Out There Somewhere Andromache Books

In the vein of Randall Munroe's *What If?* meets Brian Green's *Elegant Universe*, a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier, investigating what's really "out there." We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In *Out There* Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? *Out There* is arranged in a simple question-and-answer format. The answers are delivered in Dr. Wall's informal but informative style, which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow. Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever. /DIV

Out There Screaming Abrams

From the prizewinning novelist and world-renowned short-story writer, the author of 2008's universally acclaimed novel *Peace* ("A brilliant one-act drama depicting the futility and moral complexity of combat" —The New York Times), eleven indelible new tales that showcase the electrifying artistry of a master. A husband confronts the power of youth and the inexorable truths of old age. A son sits by his mother's bedside determined to give her what she needs in her final days, even though doing so means breaking his own heart. A brief adulterous tryst illuminates the fragility of our most intimate relations. A young man returns in the face of crisis to the parents he once rejected. A divorced young woman dealing with slowly increasing despair develops an obsession about a note that fell from the pocket of a man who came to eat in the café where she works. A wife whose husband has been shot must weather a terrible snowstorm with her two sons, as well as a storm of doubt about the extent of his involvement in a crime. Richard Bausch's stories contend with transfixing themes: marital and familial estrangement, ways of trespass, the intractable mysteries and frights of daily life in these times, the uncertainty of knowledge and truth, the gulfs between friends and lovers, the frailty of even the most abiding love—while underlining throughout the persistence of love, the obdurate forces that connect us. His consummate skill, penetrating wit, and unflinching emotional generosity are on glorious display in this fine new collection.

Sloane Crosley returns to the form that made her a household name in really quite a lot of households: Essays! From the New York Times–bestselling author Sloane Crosley comes *Look Alive Out There*—a brand-new collection of essays filled with her trademark hilarity, wit, and charm. The characteristic heart and punch-packing observations are back, but with a newfound coat of maturity. A thin coat. More of a blazer, really. Fans of *I Was Told There'd Be Cake* and *How Did You Get This Number* know Sloane Crosley's life as a series of relatable but madcap misadventures. In *Look Alive Out There*, whether it's playing herself on *Gossip Girl*, scaling active volcanoes, crashing shivas, befriending swingers, or staring down the barrel of the fertility gun, Crosley continues to rise to the occasion with unmatched nerve and electric one-liners. And as her subjects become more serious, her essays deliver not just laughs but lasting emotional heft and insight. Crosley has taken up the gauntlets thrown by her predecessors—Dorothy Parker, Nora Ephron, David Sedaris—and crafted something rare, affecting, and true. *Look Alive Out There* arrives on the tenth anniversary of *I Was Told There'd Be Cake*, and Crosley's essays have managed to grow simultaneously more sophisticated and even funnier. And yet she's still very much herself, and it's great to have her back—and not a moment too soon (or late, for that matter).

Are we alone? Or is the universe teeming with intelligent life? Can we expect extraterrestrial civilizations to be common? Occasional? Rare? In this wide-ranging essay, writer/journalist/historian Nigel Bob Collins explores the probabilities of the existence of extraterrestrial, technological life based on the latest scientific findings. Not content with the well-worn assertion that life must be common because there are so many planets, Collins undertakes a thorough analysis of just what it would take for technological societies to arise on other planets. From quantifying the number of habitable planets, to examining the genesis and development of life on this planet, to grappling with the emergence of intelligence in our own species, Collins leaves no stone unturned. The number of scientific topics addressed may appear daunting, but the author's non-technical, sardonic style makes this work imminently readable. Though written for the lay reader, the findings in this essay may well open the eyes of many in the scientific community.

Love lost, found, and kicked around “It might be my imagination, but it seems like most people in the building tend to steer clear of me. I’m the one who gets the weird phone calls, the strange visitors, and disturbing mail.” “My last great love affair didn’t work out—many don’t, but maybe the next one might, and if not, maybe the one after that. There may not be someone for everyone; there may not be a God in heaven, or peace on earth either. But that doesn’t mean you just sit around at home, doing nothing.”

Jefferson Long Soldier, a young Army veteran of Native descent, returns home safely from Iraq and is convinced that the novel he carried with him over the ocean and across the desert (*One Hundred Years of Solitude* by Gabriel García Márquez) saved his life. Reuniting with his family after almost four years away, Jefferson attempts to reclaim his peaceful life in Santa Fe, New Mexico. But when heart-breaking memories of war will not be quelled, Jefferson travels south across the border to Mexico on a borrowed motorcycle to find his hero, the great writer behind the magic of the life-saving classic novel.

Something Is Out There Grand Central Publishing

He has been out there somewhere for a while now, a poet at large in America. Simon Ortiz, one of our finest living poets, has been a witness, participant, and observer of interactions between the Euro-American cultural world and that of his Native American people for many years. In this collection of haunting new work, he confronts moments and instances of his personal past—and finds redemption in the wellspring of his culture. A writer known for deeply personal poetry, Ortiz has produced perhaps his most personal work to date. In a collage of journal entries, free-verse poems, and renderings of poems in the Acoma language, he draws on life experiences over the past ten years—recalling time spent in academic conferences and writers' colonies, jails and detox centers—to convey something of the personal and cultural history of dislocation. As an American Indian artist living at times on the margins of mainstream culture, Ortiz has much to tell about the trials of alcoholism, poverty, displacement. But in the telling he affirms the strength of Native culture even under the most adverse conditions and confirms the sustaining power of Native beliefs and connections: “With our hands, we know the sacred earth. / With our spirits, we know the sacred sky.” Like many of his fellow Native Americans, Ortiz has been “out there somewhere”—Portland and San Francisco, Freiburg, Germany, and Martinique—away from his original homeland, culture, and community. Yet, as these works show, he continues to be absolutely connected socially and culturally to Native identity: “We insist that we as human cultural beings must always have this connection,” he writes, “because it is the way we maintain a Native sense of existence.” Drawing on this storehouse of places, times, and events, *Out There Somewhere* is a rich fusion taking readers into the heart and soul of one of today’s most exciting and original American poets.

