NATIONAL BESTSELLER • From the winner of the Nobel Prize in Literature and author of *Never Let Me Go* and the Booker Prize-winning novel *The Remains of the Day* comes a luminous meditation

on the act of forgetting and the power of memory. In post-Arthurian Britain, the wars that once raged between the Saxons and the Britons have finally ceased. Axl and Beatrice, an elderly British couple, set off to visit their son, whom they haven't seen in years. And, because a strange mist has caused mass amnesia throughout the land, they can scarcely remember anything about him. As they are joined on their journey by a Saxon warrior, his orphan charge, and an illustrious knight, Axl and Beatrice slowly begin to remember the dark and troubled past they all share. By turns savage, suspenseful, and intensely moving, *The Buried Giant* is a luminous meditation on the act of forgetting and the power of memory.

BOULDERING COLORADO: More than 1,000 Premier Boulders throughout the State Bob Horan (Falcon) The all-new climbers' guide with nearly twice the listings of any other Colorado is one of the world's premier bouldering destinations, and Boulder resident Bob Horan has been climbing them all for 35 years. Horan has established hundreds of new routes and boulder problems, pushing standards such as the first free ascent of the Rainbow Wall, which is Eldorado Canyon's first 5.13, as well as Beware the Future (5.14) in the Flatirons. This original book contains nearly 4,000 individual routes covering the entire state, with some listings found nowhere else. Geared to all skill levels, the book is

enhanced by roughly 900 detailed maps and full-color color photos accompanying Horan's comments. Bob Horan has been climbing since he was a teenager, and has written extensively about it in several books and magazines. He and his family live in Boulder.

'A rich feast of his essays, reviews, forewords, squibs and conversations, in which talent and passion are married to deep knowledge.' Matt Ridley 'Enjoy the unfailing clarity of his thought and prose, as well as the grandeur of his vision of life on Earth.' - Mark Cocker, Spectator

'Richard Dawkins is a thunderously gifted science writer.' Sunday Times Including conversations with Neil DeGrasse Tyson, Steven Pinker, Matt Ridley and more, this is an essential guide to the most exciting ideas of our time and their proponents from our most brilliant science communicator. Books Do Furnish a Life is divided by theme, including celebrating nature, exploring humanity, and interrogating faith. For the first time, it brings together Richard Dawkins' forewords, afterwords and introductions to the work of some of the leading thinkers of our age - Carl Sagan, Lawrence Krauss, Jacob Bronowski, Lewis Wolpert - with a selection of his reviews to provide an electrifying celebration of science writing, both fiction and non-fiction. It is also a sparkling addition to

Dawkins' own remarkable canon of work. Plenty of other scientists write well, but no one writes like Dawkins... here is Dawkins the teacher, the scholar, the polemicist, the joker, the aesthete, the poet, the satirist, the man of compassion as well as indignation, the slayer of superstition and, above all, the scientist.

NEW YORK TIMES BESTSELLER • A modern American epic set against the panorama of contemporary politics and culture—a hurtling, page-turning mystery that is equal parts *The Great Gatsby* and *The Bonfire of the Vanities* ONE OF THE BEST BOOKS OF THE YEAR: NPR, PBS, Harper's Bazaar, Esquire, Financial Times, The Times of India On the day of Barack Obama's inauguration,

an enigmatic billionaire from foreign shores takes up residence in the architectural jewel of "the Gardens," a cloistered community in New York's Greenwich Village. The neighborhood is a bubble within a bubble, and the residents are immediately intrigued by the eccentric newcomer and his family. Along with his improbable name, untraceable accent, and unmistakable whiff of danger, Nero Golden has brought along his three adult sons: agoraphobic, alcoholic Petya, a brilliant recluse with a tortured mind; Apu, the flamboyant artist, sexually and spiritually omnivorous, famous on twenty blocks; and D, at twenty-two the baby of the family, harboring an explosive secret even from himself. There is no mother, no wife; at least not until Vasilisa, a

sleek Russian expat, snags the septuagenarian Nero, becoming the queen to his king—a queen in want of an heir. Our guide to the Golden’s world is their neighbor René, an ambitious young filmmaker. Researching a movie about the Golden, he ingratiates himself into their household. Seduced by their mystique, he is inevitably implicated in their quarrels, their infidelities, and, indeed, their crimes. Meanwhile, like a bad joke, a certain comic-book villain embarks upon a crass presidential run that turns New York upside-down. Set against the strange and exuberant backdrop of current American culture and politics, *The Golden House* also marks Salman Rushdie’s triumphant and exciting return to realism. The result is a modern epic of love and terrorism, loss

and reinvention—a powerful, timely story told with the daring and panache that make Salman Rushdie a force of light in our dark new age.

