**TRINITY NEAL****Financing Clean Energy in Developing Asia** Columbia University Press

Recent interest in small modular reactors (SMRs) is being driven by a desire to reduce the total capital costs associated with nuclear power plants and to provide power to small grid systems. According to estimates available today, if all the competitive advantages of SMRs were realised, including serial production, optimised supply chains and smaller financing costs, SMRs could be expected to have lower absolute and specific (per-kWe) construction costs than large reactors. Although the economic parameters of SMRs are not yet fully determined, a potential market exists for this technology, particularly in energy mixes with large shares of renewables. This report assesses the size of the market for SMRs that are currently being developed and that have the potential to broaden the ways of deploying nuclear power in different parts of the world. The study focuses on light water SMRs that are expected to be constructed in the coming decades and that strongly rely on serial, factory-based production of reactor modules. In a high-case scenario, up to 21 GWe of SMRs could be added globally by 2035, representing approximately 3% of total installed nuclear capacity.

**The Voynich Manuscript** Geological Society of America

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

**Counseling Content Providers in the Digital Age** Apress

Perhaps more than any other American city, Chicago has been a center for the study of both urban history and economic inequity. Community Health Equity assembles a century of research to show the range of effects that Chicago's structural socioeconomic inequalities have had on patients and medical facilities alike. The work collected here makes clear that when a city is sharply divided by power, wealth, and race, the citizens who most need high-quality health care and social services have the greatest difficulty accessing them. Achieving good health is not simply a matter of making the right choices as an individual, the research demonstrates: it's the product of large-scale political and economic forces. Understanding these forces, and what we can do to correct them, should be critical not only to doctors but to sociologists and students of the urban environment—and no city offers more inspiring examples for action to overcome social injustice in health than Chicago.

**The Text Mining Handbook** University of Chicago Press

The book contains 40 articles written by forward-thinking speakers who presented their findings at the "Communicating European Research 2005" event which was organised by the European

Commission in Brussels on 14-15 November 2005. The contents of this book clearly illustrate that a highly important element of research projects funded by the European Union is communication. Authors include scientists, journalists and communication professionals.

**The Singularity Is Near** Univ of California Press

Multimedia Systems discusses the basic characteristics of multimedia operating systems, networking and communication, and multimedia middleware systems. The overall goal of the book is to provide a broad understanding of multimedia systems and applications in an integrated manner: a multimedia application and its user interface must be developed in an integrated fashion with underlying multimedia middleware, operating systems, networks, security, and multimedia devices. Fundamental characteristics of multimedia operating and distributed communication systems are presented, especially scheduling algorithms and other OS supporting approaches for multimedia applications with soft-real-time deadlines, multimedia file systems and servers with their decision algorithms for data placement, scheduling and buffer management, multimedia communication, transport, and streaming protocols, services with their error control, congestion control and other Quality of Service aware and adaptive algorithms, synchronization services with their skew control methods, and group communication with their group coordinating algorithms and other distributed services.

**The Annual Meeting of Shareholders** Hassell Street Press

This book describes the historical development of the Irian Jaya guerrilla struggle for independence from Indonesia. The OPM, Organisasi Papua Merdeka, has been fighting Indonesian rule in West New Guinea since 1969; the military presence there was established in 1962. The author believes that the great majority of West Papuans support the OPM. The Indonesian Transmigration programme has forcibly alienated clan land and sponsored settlers from Java. As a result of this policy 10,000 Papuans fled Irian Jaya in mid-1984 to seek safety in Papua New Guinea. The exodus was more than 1 per cent of the indigenous population. The OPM has almost no foreign allies. Both Papua New Guinea and Australia emphasize that Irian Jaya is part of Indonesia and thus an internal matter. The author predicts that greater autonomy for Irian Jaya would be more likely to result from political pressure on Jakarta than from a military victory by OPM.

**EPA-R5** Penguin

This book is a comprehensive collection of state-of-the-art studies of seafloor slope instability and their societal implications. The volume captures the most recent and exciting scientific progress made in this research field. As the world's climate and energy needs change, the conditions under which slope instability occurs and needs to be considered, are also changing. The science and engineering of submarine - or more widely subaqueous - mass movements is greatly benefiting from advances in seafloor and sub-seafloor surveying technologies. Ultra-high-resolution seafloor mapping and 3D seismic reflection cubes are becoming commonly available datasets that are dramatically increasing our knowledge of the mechanisms and controls of subaqueous slope failure. Monitoring of slope deformation, repeat surveying and deep drilling, on the other hand, are emerging as important new techniques for understanding the temporal scales of slope instability. In essence, rapid advances in technology are being readily incorporated into scientific research and as a result, our understanding of submarine mass movements is increasing at a very fast rate. The

volume also marks the beginning of the third IGCP project for the submarine mass movement research community, IGCP-640 S4SLIDE (Significance of Modern and Ancient Submarine Slope LandSLIDES). The Submarine Mass Movements and Their Consequences symposium is the biannual meeting under the IGCP umbrella.

