 This book is an introduction to the epistemology and practice of social science. It provides an exposition and critique of the ideology and practice of social science, and an examination of the professional social scientist as a manipulator of ideas and appearances.  This study of the curriculum for girls from the beginning of this century brings a fresh perspective to New Zealand educational history. Following the early triumphs of gaining the vote (and the right to qualify for university degrees), progress in women's education was not always straightforward. Social attitudes and

provisions for girls at state schools in the first quarter-century established patterns for later generations to inherit and modify. In some areas, such as science and mathematics, inequalities for Maori girls lingered. Using a wide range of resources, ruth Fry traces the origin and development of the curriculum for girls to 1975, International Women's year. Those who, in 1893, achieved success in their campaign for equal voting rights were also concerned about educational opportunities for women. Evans, much-loved author of *In the Dark Streets Shining*, brings us another tale of love, family and hope, clouded by two sisters' heart-breaking past. Perfect for fans of *Dilly Court* and *Lindsey Hutchinson*. 'The leading characters are finely drawn... crisp prose... a superb and heartwarming read' - *Irish Independent*
 In 1930s London, two little girls are lonely and bewildered after the tragic death of their mother. Daisy and June are now destitute and must go to the local orphanage. Once there, they take comfort in each other but they are robbed of even this consolation when they are parted because June is taken away for adoption. Years later, although out of touch and worlds apart, both share a disturbing childhood memory which will connect them forever. A memory that takes on a ghastly significance when June discovers the reason they were

abandoned... What readers are saying about *Always There*: 'Simple read, simple tale, simply engrossed! It is the sort of book that warrants a sequel' 'I thoroughly enjoyed another great story from Mrs E, I couldn't put the kindle down'

From rank outsiders to pop stardom a decade later, *The Damned* blazed an anarchic trail through punk rock to achieve massive chart success. A beacon for the Sex Pistols and The Clash to follow, they flung down the musical gauntlet in 1976 with Britain's first punk single 'New Rose'. *Smashing It Up: A Decade of Chaos with The Damned* is their definitive biography, drawing on new, in-depth research and interviews with associates and band members - including founders Brian James, Chris Millar (Rat Scabies), Raymond Burns (Captain Sensible) and David Lett (David Vanian). Conflict was rife: managers and labels came and went; bridges were burnt; opportunities squandered; and Kieron Tyler reveals how - and why - the wayward, wild and wilful *Damned* are the punk band that survived, and why they truly led the British Punk movement and outshone their contemporaries.

'Richly documented and convincingly presented' -- *New Society* Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, *Folk Devils and Moral Panics* is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the

British Academy.

Guruji said: 'Sing not the song that others have sung. Sing only what you yourself have realised in your own heart.' What I've realised in my own heart is that its song is for many, that it sings for whom it meets on its way. It does not remain at home, but is a wandering minstrel heart. This book is the engaging and colourful memoir of celebrated Scottish storyteller David Campbell. It is an exploration of the nature of love in its many guises, and of David's lifelong love of story. Join David as he tells his story from childhood in wartime Fraserburgh to a holiday job with a dramatic and life-changing conclusion, through a pivotal role as a BBC radio producer at the time of the Scottish renaissance of writing, drama and folk traditions, and finally to his international career as an acclaimed storyteller, mentored by celebrated tinker-traveller Duncan Williamson. The roots of things in my life have always been the love of words, stories, poetry and people, and the joy of bringing them together; it is there that I find the deepest meaning and the sweetest music.

Japan remains one of the most intriguing yet least understood nations. In a much needed, balanced and comprehensive analysis, among other remarkable revelations, this book presents for the first time a vital key to understanding the organisation of Japan's society and the behaviour of its people. The Japanese are not driven by a universal morality based on Good and Evil, but by broad aesthetic concepts based on Pure and Impure. What they include as 'impure' will surprise many readers.

Updated, with new research and over 100 revisions Ten years later, they're still talking about the weather! Kate Fox, the social anthropologist who put the quirks and hidden conditions of the English under a microscope, is back with more biting insights about the nature of Englishness. This updated and revised edition of *Watching the English* - which over the last decade has become the unofficial guidebook to the English national character - features new and fresh insights on the unwritten rules and foibles of

"squaddies," bikers, horse-riders, and more. Fox revisits a strange and fascinating culture, governed by complex sets of unspoken rules and bizarre codes of behavior. She demystifies the peculiar cultural rules that baffle us: the rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid pantomime rule. Class anxiety tests. The roots of English self-mockery and many more. An international bestseller, *Watching the English* is a biting, affectionate, insightful and often hilarious look at the English and their society.

ÿ In his first book, *A Dockyard Apprentice's Story*, Robert Smith (?Nige? to his mates) told of his formative years as a young trainee in Chatham Dockyard, where he trained as an engine fitter and turner. The *Technical Progressman* was set in the 1960s, taking up the story from the point where Bob transferred to the Weapons Section as a Technical Progressman. Now Bob has added a third and final part, about his post-Dockyard adventures working with the Royal Aircraft Establishment (RAE), and in posts with the MoD and Government agencies, and published the whole story in one volume. The full story of his career is packed with interesting stories, and Bob's sense of humour shines through.

