assumptions about women's relationship with power, and how powerful women resist being packaged into a male template. A year on since the advent of #metoo, Beard looks at how the discussions have moved on during this time, and how that intersects with issues of rape and consent, and the stories men tell themselves to support their actions. In trademark Beardian style, using examples ancient and modern, Beard argues, 'it's time for change - and now!' From the author of international bestseller *SPQR: A History of Ancient Rome*.  
*Men Are from Mars, Women Are from Venus* Bloomsbury Publishing USA  
Popular marriage counselor and seminar

leader John Gray provides a unique, practical and proven way for men and women to communicate and relate better by acknowledging the differences between them. Once upon a time Martians and Venusians met, fell in love, and had happy relationships together because they respected and accepted their differences. Then they came to earth and amnesia set in: they forgot they were from different planets. Using this metaphor to illustrate the commonly occurring conflicts between men and women, Gray explains how these differences can come between the sexes and prohibit mutually fulfilling loving relationships. Based on years of successful counseling of couples, he gives advice on how to counteract these differences in communication styles, emotional needs and modes of behavior to promote a greater understanding between individual partners. Gray shows how men and women react differently in conversation and how their relationships are affected by male intimacy cycles ("get close", "back off"), and female self-esteem fluctuations ("I'm

okay", "I'm not okay"). He encourages readers to accept the other gender's particular way of expressing love, and helps men and women learn how to fulfill each other's emotional needs. With practical suggestions on how to reduce conflict, crucial information on how to interpret a partner's behavior and methods for preventing emotional "trash from the past" from invading new relationships, *Men Are from Mars, Women Are from Venus* is a valuable tool for couples who want to develop deeper and more satisfying relationships with their partners.

The internationally acclaimed novelist Siri Hustvedt has also produced a growing body of nonfiction. She has published a book of essays on painting (*Mysteries of the Rectangle*) as well as an interdisciplinary investigation of a neurological disorder (*The Shaking Woman or A History of My Nerves*). She has given lectures on artists and theories of art at the Prado, the Metropolitan Museum of Art in New York, and the Academy of Fine Arts in

Munich. In 2011, she delivered the thirty-ninth annual Freud Lecture in Vienna. *Living, Thinking, Looking* brings together thirty-two essays written between 2006 and 2011, in which the author culls insights from philosophy, neuroscience, psychology, psychoanalysis, and literature. The book is divided into three sections: the essays in *Living* draw directly from Hustvedt's life; those in *Thinking* explore memory, emotion, and the imagination; and the pieces in *Looking* are about visual art. And yet, the same questions recur throughout the collection. How do we see, remember, and feel? How do we interact with other people? What does it mean to sleep, dream, and speak? What is "the self"? Hustvedt's unique synthesis of knowledge from many fields reinvigorates the much-needed dialogue between the humanities and the sciences as it deepens our understanding of an age-old riddle: What does it mean to be human?  
*Invisible Women* Harper Collins  
A research-based guide to navigating the newest dating phenomenon--"the love gap"--and a trailblazing action plan to

help smart, confident, career-driven women find (and keep) their match. For a rising generation of young women, the sky is the limit. Women can be anything and have everything. They are outpacing their male peers in higher education and earning the corner office at work. Smart, driven, assertive women are succeeding at just about everything they do--except romance. Why are so many men afraid to date smart women? Modern men claim to want smarts, success, and independence in romantic partners. Or so says the data collected by scientists and dating websites. If that's the case, why are so many independent, successful women winning in life, but losing in love? Journalist Jenna Birch has finally named the perplexing reason: "the love gap"--or that confusing rift between who men say they want to date and who they actually commit to. Backed by extensive data, research, in-depth interviews with experts and real-life relationship stories, *The Love Gap* is the first book to explore the most talked-about dating trend today. The guide also establishes a new framework for

navigating modern relationships, and the tricky new gender dynamics that impact them. Women can, and should, have it all without settling.

 Women's identity has long been stifled by a limited set of archetypes, found everywhere in pictures from art history's classics to advertising, while women artists have been overlooked and held back from shaping more empowering roles. In this

impassioned book, art historian Catherine McCormack asks us to look again at what these images have told us to value, opening up our most loved images - from those of Titian and Botticelli to Picasso and the Pre-Raphaelites. She also shows us how women artists - from Berthe Morisot to Beyoncé, Judy Chicago to Kara Walker - have offered us new ways of thinking about women's identity, sexuality, race and power. *Women in the Picture* gives us new ways of seeing the art of the past and the familiar images of today so that we might free women from these restrictive roles and embrace the breadth of women's vision. 'A call to arms in a world where the misogyny that taints much of the western art canon is still largely ignored' *Financial Times*

Steve Harvey, the host of the nationally syndicated Steve Harvey Morning Show, can't count the number of impressive women he's met over the years, whether it's through the "Strawberry Letters" segment of his program or while on tour for his comedy shows. Yet when it comes to relationships, they can't figure out what makes men tick. Why? According to Steve it's because they're asking other women for advice when no one but another man can tell them how to find and keep a man. In *Act Like a Lady, Think Like a Man*, Steve lets women inside the mindset of a man and sheds light on concepts and questions such as: The Ninety Day Rule: Ford requires it of its employees. Should you require it of your man? The five questions every woman should ask a man to determine how serious he is. And much more . . . Sometimes funny, sometimes direct, but always truthful, *Act Like a Lady, Think Like a Man* is a book you must read if you want to understand

how men think when it comes to relationships.

