The Bukavu Series Taylor & Francis

Hollywood's live-action superhero films currently dominate the worldwide box-office, with the characters enjoying more notoriety through their feature film and television depictions than they have ever before. This book argues that this immense popularity reveals deep cultural concerns about politics, gender, ethnicity, patriotism and consumerism after the events of 9/11. Superheroes have long been agents of hegemony, fighting for abstract ideals of justice while overall perpetuating the American status quo. Yet at the same time, the book explores how the genre has also been utilized to question and critique these dominant cultural assumptions.

Race to the Rescue! A&C Black

What if fairy-tale characters lived in New York City? What if a superhero knew he was a fictional character? What if you could dispense your own justice with one hundred untraceable bullets? These are the questions asked and answered in the course of the challenging storytelling in *Fables*, *Tom Strong*, and *100 Bullets*, the three twenty-first-century comics series that Karin Kukkonen considers in depth in her exploration of how and why the storytelling in comics is more than merely entertaining. Applying a cognitive approach to reading comics in all their narrative richness and intricacy, *Contemporary Comics Storytelling* opens an intriguing perspective on how these works engage the legacy of postmodernism--its subversion, self-reflexivity, and moral contingency. Its three case studies trace how contemporary comics tie into deep

traditions of visual and verbal storytelling, how they reevaluate their own status as fiction, and how the fictional minds of their characters generate complex ethical thought experiments. At a time when the medium is taken more and more seriously as intricate and compelling literary art, this book lays the groundwork for an analysis of the ways in which comics challenge and engage readers' minds. It brings together comics studies with narratology and literary criticism and, in so doing, provides a new set of tools for evaluating the graphic novel as an emergent literary form.

This book is the follow-up to Thierry Groensteen's groundbreaking *The System of Comics*, in which the leading French-language comics theorist set out to investigate how the medium functions, introducing the principle of iconic solidarity, and showing the systems that underlie the articulation between panels at three levels: page layout, linear sequence, and nonsequential links woven through the comic book as a whole. He now develops that analysis further, using examples

from a very wide range of comics, including the work of American artists such as Chris Ware and Robert Crumb. He tests out his theoretical framework by bringing it up against cases that challenge it, such as abstract comics, digital comics and shojo manga, and offers insightful reflections on these innovations. In addition, he includes lengthy chapters on three areas not covered in the first book. First, he explores the role of the narrator, both verbal and visual, and the particular issues that arise out of narration in autobiographical comics. Second, Groensteen tackles the question of rhythm in comics, and the skill demonstrated by virtuoso artists in intertwining different rhythms over and above the basic beat provided by the discontinuity of the panels. And third he resets the relationship of comics to contemporary art, conditioned by cultural history and aesthetic traditions but evolving recently as comics artists move onto avant-garde terrain.

Comics Versus Art Graywolf Press
This book provides both students and scholars with a critical and historical introduction to the graphic novel. Jan Baetens and Hugo Frey explore this exciting form of visual and literary communication, showing readers how to situate and analyse graphic novels since their rise to prominence half a century ago. Several key questions are addressed: what is the graphic novel? How do we read graphic novels as narrative forms? Why is page design and publishing format so significant? What theories are developing to explain the genre? How is this form blurring the categories of high and popular literature? Why are graphic novelists nostalgic for the old comics? The authors address these and many other questions

raised by the genre. Through their analysis of the works of many well-known graphic novelists - including Bechdel, Clowes, Spiegelman and Ware - Baetens and Frey offer significant insights for future teaching and research on the graphic novel.

A brooding novel of colonial intrigue in the Congo, from the author of *The Accordionist's Son* and *Obabakoak* The year is 1903, and the garrison of Yangambi on the banks of the Congo is under the command of Captain Lalande Biran. The captain is also a poet whose ambition is to amass a fortune and return to the literary cafés of Paris. His glamorous wife, Christine, has a further ambition: to own seven houses in France, a house for every year he has been abroad. At Lalande Biran's side are the ex-legionnaire van Thiegel, a brutal womanizer, and the servile, treacherous Donatien, who dreams of running a brothel. The officers spend their days guarding enslaved rubber-tappers and kidnapping young girls, and at their hands the jungle is transformed into a wild circus of human ambition and absurdity. But everything changes with the arrival of a new officer and brilliant marksman: the enigmatic Chrysostome Liege. An outstanding new novel from the critically acclaimed and prizewinning author Bernardo Atxaga, *Seven Houses in France* is a blackly comic tale which reveals the darkest sides of human desire.

"El presente volumen aborda la traducción e interpretación institucional con un triple enfoque: a) su aplicación

social; b) las tendencias profesionales; y, c) la innovación didáctica en la enseñanza universitaria. Respecto a su aplicación social, los primeros capítulos tratan la traducción e interpretación como una herramienta esencial que permite superar barreras tanto lingüísticas como culturales en situaciones de emergencia y acceder a derechos fundamentales mediante el empoderamiento de las mujeres en procedimientos de asistencia y atención en contextos de violencia de género. El posterior análisis y descripción de diversos entornos profesionales en contextos institucionales permiten detectar y extraer las competencias que los profesionales necesitan para poder hacer frente a los nuevos desafíos a los que se enfrentan en el nuevo paisaje profesional dibujado por los acontecimientos históricos de los últimos tiempos. En cuanto a la innovación didáctica, el volumen presenta nuevas metodologías docentes y acciones formativas que incluyen, entre otras, el empleo de la música y el mindfulness en el aula de interpretación, el uso de las nuevas tecnologías para la formación de intérpretes a distancia y la posesión como herramienta didáctica en el aula de traducción"--

Cromwell Stone (Graphic Novel) U of Nebraska Press

On the surface, the relationship between comics and the 'high' arts once seemed simple; comic books and strips could be mined for inspiration, but were not themselves considered legitimate art objects. Though this traditional distinction has begun to erode, the worlds of comics and art continue to occupy vastly different social spaces. *Comics Versus Art* examines the relationship between comics and the most important institutions of the art world, including museums, auction houses, and the art press. Bart Beaty's analysis centres around two questions: why were comics excluded from the

history of art for most of the twentieth century, and what does it mean that comics production is now more closely aligned with the art world? Approaching

this relationship for the first time through the lens of the sociology of culture, Beaty advances a completely novel approach to the comics form.
