 Increasing American fear about terrorism, environmental catastrophes, pandemics, and economic crises has fueled interest in "prepping": confronting disaster by mastering survivalist skills. This trend of self-reliance is not merely evidence of the American belief in the power of the individual; rather, this pragmatic shift away from expecting government aid during a disaster reflects a weakened belief in the bond between government and its citizens during a time of crisis. This ethnographic study explores the rise of the urban preppers' subculture in New York City, shedding light on the distinctive approach of city dwellers in preparing for disaster. With attention to the role of factors such as class, race, gender and one's expectations of government, it shows that how one imagines Doomsday affects how one prepares for it. Drawing

on participant observation, the author explores preppers' views on the central question of whether to "bug out" or "hunker down" in the event of disaster, and examines the ways in which the prepper economy increases revenue by targeting concerns over developing skills, building networks, securing equipment and arranging a safe locale. A rich qualitative study, *Bracing for the Apocalypse* will appeal to scholars of sociology and anthropology with interests in urban studies, ethnography and subcultures. *CliffsNotes® Praxis II®: Elementary Education (0011, 0012, 0014) Test Prep* Rutgers University Press

The Official ACT Prep Pack with 5 Full Practice Tests (3 in Official ACT Prep Guide + 2 Online) Xlibris Corporation A New York Times bestseller! A pioneering and timely study of how to navigate life's biggest transitions with meaning, purpose, and skill Bruce Feiler, author of the New York Times bestsellers *The Secrets of Happy Families* and *Council of Dads*, has long explored the stories that give our lives meaning. Galvanized by a personal crisis, he spent the last few years crisscrossing the

country, collecting hundreds of life stories in all fifty states from Americans who'd been through major life changes—from losing jobs to losing loved ones; from changing careers to changing relationships; from getting sober to getting healthy to simply looking for a fresh start. He then spent a year coding these stories, identifying patterns and takeaways that can help all of us survive and thrive in times of change. What Feiler discovered was a world in which transitions are becoming more plentiful and mastering the skills to manage them is more urgent for all of us. The idea that we'll have one job, one relationship, one source of happiness is hopelessly outdated. We all feel unnerved by this upheaval. We're concerned that our lives are not what we expected, that we've veered off course, living life out of order. But we're not alone. *Life Is in the Transitions* introduces the fresh, illuminating vision of the nonlinear life, in which each of us faces dozens of disruptors. One in ten of those becomes what Feiler calls a lifequake, a massive change that leads to a life transition. The average length of these transitions is five years. The upshot: We all spend half our lives in this unsettled state. You or someone you know is going through one now. The most exciting thing Feiler identified is a powerful new tool kit for navigating these pivotal times. Drawing on his extraordinary trove of insights, he lays out specific strategies each of us can use to reimagine and rebuild our lives, often stronger than before. From a master storyteller with an essential message, *Life Is in the Transitions* can move readers of any age to think deeply about times of change and how to transform them into periods of creativity and growth.

**Description**The author's inspirational memoir is a no holds barred, vivid account, depicting the victim's experience of abuse and cruelty at the hands of a mother possessed. Nicky Fowler, adopted at birth is the family scapegoat until one day he is forced to stand up to his abuser, but he pays a heavy price. Later in life with the memory of Dolly cast aside for ever, Nicky suddenly becomes seriously ill. Misdiagnosis by RAF Doctors, cast him into a psychiatric ward to be treated for his repressed anger toward his estranged mother. Mind-changing drugs and brainwashing therapy fail to erase his determination to survive. When close to death a brain tumor is found, but whilst in hospital and semi-conscious Dolly visits him out of the blue, and Nicky confronted by his past believes he is about to die again. This moving and compelling story shows that it is possible to survive the system, and eventually find a happy life. **About the Author**Ross Martin now lives with his wife in Oxford. Adopted as a child, he was subjected to years of cruelty and abuse. At age 28, whilst serving in the RAF abroad, he became ill, unable to walk, and this was originally diagnosed by Royal Navy doctors as a tumour on the brain, but on return to base in UK, Royal Air Force doctors reversed the diagnosis and admitted him into a psychiatric unit where he remained for four months subjected to mind altering drugs and group therapy administered in an attempt at cleansing him of his inner 'hatred'. When close to death, a tumour was located and removed, but Ross now suffers permanent physical disability including related bouts of depression. Invalided from the RAF in 1976 Ross then began a career as a qualified social worker in the probation service working with offenders with mental health issues. Though recently retired, Ross still works as a freelance anger management trainer. The author's son has been in hospital 15 years, diagnosed at 25 years of age as a paranoid schizophrenic. Ross is in regular contact with him and takes him on outings where he can feel safe and free. His role as father and carer gives Ross a wide insight into the sometimes bizarre world of Mental Health.

The growth of the American high school that occurred in the twentieth century is among the most remarkable educational, social, and cultural phenomena of the twentieth century. The history of education, however, has often reduced the institution to its educational function alone, thus missing its significantly broader importance. As a corrective, this collection of essays serves four ends: as an introduction to the history of the high school; as a reevaluation of the power of narratives that privilege the perspective of school leaders and the curriculum; as a glimpse into the worlds created by students and their communities; and, most critically, as a means of sparking conversations about where we might look next for stories worth telling.