COL (USA Ret) and bestselling author Gene P Abel lays out the truth about UFOs and offers readers a fascinating exploration of the existence of an intelligent extraterrestrial race in this exploration of sightings and their potential impact on the future, and security, of the human race. There are few events that would be of more importance, or more startling, than if, in the near future, we found ourselves confronted by another intelligent race with abilities and technology far superior to anything that currently exists on Earth. In *What, If Anything, Is Out There?* Gene P. Abel, COL (USA Ret.), details historic events that may well have been sightings by our ancestors and begins to explore what these encounters could mean for our security in the future. Drawing upon his years of military experience, Abel offers a unique insider’s perspective as he guides readers through a thoughtful history into the Roswell incident of 1947 and beyond. In the wake of the Department of Defense acknowledgement that the US Navy has encountered UFOs, and in a moment where sightings are on the rise, *What If Anything, Is Out There* is a timely, and much-needed, look at the role of intelligent life in the universe.

We all know about kangaroos, koalas and gum trees, but do Australian children really know about this country’s land, waters, wildlife and original inhabitants? Australia is old. Really old. We are the home of the oldest living plant, oldest animal fossils and the oldest continuing culture of people on earth. This book takes 6- to 10-year-olds on a colourful journey of Australia from the time of Gondwanaland and megafauna through to today. There are pages on ‘Australia’s Not-very-famous Animals’, ‘Who’s Poo?’ with scat and tracks of all shapes and sizes, ‘Legends of Rock’ all about the amazing qualities of our world-famous rocks, and the word ‘kangaroo’ in a range of Indigenous languages. With a colourfully chaotic mix of beautiful illustrations, eye-opening insights and fascinating facts, this 104-page story of Australia will amaze kids and adults alike.

A thrilling new voice in fiction injects the absurd into the everyday to present a startling vision of modern life, “[as] if Kafka and Camus and Bradbury were penning episodes of *Black Mirror*” (Chang-Rae Lee, author of *My Year Abroad*). “Stories so sharp and ingenious you may cut yourself on them while reading.”—Kelly Link, author of *Get In Trouble* With a focus on the weird and eerie forces that lurk beneath the surface of ordinary experience, Kate Folk’s debut collection is perfectly pitched to the madness of our current moment. A medical ward for a mysterious bone-melting disorder is the setting of a perilous love triangle. A curtain of void obliterates the globe at a steady pace, forcing Earth’s remaining inhabitants to decide with whom they want to spend eternity. A man fleeing personal scandal enters a codependent relationship with a house that requires a particularly demanding level of care. And in the title story, originally published in *The New Yorker*, a woman in San Francisco uses dating apps to find a partner despite the threat posed by “blots,” preternaturally handsome artificial men dispatched by Russian hackers to steal data. Meanwhile, in a poignant companion piece, a woman and a blot forge a genuine, albeit doomed, connection. Prescient and wildly imaginative, *Out There* depicts an uncanny landscape that holds a mirror to our subconscious fears and desires. Each story beats with its own fierce heart, and together they herald an exciting new arrival in the tradition of speculative literary fiction.

They dragged the unidentifiable body of a man out of the Thames: Routine enquiries led nowhere and the case was shelved. Superintendent Harry Lee retired and reopened the case for his own satisfaction. An orthodox approach led nowhere, so Lee tried a few unorthodox methods. That was when he heard the story of the Flying Saucer. Lee was experienced enough to tell a crank from a reliable witness, The Saucer-man was no crank. At last Lee saw the disc-ship for himself and met its pilot. He went aboard and took a trip to the unknown. Apparently the saucer-pilot was working on the same case from a different angle and Lee realised why it had been impossible to identify the body . . . it didn't belong. There were some more disappearances to account for . . .

Essays on Balance is a collection of thirty-three essays that explores possible answers to that one guiding question: Why is the world the way it is? Split into two parts, it explores first the most fundamental questions about the workings of nature—energy, entropy, time, space, change, life, and the universe—and it investigates them in a way that both laypersons and experts will enjoy reading. In the second part, considerations about human nature are explored as they relate to the self, the collective self, virtue and vice, religion, politics, free will, good and evil, and the concept of God. Approaching these considerations from an innovative worldview, it explains both nature and human nature as an indissoluble whole bound by the universal laws of balance.

“Funny, engrossing, and one-of-a-kind. *If You’re Out There* completely swept me away.” —Becky Albertalli, *New York Times* bestselling author of *Leah on the Offbeat* Part whip-smart suspense tale, part touching story of friendship, this is an extraordinary debut about a determined teen trying to solve a mystery no one else believes in. After Zan’s best friend moves to California, she is baffled and crushed when Priya suddenly ghosts. Worse, Priya’s social media has turned into a stream of ungrammatical posts chronicling a sunny, vapid new life that doesn’t sound like her at all. Everyone tells Zan not to be an idiot: Let Priya do her reinvention thing and move on. But until Zan hears Priya say it, she won’t be able to admit that their friendship is finished. It’s only when she meets Logan, the compelling new guy in Spanish class, that Zan begins to open up about her sadness, her insecurity, her sense of total betrayal. And he’s just as willing as she is to throw himself into the investigation when everyone else thinks her suspicions are crazy. Then a clue hidden in Priya’s latest selfie introduces a new, deeply disturbing possibility: Maybe Priya isn’t just not answering Zan’s emails. Maybe she can’t.
