Regional bird field guides are few and far between in South Australia and Chris Baxter's photographic guide to the birds of Kangaroo Island is the stand-out in this genre. This comprehensive account covers all 267 bird species recorded on the Island or offshore over the seas. It builds on the annotated list produced by the same author in 1989 and revised in 1995. The photographs provided by some of Australia's most highly regarded photographers beautifully illustrate the detailed descriptions of the birds, their habits, habitats, breeding, status, abundance and distribution on the Island. In addition there are recommendations on where to look for each species, with cautions about not getting too close to endangered birds and their nests. Chris Baxter has called on a lifetime of bird watching on Kangaroo Island and observations from visitors and residents to present an attractive field guide that is a

must for all birdwatchers from casual observers to serious ornithologists.

Birds of China Simon and Schuster
 First in the cult classic trilogy: "A fantastic zombie novel . . . There are many layers to this zombie apocalypse, and this book just gets things rolling" (Booklist). Welcome to New York City, Population Zero? The power grid has collapsed. There is no running water, no light, no heat. The massive neon signs of Times Square are dark now, and the subway trains crouch silent in their tunnels, waiting for commuters who will never return. An epidemic of staggering lethality has passed over the city and left nothing living in its wake. And yet the city is not deserted. The dead have returned to life, and they're hungry. The millions of people who once worked and lived in New York have been turned into cannibalistic monsters whose only function is to consume. No living person would dare enter the city--it would be suicide. Dekalb doesn't have a choice. He must protect his daughter's future, and that means retrieving vital medical supplies from the UN building in Midtown. A cadre of teenage girl soldiers have been recruited to help him find what he needs, and get

back alive. They're well armed. They're devoted to their mission and willing to sacrifice anything to pull it off. But the odds against them are staggering. Especially when it turns out that not all zombies are created equal. Deep inside the city a medical student named Gary comes back from the dead different--his mind is intact. He can still think and feel. He's hungry, just like the rest, but unlike them he can plan, plot, and scheme. He can even lead the others, bending them to his will. Soon he has a small army at his command, a growing mob of rotting corpses all devoted to one cause: to find meat for their master. When Dekalb and Gary cross paths sparks will fly, destinies will clash--and the future of humanity will be decided, one head shot at a time.

"Eye of the Whale focuses on one great whale in particular—the coastal-traveling California gray whale. Gray whales make the longest migration of any mammal - from the lagoons of Baja California to the feeding grounds of the Bering Strait between Alaska and Siberia (nearly 6,000

miles). That the gray whale exists today is nothing short of miraculous. Whaling fleets twice massacred the species to near extinction - first during the nineteenth century and again during the early part of the twentieth century."--BOOK
