The Paradoxical Kingdom Columbia University Press
 Interchange Fourth Edition is a fully revised edition of Interchange, the world's most successful series for adult and young-adult learners of North American English. The course has been revised to reflect the most recent approaches to language teaching and learning. It remains the innovative series teachers and students have grown to love, while incorporating suggestions from teachers and students all over the world. This edition offers updated content in every unit, grammar practice, and opportunities to develop speaking and listening skills. Interchange Fourth Edition features contemporary topics and a strong focus on both accuracy and fluency. Its successful multi-skills syllabus integrates themes, grammar, functions, vocabulary, and pronunciation. The underlying philosophy of the course remains that language is best learned when it's used for meaningful communication.

Changes 1 Student's Book

CRC Press
 This book aims to provide engineers with an overview knowledge of disciplines such as sociopolitics, psychology, economics, and leadership. Engineers are disproportionately represented in senior management and in leadership roles, and many work outside typical engineering roles. Vital to their success are technical skills,

but also, crucially, an understanding of the societal setting within which engineering takes place. Engineers that leverage their technical and analytical abilities with an understanding of the social context are enormously successful, both professionally and in terms of broader impact. This book originated from a recognition that this capacity of engineers can be enhanced with an understanding of the 'human forces', the phenomena that underpin and govern human interactions. The key ideas were assembled with domain experts from each field, to provide the key critical insights and how these might be practically applied by engineers. The authors provide the basis for the learning necessary to guide high-level strategic decisions, manage teams of diverse skillsets in complex environments, communicate in the context of management and decision-making, and to excel at the interface between a technical discipline and non-scientific fields. Prof. Andrej Atrens is Professor of Materials Engineering at The University of Queensland (UQ). He has experience in Universities and Research Institutes in Switzerland, Thailand, Canada, France, Germany, Sweden, China, USA, Fiji and Australia. Dr. Aleks Atrens is an Honorary Research Fellow at The University of Queensland (UQ). He earned his BE (Hons) in Chemical Engineering in 2007, and his PhD in 2011, both at UQ, where he has subsequently been a lecturer and researcher.

Progress in Geography: Key Stage 3, Second Edition

Cambridge University Press
 Travel to criminal underworld of eighteenth-century London in this start to a trilogy that Entertainment Weekly" calls "a rollicking historical adventure." The year is 1763. Gideon Seymour, thief and gentleman, is hiding from the villainous Tar Man. Suddenly the sky peels away like fabric, and from the gaping hole fall two curious-looking children. Peter Schock and Kate Dyer have fallen straight from the twenty-first century, thanks to a faulty experiment with an antigravity machine. Before Gideon and the children have a chance to gather their wits, the Tar Man takes off with the machine--and Peter and Kate's only chance of getting home. Soon Gideon, Peter, and Kate are swept into a journey through the dangerous underworld of eighteenth-century London, traveling the routes of notorious highwaymen and even entering King George's palace. And along they way they form a bond that, they hope, will stand strong in the face of unfathomable treachery. Filled with adventure, intrigue, and plenty of twists and turns, this start to a trilogy is written by a history scholar and wordsmith who makes the extraordinary believable, and will keep you on the edge of your seat.

 New Interchange is a multi-level series for adult and young-adult learners of English from the beginning to the high-intermediate level. The Level 1 Student's Book builds on the foundations established in the Intro for accurate and fluent communication, extending grammatical, lexical, and functional skills. Beautiful color photographs and illustrations facilitate the teaching of new vocabulary. The New Interchange series teaches students to use English for everyday situations and purposes related to school, work, social life, and leisure. As with the other levels of New Interchange, a complete set of ancillaries, including a video program, is available to make classes interesting and productive. Weekly World News Rowman & Littlefield

Although Africa is the most under-supplied region of the world for electricity, its economies are utterly dependent on it. There are enormous inequalities in electricity access, with industry receiving abundant supplies of cheap power while more than 80 per cent of the continent's population remain off the power grid. Africa is not unique in this respect, but levels of inequality are particularly pronounced here due to the inherent unevenness of 'electric capitalism' on the continent. This book provides an innovative theoretical framework for understanding electricity and capitalism in Africa, followed by a series of case studies that examine different aspects of electricity supply and consumption. The chapters focus primarily on South Africa due to its dominance in the electricity market, but there are important lessons to be learned for the continent as a whole, not least because of the aggressive expansion of South African capital into other parts of Africa to develop and control electricity. Africa is experiencing a renewed scramble for its electricity resources, conjuring up images of a recolonisation of the continent along the power grid. Written by leading academics and activists, Electric Capitalism offers a cutting-edge, yet accessible, overview of one of the most important developments in Africa today - with direct implications for health, gender equity, environmental sustainability and socio-economic justice. From nuclear power through prepaid electricity meters to the massive dam projects taking place in central Africa,

an understanding of electricity reforms on the continent helps shape our insights into development debates in Africa in particular and the expansion of neoliberal capitalism more generally.

Today's students need to know how to evaluate sources and use evidence to support their conclusions. This K-12 resource for teachers provides instructional support as well as a variety of learning opportunities for students. Through the activities in this book, students will ask and answer compelling questions, analyze primary sources, approach learning through an inquiry lens, and hone their historical thinking skills. The lessons teach skills and strategies for analyzing historical documents, partnered with document-based assessments. Graphic organizer templates help students structure their analyses. This resource written by Marc Pioch and Jodene Lynn prepares students for standardized tests and engages students with inquiry. The scaffolded approach to teaching analysis skills can be applied across grades K-12.
