"At the age of 44, after a prominent career as a Catholic activist, Carlo Carretto was summoned by a voice that said: 'Leave everything, come with me into the desert. I don't want your action any longer, I want your prayer, your love.' Carretto responded by leaving for North Africa, where he joined the Little Brothers of Jesus and embraced the example of Charles de Foucauld. Among the fruits of Brother Carlo's response was *Letters from the Desert*, the first and most popular of his many books. Its life-affirming message has inspired countless readers in a dozen languages. Simply, it reminds us that in the evening of our lives we will be judged by love."--Publisher description

Daniel Goleman Omnibus MACMILLAN

Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

From Carlos Fonseca comes a dazzling, kaleidoscopic epic of art, politics, and hidden realities Just

before the dawn of the new millennium, a curator at a New Jersey museum of natural history receives an unusual invitation from a celebrated fashion designer. She shares the curator's fascination with the secrets of the animal kingdom—with camouflage and subterfuge—and she proposes that they collaborate on an exhibition, the nature of which remains largely obscure, even as they enter into a strange relationship marked by evasion and elision. Seven years later, after the designer's death, the curator recovers the archive of their never-completed project. During a long night of insomnia, he finds within the archive a series of clues about the true history of the designer's family, a mind-bending puzzle that winds from Haifa, Israel, to bohemian 1970s New York to the Latin American jungles. As he follows this trail, the curator discovers a cast of characters whose own fixations interrogate the unstable frontiers between art, science, politics, and religion. An aging photographer, living nearly alone in an abandoned mining town where subterranean fires rage without end, creates miniature replicas of ruined cities. A former model turned conceptual artist becomes the star defendant in a trial over the very soul and purpose of art. A young indigenous boy receives a vision of the end of the world. Reality is a curtain, the curator realizes, and to draw it back is to reveal the theater of the obsessed. *Natural History* is a portrait of a world trapped between faith and irony, tragedy and farce. An urgent and impressively ambitious novel in the tradition of Italo Calvino and Ricardo Piglia, it confirms Carlos Fonseca as one of the most daring writers of his generation.

Fireflies, although set in Barcelona during the Spanish Civil War, could readily take place in a bellicose situation anywhere in the world. It contains an exposé of the chasm between generations, between rich and poor, between materialism and idealism. This novel has a

socioeconomic/psychological relevance that leaves the reader pondering the consequences of war and the nugatory effects of imposing status quo values on adolescents who are in search of their own truth, their *raison d'être*. The story centers on the lives of two adolescents from opposite levels of society whose redemption lies in their short-lived mutual love, which ends tragically.

Philosophy, a School of Freedom Bloomsbury Publishing

Since the late nineteen sixties, transnational adoption has emerged as a global phenomenon. Due to a sharp decline in infants being made available for adoption locally, involuntarily childless couples in Western Europe and North America who wish to create a family, have to look to look to countries in the poor South and Eastern Europe. The purpose of this book is to locate transnational adoption within a broad context of contemporary Western life, especially values concerning family, children and meaningful relatedness, and to explore the many ambiguities and paradoxes that the practice entails. Based on empirical research from Norway, the author identifies three main themes for analysis: Firstly, by focusing on the perceived relationship between biology and sociality, she examines how notions of child, childhood and significant relatedness vary across time and space. She argues that through a process of kinning, persons are made into kin. In the case of adoption, kinning overcomes a dominant cultural emphasis placed upon biological connectedness. Secondly, it is a study of the rise of expert knowledge in the understanding of 'the best interest of the child', and how the part played by the 'psycho.technocrats' effects national and international policy and practice of transnational adoption. Thirdly, it shows how transnational adoption both depends upon and helps to foster the globalisation of Western rationality and morality. The book is an original contribution to the anthropological study of kinship and globalisation.

Balbino, "a boy from a village", a "nobody" who writes a notebook about everything that happens to him within the repressed and stifling society of Galicia in the thirties and forties. He tells of the moral

and social atmosphere that prevails asking and answering questions and details the most elemental social struggle. There is also however the story of a true but impossible love. This book was first printed in Argentina in 1961 and became one of the most successful Galician books published. It has a lyrical style that immediately evokes sights and sounds of this part of Spain. The author Xosé Neira Vilas writes from his experiences of the era and the lifestyle of boys growing up in that society and provides a rich insight to life of the peasant boy "Balbino".

Shows how the networking-averse can succeed by working with the very traits that make them hate traditional networking Written by a proud introvert who is also an enthusiastic networker Includes field-tested tips and techniques for virtually any situation Are you the kind of person who would rather get a root canal than face a group of strangers? Does the phrase "working a room" make you want to retreat to yours? Does traditional networking advice seem like it's in a foreign language? Devora Zack, an avowed introvert and a successful consultant who speaks to thousands of people every year, feels your pain. She found that most networking advice books assume that to succeed you have to become an outgoing, extraverted person. Or at least learn how to fake it. Not at all. There is another way. This book shatters stereotypes about people who dislike networking. They're not shy or misanthropic. Rather, they tend to be reflective—they think before they talk. They focus intensely on a few things rather than broadly on a lot of things. And they need time alone to recharge. Because they've been told networking is all about small talk, big numbers and constant contact, they assume it's not for them. But it is! Zack politely examines and then smashes to tiny fragments the "dusty old rules" of standard networking advice. She shows how the very traits that ordinarily make people networking-averse can be harnessed to forge an approach that is just as effective as more traditional approaches, if not better. And she applies it to all kinds of situations, not just formal networking events. After all, as she says, life is just one big networking opportunity—a notion readers can now embrace. Networking enables you to accomplish the things that are important to you. But you can't adopt a style that goes against who you are—and you don't have to. "I have never met a person who did not benefit tremendously from learning how to network—on his or her own terms", Zack writes. "You do not succeed by denying your natural temperament; you succeed by working with your strengths."

This examination of female domestic service concentrates on the mistress-servant relationship across a 50-year period in Bolivia, in order to understand why a dominant class of women hires others to carry out domestic duties. Within this broader context, the author explores female domestic service through oral histories with mistresses and servants, court cases and interviews. She explores how gender and ethnicity are mediated by class position and historical experience, and how changing power relations have both sustained and altered social distinctions.
