Systems | Teradyne Teradyne's award winning IG-XL software transforms test program development for the FLEX, UltraFLEX and J750 family of testers. Its powerful, yet easy-to-use, graphical environment lets engineers rapidly develop fully functional test programs, cutting program development and debugging time. IG-XL Software - Teradyne Teradyne's IP750Ex-HD operates with the award-winning IG-XL™ software. Image Sensor vendors know that the user-friendly software provides the fastest time from R&D to production. Image Sensor Test System IP750Ex-HD - Teradyne The UltraPin1600 high density, high speed digital provides 128 or 256 channels per instrument with test coverage up to 2.2Gbps. The UltraPin1600 implements Teradyne's ground-breaking multicore, hardware-based Protocol Aware capability that allows individual pin groups to be saved to device data rate and timing and eliminates the need for digital patterns for programming standard data busses. UltraFLEX - Teradyne Device Interface Solutions provides interface hardware for Teradyne testers. Local design experts deliver the expertise to fabricate and assemble device interface boards, creating solutions for your interfacing requirements. ...