Gina Frangello tells the morally complex story of her adulterous relationship with a lover and her shortcomings as a mother, and in doing so, highlights the forces that shaped, silenced, and shamed her: everyday misogyny, puritanical

expectations regarding female sexuality and maternal sacrifice, and male oppression."

—Adrienne Brodeur, author of *Wild Game* Gina Frangello spent her early adulthood trying to outrun a youth marked by poverty and violence. Now a long-married wife and devoted mother, the better life she carefully built is emotionally upended by the death of her closest friend. Soon, awakened to fault lines in her troubled marriage, Frangello is caught up in a recklessly passionate affair, leading a double life while continuing to project the image of the perfect family. When her secrets are finally uncovered, both her home and her identity will implode, testing the limits of desire, responsibility, love, and forgiveness. *Blow Your House Down* is a powerful testimony about the ways our culture seeks to cage women in traditional narratives of self-sacrifice and erasure. Frangello uses her personal story to examine the place of women in contemporary society: the violence they experience, the rage they suppress, the ways their bodies often reveal what they cannot say aloud, and finally, what it means

to transgress "being good" in order to reclaim your own life.

landmark, prize-winning, international bestselling examination of how a gender gap in data

perpetuates bias and disadvantages women, now in paperback Data is

fundamental to the modern world. From economic development to

health care to education and public policy, we rely on numbers to allocate

resources and make crucial decisions. But

because so much data fails to take into account

gender, because it treats men as the default and

women as atypical, bias and discrimination are

baked into our systems. And women pay

tremendous costs for this insidious bias, in time, in

money, and often with their lives. Celebrated

feminist advocate

Caroline Criado Perez

investigates this shocking root cause of gender

inequality in the award-

winning, #1 international

bestseller *Invisible Women*. Examining the home, the workplace, the public square, the doctor's office, and more, Criado Perez unearths a dangerous pattern in data and its consequences on women's lives. Product designers use a "one-size-fits-all" approach to everything from pianos to cell phones to voice

recognition software, when in fact this approach is designed to fit men. Cities

prioritize men's needs when designing

public transportation, roads, and even snow

removal, neglecting to consider women's safety

or unique responsibilities and travel patterns. And

in medical research, women have largely been

excluded from studies and textbooks, leaving them

chronically misunderstood, mistreated, and

misdiagnosed. Built on hundreds of studies in the

A New York Times

Bestseller An audacious, irreverent investigation of human behavior—and a first look at a revolution in the making Our personal data has been used to spy on us, hire and fire us, and sell us stuff we don't need. In Dataclysm,

Christian Rudder uses it to show us who we truly are. For centuries, we've relied on polling or small-scale lab experiments to study human behavior. Today, a new approach is possible. As we live more of our lives online, researchers can finally observe us directly, in vast numbers, and without filters. Data scientists have become the new demographers. In this daring and original book, Rudder explains how Facebook "likes" can predict, with surprising accuracy, a person's sexual orientation and even intelligence; how attractive women receive exponentially more interview requests; and why you must have haters to be hot. He charts the rise and fall of America's most reviled word through Google Search and examines the new dynamics of collaborative rage on Twitter. He shows how people express themselves, both privately and publicly. What is the least Asian thing you can say? Do people bathe more in Vermont or New Jersey? What do black women think about Simon & Garfunkel? (Hint: they don't think about Simon & Garfunkel.) Rudder also traces human migration over time, showing how

groups of people move from certain small towns to the same big cities across the globe. And he grapples with the challenge of maintaining privacy in a world where these explorations are possible. Visually arresting and full of wit and insight, *Dataclysm* is a new way of seeing ourselves—a brilliant alchemy, in which math is made human and numbers become the narrative of our time.

### **The Summer Without Men** Picador

The first comprehensive undercover look at the terrorist movement no one is talking about. *Men Who Hate Women* examines the rise of secretive extremist communities who despise women and traces the roots of misogyny across a complex spider web of groups. It includes eye-opening interviews with former members of these communities, the

academics studying this movement, and the men fighting back. Women's rights activist Laura Bates wrote this book as someone who has been the target of many hate-fueled misogynistic attacks online. At first, the vitriol seemed to be the work of a small handful of individual men... but over time, the volume and consistency of the attacks hinted at something bigger and more ominous. As Bates went undercover into the corners of the internet, she found an unseen, organized movement of thousands of anonymous men wishing violence (and worse) upon women. In the book, Bates explores: Extreme communities like incels, pick-up artists, MGTOW, Men's Rights Activists and more The hateful, toxic rhetoric used by these groups How this movement connects to other extremist movements like white

supremacy How young boys are targeted and slowly drawn in Where this ideology shows up in our everyday lives in mainstream media, our playgrounds, and our government By turns fascinating and horrifying, *Men Who Hate Women* is a broad, unflinching account of the deep current of loathing toward women and anti-feminism that underpins our society and is a must-read for parents, educators, and anyone who believes in equality for women. Praise for *Men Who Hate Women*: "Laura Bates is showing us the path to both intimate and global survival."—Gloria Steinem "Well-researched and meticulously documented, Bates's book on the power and danger of masculinity should be required reading for us all."—Library Journal "Men Who Hate Women has the power to spark social change."—Sunday Times