#### Inside Steve's Brain Penguin

"One of the world's great karstic aquifer systems, the Edwards aquifer system supplies water for more than 2 million people and for agricultural, municipal, industrial, and recreational uses. This volume reviews the current state of knowledge, current and emerging challenges to wise use of the aquifer system, and some technologies that must be adopted to address these challenges"--

#### Communicating European Research 2005 O'Reilly Media

Today's market for mobile apps goes beyond the iPhone to include BlackBerry, Nokia, Windows Phone, and smartphones powered by Android, webOS, and other platforms. If you're an experienced web developer, this book shows you how to build a standard app core that you can extend to work with specific devices. You'll learn the particulars and pitfalls of building mobile apps with HTML, CSS, and other standard web tools. You'll also explore platform variations, finicky mobile browsers, Ajax design patterns for mobile, and much more. Before you know it, you'll be able to create mashups using Web 2.0 APIs in apps for the App Store, App World, OVI Store, Android Market, and other online retailers. Learn how to use your existing web skills to move into mobile development Discover key differences in mobile app design and navigation, including touch devices Use HTML, CSS, JavaScript, and Ajax to create effective user interfaces in the mobile environment Learn about technologies such as HTML5, XHTML MP, and WebKit extensions Understand variations of platforms such as Symbian, BlackBerry, webOS, Bada, Android, and iOS for iPhone and iPad Bypass the browser to create offline apps and widgets using web technologies

#### Multimedia Systems Cambridge University Press

This book examines clean energy investment needs and financing gaps in Asia and the Pacific and discusses how they are being addressed. It reviews existing financing options and approaches for clean energy, and includes country examples of how these have been applied. Innovative solutions for mobilizing private finance and managing risks associated with clean energy investments are also discussed. The book is the first of two volumes that look at various approaches and instruments that have been tried, tested, and utilized to scale up clean energy development in the region.

#### Davis-Bacon Construction Wage Determinations Springer

This book provides extensive insight on remote sensing of coastal waters from aircraft and space-based platforms. The primary focus of the book is optical remote sensing using passive instruments, to measure and analyze the coastal aquatic environment. The authors have gathered information from a variety of sources, to help non-specialists grasp new techniques and technology, to quickly produce useful data

#### Some Prudence Island Allens Springer Science & Business Media

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the

marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

#### Indonesia's Secret War Allen & Unwin Academic

William Allin immigrated from England to Portsmouth, Rhode Island in 1650.

#### **Urban Land** Springer Science & Business Media

This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

#### *Deep Politics and the Death of JFK* Springer

Publisher description

#### **Research into Design for a Connected World** Routledge

\* OneNote has the potential to be the next "killer-app" in the Microsoft Office family \* Author already has public visibility in the OneNote field as author of a related web site (OneNoteInfoCenter.com) and first OneNote MVP \* Advanced content will differentiate the book from numerous beginner's texts \* Early to market will allow this book to establish it as the definitive book on the subject. \* OneNote will be part of the Microsoft Office family and Office titles sell well

**Cambridge International AS and A Level Sociology Coursebook** Cambridge University Press Urban land is an environmental key topic considering the increasing urbanisation of our world. The amounting pressure on resources especially in the urban environment demand awareness across technical and political sectors and solid concepts for workable solutions. This book will address those

people, who are key in coping with the challenges of sustainable urban land use management: Professionals in the growing field of urban land recycling and graduate students from different disciplines including urban planning, environmental sciences and geotechnics. Processes that lead to urban land degradation include the extraction of resources, their transformation into goods, the production of waste and conflicts in the allocation of land. Industrial soil pollution, soil sealing and urban sprawl pose serious challenges to resource management in urban environments. The possible implications are not necessarily restricted to the urban area but do have feedback into the countryside. The reduction of arable land in urban peripheries often causes enhanced pressure on back-country natural ecosystems such as forests, grass- and wetlands. Urban land recycling especially in the developing world is to be seen in the context of poverty alleviation and sustainable development. If we don't get a proper sustainable use of urban land, as well as of water and other natural resources that relate to them, sustainable development will not be reached.

**Manual for the Production of Statistics on the Digital Economy** Springer

This revised set of resources for Cambridge International AS and A Level Sociology syllabus (9699) is thoroughly updated for the latest syllabus. Written by a highly experienced author, the Coursebook provides comprehensive support for the syllabus. Accessible language combined with the clear, visually-engaging layout makes this an ideal resource for the course. Discussion of significant sociological research, case studies, explanation of key terms and questions within the text reinforce knowledge. Stimulating activities build interpretation and application as well as analytical and evaluation skills. Revision checklists help in consolidating understanding. The book provides

complete exam support with each chapter culminating in exam-style questions and a further chapter dedicated to revision, and examination skills and practice. A Teacher's CD-ROM is also available.

*The Edwards Aquifer* Apress

The Financial Reporting Handbook 2021 from Chartered Accountants Australia and New Zealand (Chartered Accountants ANZ) is designed to meet the demands of the ever-changing business environment. Developed for Chartered Accountants, accountancy students and other professionals working in Australia, the Handbook is a comprehensive guide to the Australian accounting standards. A companion to the Handbook is Chartered Accountants ANZ's Auditing, Assurance and Ethics Handbook 2021, which contains Australian and New Zealand auditing and assurance standards. Together, these are part of the suite of products and services available to Chartered Accountants ANZ members and the student and business community.

*Submarine Mass Movements and their Consequences* Springer

Beginning Ubuntu Linux: From Novice to Professional, Third Edition is the update to the best-selling first book introducing Ubuntu Linux. Adapted from Keir Thomas' best-selling "Beginning SUSE Linux: From Novice to Professional" (Apress, 2005), Keir sets out to guide readers through the most commonly desired yet confusing concepts and tasks confronted by new Linux users. Purposely focused on end users to satisfy the growing interest in migrating away from windows to the increasingly mature Linux desktop platform, Beginning Ubuntu Linux serves as a guide to a rapid and transparent familiarization of those features most treasured by general and power desktop users alike.