This book required a lifetime of experience and sixteen years to write. Mind you, there was an eight-year gap in the middle when the author had to return to full-time, salaried employment. The chapters are presented alphabetically, so in theory it is possible to take any chapter, and read it in its own right. Once a reader has read all twenty-six chapters, he or she will have a sum of all the parts: a completed 'jigsaw' of Hal T. Strapel's story. Truth or fiction? Let the reader decide. Jane C.: "In 'Turning Thai', I think a very vivid picture of Thailand is presented — it all sounded very exotic to me sitting in dull old middle England. Lots of well-described local colour and all fluently articulated. The author met up with some colourful characters and gives an honest appraisal of how they affected him as a traveller in uncharted territory. There is definitely an eye for detail and the sights, sounds and smells leap off the page. I had a good laugh at the cockroach episode, which sounds very callous of me, but it resonated with me as I had a similar sort of experience in Sicily with a very large spider." John H.: "I found 'Bilious Belligerent Bowels' highly entertaining, particularly when Hal was describing the attentions of the nurse and her colleagues.

Charlie H.: "I found 'Queenish Quirks' an intriguing and easy read that connects cultures in a relatable way." Lee F.: "I enjoyed reading 'Lust for Lingerie'. It sounds voyeuristic in itself! As a man who spent his working life in ladies knickers I can see the author is knowledgeable!"

Menstruation is a topic which is both everyday and sensitive. From Leviticus to Pliny, to twentieth-century debates around 'menotoxin', to advertising and 'having the painters in', Victoria Newton's book offers a lively and innovative exploration of the social and cultural dimensions of menstruation. Through in-depth interviews with men and women, the book explores the many different ways in which this sensitive topic is spoken about in British culture. Looking specifically at euphemism, jokes, popular knowledge, everyday experience and folklore, the book provides original insights into the different discourses acting on the menstruating body and encourages debate about how these help to shape our everyday attitudes towards menstruation.

What does it mean to be a sporty woman in the 21st century? From the launch of Net-A-Sporter, serving up sports clothing for fashionistas, to the introduction of #plankie as the new Instagram selfie for yoga bunnies; exercise for women has finally gone mainstream. But if sweating has never been so hot for female celebrities, then why are there still so many obstacles for girls and women when it comes to sport? Why do girls still hate school sports lessons? Why is sport consistently defined as male territory, with TV cameras replicating the male gaze as they search out the most beautiful women in the crowd? Will women ever flock to watch football, rugby and boxing in their millions? Or turn up to the park with friends for a Sunday morning kickabout? How long do we have to wait to see the first multi-millionaire female footballer or basketball player? Eat. Sweat. Play is an engaging and inspirational work by sports writer Anna Kessel. PRAISE FOR EAT. SWEAT. PLAY "Anna Kessel's book should inspire a whole generation of women. It ought to be on the school curriculum." Hadley Freeman "Fascinating, compelling and thought-provoking" The Pool "A piercing call to arms, [Anna] argues that if women and girls embrace being active, it will lead to a sea change for women's

bodies, self-image and outlook. It is brilliant." The Stylist

The origin of the old Scottish expression "Heart was roasted" has long since been lost of the annals of time. However, let me assure everyone that we (and Wee) Scotts are not - and as far as I know - never have been cannibals. The famous Scotts actor Sir Billy Conolly is an expert in use of such permission. So those who wants to know more can ask him. The expression simply means that I was not, by any measurement, well-behave child. In fact, I was a positive horror. Having said that, I assure you that you will not find three sixes tattooed on my scalp. Although it has been suggested that I was the original model for the children's comic 'Dennis the Menace.'

In *Knowledgeable Women*, originally published in 1989, Sara Delamont traces the history of women's education and the elites it produces. She examines class and gender divisions in the structure and contest of education in Britain and the USA from 1850 to 1989. Her empirical focus is of course elites - especially elite women - but the justification for this is the belief that sociologists should study the powerful as well as the poor and powerless. Above all, Delamont argues the case for the relevance to sociology of a serious study of women, their schooling and professional training, and their struggle to enter the professions. She also encourages a broader focus to the sociology of education itself, viewing her subject from an anthropological structuralist perspective and encouraging the inclusion of anti-sexist ideas and material from other areas of sociology such as the study of science and stratification. She demonstrates for the first time the relevance to education of structuralist theorists such as Mary Douglas. *Knowledgeable Women* is a structuralist and feminist challenge to the sociology of education by an author highly regarded in Britain and the USA. It offers a non-sexist, structuralist, fully sociological sociology of education.

Life After Life Nicholas Brealey

An evocative memoir of a Welsh childhood by a well-known academic who moved from a humble background to a prominent position as a leading critic of 19th century fiction. The memoirs concentrate on the period 1924 to 1942. They are grouped according to certain themes: mother and father, grandparents, brother and cousins, schools, culture, politics, religion, sex, and love. Barbara and her brother Bill grew up in the provincial culture of their time, in a Baptist religion with a narrow moral code. The story's emphasis is on family life, with its rich crowd of relatives, friends, and languages.