“Takes readers on illuminating scientific adventure, beginning sixty-six million years ago, that connects dinosaurs, comets, DNA, and the future of the planet.” —Huffington Post In this brilliant exploration of our cosmic environment, the renowned particle physicist and New York Times–bestselling author of *Warped Passages* and *Knocking on Heaven’s Door* uses her research into dark matter to illuminate the startling connections between the furthest reaches of space and life here on Earth. Sixty-six million years ago, an object the size of a city

descended from space to crash into Earth, creating a devastating cataclysm that killed off the dinosaurs, along with three-quarters of the other species on the planet. What was its origin? In *Dark Matter and the Dinosaurs*, Lisa Randall proposes it was a comet that was dislodged from its orbit as the Solar System passed through a disk of dark matter embedded in the Milky Way. In a sense, it might have been dark matter that killed the dinosaurs. Working through the background and consequences of this proposal, Randall shares with us the latest findings—established and speculative—regarding the nature and role of dark matter and the origin of the Universe, our galaxy, our Solar System, and life, along with the process by which

scientists explore new concepts. In *Dark Matter and the Dinosaurs*, Randall tells a breathtaking story that weaves together the cosmos' history and our own, illuminating the deep relationships that are critical to our world and the astonishing beauty inherent in the most familiar things. "Randall has woven a beautiful account of how life on Earth is intimately connected to the cosmos." —The Daily Telegraph (UK)

National Geographic Backyard Guide to the Night Sky, 2nd Edition Bonita Corbett

A compelling ode to the essay form and the great essayists themselves, from Montaigne to Woolf to Sontag. Essayism is a book about essays and essayists, a study of melancholy and depression, a love letter to belle-lettrists, and an

account of the indispensable lifelines of reading and writing. Brian Dillon's style incorporates diverse features of the essay. By turns agglomerative, associative, digressive, curious, passionate, and dispassionate, his is a branching book of possibilities, seeking consolation and direction from Michel de Montaigne, Virginia Woolf, Roland Barthes, Theodor Adorno, Walter Benjamin, Georges Perec, Elizabeth Hardwick, and Susan Sontag, to name just a few of his influences. Whether he is writing on origins, aphorisms, coherence, vulnerability, anxiety, or a number of other subjects, his command of language, his erudition, and his own personal history serve not so much to illuminate or magnify the subject as to discover it anew through a kaleidoscopic

alignment of attention, thought, and feeling, a dazzling and momentary suspension of disparate elements, again and again.

From Sawdust to Stardust Historia Professional motorsports came to Las Vegas in the mid-1950s at a bankrupt horse track swarmed by gamblers--and soon became enmeshed with the government and organized crime. By 1965, the Vegas racing game moved from makeshift facilities to Stardust International Raceway, constructed with real grandstands, sanitary facilities and air-conditioned timing towers. Stardust would host the biggest racing names of the era--Mario Andretti, Parnelli Jones, John Surtees, Mark Donohue, Bobby Unser, Dan Gurney and Don Garlits among them. Established by a notorious

racketeer, the track stood at the confluence of shadowy elements-- wiretaps, casino skimming, Howard Hughes, and the beginnings of Watergate. The author traces the Stardust's colorful history through the auto racing monthlies, national newspapers, extensive interviews and the files of the FBI.

Against his better judgment, Hollywood-hating private investigator Nate Ross takes on a Tinseltown case in the spring of 1938. It sounds like a milk run: find an alcoholic screenwriter whose absence is stalling production on Republic Pictures' latest Western. But when the missing rummy turns up dead, and Nate learns that somebody's going to lethal lengths to keep Stardust Trail from being made, his simple case becomes far more complex, and deadly. He finds himself

traveling in unfamiliar territory: the world of B-movie cowboys, and the lines between the "reel" West and the real West begin to blur as Nate wrangles a twisted case of murder and sabotage pointing back nearly forty years to a bloody, real-life "Wild West" crime.

Our culture doesn't do happily-ever-after very well. According to current statistics, nearly half the marriages in this country end in divorce. Long-term marital love is apparently becoming a rare thing, yet it is possible. When Dr. Helen Fisher scanned the brains of seventeen long-married women and men who claimed to still be deeply in love with their spouses, the regions associated with intense, early stage romantic love were just as active as those of newlyweds. But I

didn't need science to convince me of this. My marriage was living proof. "How do you two do it?" friends would ask my wife Dolly. "After all these years Paul still looks at you like he's just fallen in love yesterday. "We'd met young and married early, not the ideal scenario for a successful long-term marriage. And yet, for us, the music never stopped playing, not when separated by service during the Vietnam War, nor through struggles with finances, career, a stillborn child, and a debilitating bout with acute anxiety disorder. Like all great love stories, through it all we remained deeply in love and committed to each other. Even as we aged Dolly remained for me the same beautiful angel I'd met in 1959. As we approached our fiftieth wedding anniversary,

suddenly, and with little warning, death took Dolly, ending our fifty-five-year love affair and with it, my desire to go on living. To survive and continue without her was the greatest challenge I would ever face. Love and Stardust is the true story of two people whose love for each other was exceptional, never wavering during a lifetime together. The proof of this is on every page.
