ALEXIS PHELPS

Report to the President on the Relationship of Wages to the Cost of Living, and Changes which Have Occurred Under the Economic Stabilization Policy

SAGE Publications

National survey and state study on consolidation of police services providing information for improvement of state and local laboratory systems.

Study of laboratory facilities, equipment and personnel is provided with recommendations for regional laboratories and educational and training programs. An overview of crime laboratory services in Massachusetts is given. Coordination and combination of laboratory services is discussed in connection with state programs which may be established for their improvement.

Department of Agriculture Appropriations for 1966 Peter Lang

Contains the reports of state departments and officials for the preceding fiscal biennium.

The Relationship Between Selected Blast-wave Parameters and the Response of Mammals Exposed to Air Blast Frontiers Media SA

For personnel standing or prone-side-on to the charge when it is detonated at or near the surface, the side-on incident plus dynamic pressures become the effective pressure; however, with orientations end-on in this situation, only the side-on incident pressure appears to be the maximal

effective pressure.

Crime Laboratories Oxford University Press, USA

Exploratory applications of mass balance modeling of PCB's in Lake Ontario. It is widely accepted that environmental fate models, in the form of mass balances or budgets, can play a useful role in managing the issue of the presence of toxic organic chemicals in the Great Lakes. Under the aegis of the IJC, three independant modelling efforts were produced in order to determine if the models gave similar, useful and understandable results. These groups developed different models of the fate of the PCB's in the water column, sediment and biota of Lake Ontario and projected the response of the lake to specified changes in PCB loading. These reports, reproduced in extenso in this volume, were evaluated during a workshop held in 1987 by scientists who also addressed their application and management implications. The Task Force of the IJC presents its views, conclusions and recommendations.

Hearings Springer Science & Business Media

Provides a unique interdisciplinary approach to the science of intimate human relationships This newly updated edition of a popular text is the first to present a full-blooded interdisciplinary and theoretically coherent approach to the latest scientific findings relating to human sexual relationships.

Written by recognized leaders in the field in a style that is rigorous yet accessible, it looks beyond the core knowledge in social and evolutionary psychology to incorporate material and perspectives from cognitive science (including brain-imaging studies), developmental psychology,

anthropology, comparative psychology, clinical psychology, genetic research, sociology, and biology. Written by an international team of acclaimed experts in the field, *The Science of Intimate Relationships* offers a wealth of thought-provoking ideas and insights into the science behind the initiation, maintenance, and termination of romantic relationships. The 2nd Edition features two new chapters on health and relationships, and friends and family, both of which shed new light on the complex links among human nature, culture, and romantic love. It covers key topics such as mate selection, attachment theory, love, communication, sex, relationship dissolution, violence, mind-reading, and the relationship brain. Provides a coherent and theoretically integrative approach to the subject of intimate relationships Offers an interdisciplinary perspective that looks beyond social and evolutionary psychology to many other scientific fields of study Includes two new chapters on 'Relationships and Health' and 'Friends and Family', added in response to feedback from professors who have used the textbook with their classes Presented by recognized leaders in the field of relationships Features PowerPoint slides and an online Teaching Handbook *The Science of Intimate Relationships*, 2nd Edition is designed for upper-level undergraduate students of human sexuality, psychology, anthropology, and other related fields.

Current Catalog John Wiley & Sons

Includes subject section, name section, and 1968-1970, technical reports.

Cal

Contains the reports of state departments and officials for the preceding fiscal biennium.

Lynne M. Webb (Ph. D., University of Oregon) is Professor in Communication at the University of Arkansas. She previously served as a tenured faculty member at the Universities of Florida and Memphis. Her research examines young adults' interpersonal communication in romantic and family contexts. Her research appears in over 50 essays published in scholarly journals and edited volumes, including computers in Human Behavior, Communication Education, Health Communication, and Journal of Family Communication. --Book Jacket.

Diet and Cancer Relationship

Cutting edge and student-friendly, *Choices in Relationships* takes readers through the lifespan of relationships, marriages, and families, and utilizes research to help them make deliberate, informed choices in their interpersonal relationships.

Scientific and Technical Aerospace Reports

This book provides an in-depth and comprehensive summary of the psychology of close relationships, and showcases classic and contemporary theories, models, and empirical research that have been conducted in the field.

Legislative Documents

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.
