The conservation of the spectrum is one of the key challenges facing radio systems professionals today. It will have an impact on equipment design, system design and communications policy for digital and analog systems in civil and military use, cell phones, private mobile radio, satellite communications and a growing number of other applications. This concise readable text keeps mathematics to a working minimum, with focus on the practical. It is a companion volume to Gosling's Radio Antennas and Propagation. Professor Gosling distills his experience in industry and teaching to show engineers how to deal with these challenges by describing the process of effective spectrum utilisation, including examination of separation of transmissions by space, time, frequency and sequency. Throughout the book reference is made to real-life examples to illustrate the theory. William Gosling has spent a lifetime in industry and education, including time as Technical Director of Plessey, President of EUREL (European Convention of Engineering Societies), Past President of the Institution of Electrical Engineers, and Chair of Electronic Engineering at the University of Bath, where he is currently Visiting Professor. He has published eleven books and over fifty scientific papers. A core radio engineering topic Readable - with maths kept to a minimum Ideal as a course text or professional update

Current rates of autism diagnoses have been cause for concern and research as well as rumor and misinformation. Important questions surround the condition: how early can an accurate diagnosis be made? At what age should intervention start? How can parents recognize warning signs? And what causes autism in the first place? There are no easy answers, but the Handbook of Early Intervention for Autism Spectrum Disorders gives researchers, practitioners, and academics the science and guidance to better understand and intervene. Background chapters survey the history of professional understanding of the disorders and the ongoing debate over autism as a single entity or a continuum. Chapters on best methods in screening, assessment, and diagnosis reflect the transition between the DSM-V and older diagnostic criteria. And at the heart of the book, the intervention section ranges from evidence-based strategies for developing core skills to ethical concerns, cultural considerations, and controversial treatments. Included in the Handbook's broad-based coverage: Designing curriculum programs for children with autism spectrum disorders (ASD). Mainstream education for children with ASD. Teaching independent living skills to children with ASD. Social skills and play. Behavioral and mental health disorders in children with ASD. Training and supporting caregivers in evidence-based practices. Teaching cognitive skills to children with ASD. The Handbook of Early Intervention for Autism Spectrum Disorders is a comprehensive reference for researchers, professors, and graduate students as well as clinicians and other scientist-practitioners in clinical child and school psychology, child and adolescent psychiatry, social work, rehabilitation,

special education, and pediatric medicine.

Autism Spectrum Disorder Carson-Dellosa Publishing

Bringing together leading experts, this book presents effective practices for helping people with autism spectrum disorders (ASD) to thrive in adulthood. As individuals with ASD mature, their needs change as well. The book reviews the growing research base and describes ways to support adolescents and adults in succeeding in higher education and work, living independently, enjoying leisure activities, navigating meaningful personal relationships, and more. Specific behavioral and instructional interventions--such as functional communication training, positive behavior support, and applied behavior analysis--are discussed. Case examples illustrate practical aspects of applying the strategies in real-world school and community settings.

Girls Under the Umbrella of Autism Spectrum Disorders Carson-Dellosa Publishing

Growing up in the shadow of a famous mother, Clara has never felt good about her body. Now, at sixteen, she has an unhealthy obsession with healthy eating. After a social media disaster, she decides to escape for the summer to Paris to stay with her estranged dad and her six-year-old brother, Alastair, who is on the autism spectrum. Charged with his care, Clara and Alastair set out to explore the city. Paris, and a handsome young French baker, teaches Clara about first love, and a new love of food. And Alastair teaches Clara about patience, trust, and the beauty of loving without judgment.
