Covering topics such as mobile reference, eBooks, mobile websites, and QR codes, this book examines the effects of the global mobile revolution on libraries and library users—critical information all librarians need. The *Handheld Library: Mobile Technology and the Librarian* provides the information and guidance librarians need to adapt themselves and their facilities to the mobile revolution—the fastest,

most diffuse worldwide technological innovation in human history. The book provides an up-to-date survey of how mobile technologies are affecting library use, library services, library systems, librarians, and library users at various types of libraries. The authors cover core topics related to mobile libraries, including mobile reference, eBooks, mobile websites, and QR codes, and address aspects of the mobile revolution less frequently covered in the literature, such as mobile

health information services, the use of mobile technologies on archival work, the impact of the mobile revolution on physical libraries, and the ways in which new mobile technologies are creating professional development opportunities within the profession. While this resource is specifically targeted toward librarians who plan and provide services using mobile technologies, academic, public, and other librarians will also find the ideas and information

within useful.

"Freshman Year - The Missing Chapters: Chuck": For years, fans of Archie Comics have wondered what happened in the years before the fabled teens of Riverdale entered high school. How did

everyone meet? Were the teachers always at the high school? Did all of Archie's friends always live in Riverdale? Just when did the "eternal love triangle" first start? In the "Freshman Year" saga, originally presented in the pages of ARCHIE #587-591, readers finally learned the back-story behind Riverdale's fabled cast of characters. But that wasn't the whole story! In this follow-up series of stories, writer Batton Lash fills in the blanks, giving readers an even bigger glimpse of

what went on with Jughead, Betty & Veronica, Reggie, Chuck, and Pencilneck G. In this story, Chuck's cartoons of the past come back to haunt him when word gets back to him that a tough kid took exception to Chuck's none-too-flattering caricatures. The subject of Chuck's doodles isn't happy about being "dissed" and has held a grudge for three years! Now Chuck must look back at the copious comics he did in freshman year to see what he did to diss his classmate!

Homeless: Against all Odds Oxford University Press, USA
A professor for almost 50 years in Rice University's Department of Computational and Applied Mathematics, nationally acclaimed scholar Richard Tapia is struck by the number of Chinese students in the hallways and wonders how the United States can remain globally competitive. Tapia asserts it is critical to the nation's health and well-being to improve the representation of "the

precious few," or domestic minority groups, in STEM education and careers. African Americans and Latinos alone make up 31% of the population, and he writes the country cannot maintain its economic and scientific health when such a large part of the population is left out of science and engineering. In addition, he contends the United States will not have racial justice without educational justice. Underrepresented groups must have equal access to higher education. This

thought-provoking book examines issues that contribute to the lack of minorities in graduate STEM programs, including a dependence on standardized tests, deficiencies in K-12 education and historic and ongoing racism. As a long-time mentor, he has seen first-hand that professors have lower expectations of these students. In a survey of Rice University faculty, only 6% agreed that underrepresented minorities have talent in the field of study. Unfortunately, professors

often interpret poor performance for lack of ability, despite the undoubtable fact that most of these students have not had the same quality education as their Anglo peers and are therefore not as well prepared. Providing a road map to increase the representation of domestic minority learners in academia and STEM fields, this is a must-read for university administrators and professors who want to attract and retain a diverse student body. In

addition, Tapia includes advice for students, their parents and teachers, who will also benefit from his wisdom and years of experience serving as a mentor to those from diverse backgrounds. *Strongest Deceptive System* Hundreds of Heads Books, LLC
A recent study, published in the *Nutrition Journal*, found that one in four college freshmen gain at least five percent of his or her body weight, an average of about 10 pounds, during the first semester. All of this can

be avoided with healthy cooking and an eye for good choices. This all-inclusive book covers everything from affordable options to reading ingredient labels. You will learn some basic healthy cooking techniques, the latest nutrition research, the low-down on all the most-talked about diets, and what kinds of foods will improve your college lifestyle. If you want to avoid the freshman 15 while also fueling your body with what it needs to be your sharpest, most

energized self, then this book is for you.

Prepare your institution for a new generation of disability services that embraces the growing student, as well as staff and faculty population with disabilities. Legal compliance, reasonable accommodations, classroom instruction

issues, strategies to improve the campus climate and more--this volume examines what disability services may have to offer, and how campuses and disability service professionals may need to collaborate or expand traditional notions of disability and disability services. Volume editors Wendy S. Harbour, Lawrence B. Taishoff Professor of Inclusive Education at Syracuse University, and Joseph W. Madaus, co-director of the Center on Postsecondary Education and Disability,

assemble an introduction, and overview of disability services. Contributing authors examine campus case-studies, procedures and terminology, legal compliance and disability services for staff and faculty. The volume concludes with a broad view of disability itself and how its role as a part of campus diversity. This is the 154th volume of the Jossey-Bass quarterly report series New Directions for Higher Education. Addressed to presidents, vice presidents, deans, and

other higher-education decision-makers on all kinds of campuses, *New Directions for Higher Education* provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

There has been an ongoing debate about the factors that cause homelessness. Some argue that homelessness results primarily from a broken housing policy system. Others believe individual behavioral

factors and lifestyle choices mainly cause homelessness. This is important because public attitudes toward homelessness influence local policies and services for individuals living this experience. *From Santa Anna to Selena* Bloomsbury Publishing USA
