**Introduction to
Demography** Avon Books
The OT semantic field of

'colour' is presented as a coherent, interdependent, and graded linguistic structure. The relevant lexical items are organized under the following categories: primary (basic) terms;

secondary and tertiary terms; terms for pigments, dyes, painting and paints; and terms for stains, speckles, and other phenomena related to colour. Proper names, and names of objects

which carry 'colour' associations are discussed as well. Many OT texts are discussed in detail. Finally, the OT colour field is compared to its Mishnaic Hebrew counterpart, and an Appendix dealing with the renewal of the same lexical sector within modern spoken Hebrew brings the study up to the present.

Mineral Resources of Turkey Andesite Press

This book furnishes detailed information

about Turkey's existing mineral resources, besides providing concepts and ideas which may help the search for potential mineral resources in the future. It is a first book in the English-language international literature on mineral resources of Turkey and it is aimed at economic geologists, mining engineers, and mining investors, as well as graduate and undergraduate students. This work focuses mainly on a range of mineral systems and related

geological features throughout Turkey. Taking into account the lack of international literature on these resources, a considerable portion of the book explains the geological context of the region and the settings in which the mineral resources occur. The genetic characteristics of these mineral resources are emphasized and important information is also presented on their economic aspects. All chapter contributions are prepared by researchers and professional

geologists.

A book that became an

instant classic when it

first appeared in 1995,

Old Southern Apples is an

indispensable reference

for fruit lovers

everywhere, especially those who live in the southern United States. Out of print for several years, this newly revised and expanded edition now features descriptions of some 1,800 apple varieties that either originated in the South or were widely grown there before 1928. Author Lee Calhoun was one of the foremost figures in apple conservation in America. This masterwork reflects his knowledge and personal experience over more than thirty years, as he sought out and grew

hundreds of classic apples, including both legendary varieties (like Nickajack and Magnum Bonum) and little-known ones (like Buff and Cullasaga). Representing our common orchard heritage, many of these apples are today at risk of disappearing from our national table. Illustrated with more than 120 color images of classic apples from the National Agricultural Library's collection of watercolor paintings, Old Southern Apples is a fascinating and beautiful reference

and gift book. In addition to A-to-Z descriptions of apple varieties, both extant and extinct, Calhoun provides a brief history of apple culture in the South, and includes practical information on growing apples and on their traditional uses. *Geographisch-statistisches Handwörterbuch über alle Theile der Erde* Springer This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it.

De la Broquière set off for the Holy Land in 1432 for the purpose of spying out the possibilities of a new crusade to be led by the Duke of Burgundy. He returned overland, through the Turkish Empire, alone. His observations of the land, the people, the rulers, the food and the customs

make fascinating reading. There is also a long section on the organization and tactics of the Ottoman Army, and the ways that the Europeans can use to defeat it. De la Broquière is a highly competent spy and a very observant tourist.
