This book takes the reader on a delightful journey into Africa and into the world of a little girl called Tippi who tells her unforgettable story on her return from Africa to France at the age of ten. Tippi is no ordinary child. She believes that she has the gift of talking to animals and that they are like brothers to her. Her world is filled with characters like Leon the Chameleon, Abu the elephant whom she calls 'my brother', and leopards, snakes, baboons, lions and ostriches ... 'I speak to them with my mind, or through my eyes, my heart or my soul, and I see that they understand and answer me.' My Book of Africa contains the words of a little girl who has the gift of reaching out and touching the people and animals of Africa. It is beautifully illustrated with over 100 magical photographs taken by her parents, French filmmakers and photographers, Sylvie Robert and Alain Degré.

First published in 2006. Novial (NOV - new, International Auxiliary Language) is one of the easiest constructed languages, partly because it highly resembles English. The multilingual dictionary of 1930, Novial-Lexike, may be in itself a sufficient guide to learn Novial. The reader will find : (1) an introduction showing the urgent need for such a language, (2) the history of the movement with criticism of earlier proposed artificial languages, (3) a detailed grammar, in which, chapter by chapter, the reasons are given that have led to precisely those and to no other forms, (4) the scientific principles of word selection, and (5) some specimens intended to show the use of the language for different purposes and in different styles.

In this companion to Urs Widmer's novel *My Mother's Lover*, the narrator is again the son who pieces together the fragments of his parents' stories. Since the age of twelve, Karl, the father, has observed the family tradition of recording his life in a single notebook, but when his book is lost soon after his death, his son resolves to rewrite it. Here, we get to know Karl's friends--a collection of anti-fascist painters and architects known as Group 33. We learn of the early years of Karl's marriage and follow his military service as the Swiss fear a German invasion during World War II, his political activity for the Communist Party, and his brief career as a teacher. Widmer brilliantly combines family history and historical events to tell the story of a man more at home in the world of the imagination than in the real world, a father who grows on the reader, just as he grows on his son.

How many animals can come to stay before Dad notices?

*Three My First Discoveries*

In this inspiring meditation, Patrick Sjskind considers the two great forces of human existence. He draws on scenes as varied as a young couple having oral sex while stuck in traffic, and an elderly Thomas Mann tumbling back into forbidden love. Sjskind then dazzles as he writes about Orpheus and Jesus, comparing their very different stories of death conquered through love.

In 1941, Henry Miller, the author of *Tropic of Cancer*, was commissioned by a Los Angeles bookseller to write an erotic novel for a dollar a page. *Under the Roofs of Paris* (originally published as *Opus Pistorum*) is that book. Here one finds Miller's characteristic candor, wit, self-mockery, and celebration of the good life. From Marcelle to Tania, to Alexandra, to Anna, and from the Left Bank to Pigalle, Miller sweeps us up in his odyssey in search of the perfect job, the perfect woman, and the perfect experience.

After *The Big Book of Bugs* and *The Big Book of Beasts*, the hugely successful series Following the wild success of *The Big Book of Bugs* and *The Big Book of Beasts*, *The Big Book of the Blue* is the third installment in Yuval Zommer's beloved series. Alongside everything the young oceanographer needs to know, Zommer's charming illustrations bring to life some of the

slipperiest, scaliest, strangest, and most monstrous underwater animals. The book opens by explaining how different types of animals are able to breathe and survive underwater, and the different families to which they belong. Subsequent pages are dedicated to specific creatures, including sea turtles, whales, sharks, stingrays, and seahorses, and show varied life in specific habitats, such as a coral reef or deep sea bed. *The Big Book of the Blue* also explores the underwater world thematically, looking at animals in danger, learning how to spot creatures at the beach, and discovering how to do our part to save sea life. Beautiful and filled with fascinating facts, young, curious readers won't be able to tear their eyes away from the page.

Why we all deserve a life worth living and a death worth dying for 'Most men don't fear death. They fear those things – the knife, the shipwreck, the illness, the bomb – which precede, by microseconds if you're lucky, and many years if you're not, the moment of death.' When Terry Pratchett was diagnosed with Alzheimer's in his fifties he was angry – not with death but with the disease that would take him there, and with the suffering disease can cause when we are not allowed to put an end to it. In this essay, broadcast to millions as the BBC Richard Dimbleby Lecture 2010 and previously only available as part of *A Slip of the Keyboard*, he argues for our right to choose – our right to a good life, and a good death too.

A one-time literary novelist of some respectability, now brought low by the double insult of obscurity and crippling debt, Robert G. Mehlman is a man in need of money and recognition, fast. But Mehlman's publisher is only interested in his long overdue novel, since the people don't want short stories, and his portfolio was liquidated months ago. So, it is to culinary writing that he turns. A

practiced decadent, a habitual spendthrift, and a serial womanizer, he has, ostensibly, all the right qualities. But the path to fame is never a smooth one. *Phantom Pain* is the bitterly funny but unpublished manuscript of Mehlman's autobiography. In it, he tells the parallel stories of his decaying marriage and his puzzling affair with a woman he meets by chance and who accompanies him on the road. York City to Atlantic City where they gamble away most of Mehlman's remaining funds and then North, to Albany, where he finds unlikely salvation and the inspiration for his book, *Polish-Jewish Cuisine in 69 Recipes*. Framed by Mehlman's son's account of his famous father, this novel-within-a-novel is a darkly hilarious tale of a writer's fall and his subsequent rise. *Phantom Pain* has all the characteristic mixture of slapstick and stark despair that has made Arnon Grunberg one of the most interesting, certainly the funniest, and arguably the best Dutch writer working today.

"The best single volume ever written on the subject, such is its range, authority, and readability."—Times Literary Supplement Why has opera transfixed and fascinated audiences for centuries? Carolyn Abbate and Roger Parker answer this question in their "effervescent, witty" (*Die Welt*, Germany) retelling of the history of opera, examining its development, the musical and dramatic means by which it communicates, and its role in society. Now with an expanded examination of opera as an institution in the twenty-first century, this "lucid and sweeping" (*Boston Globe*) narrative explores the tensions that have sustained opera over four hundred years: between words and music, character and singer, inattention and absorption. Abbate and Parker argue that, though the genre's most popular and enduring works were almost all written in a distant European past, opera continues to change the viewer—physically, emotionally, intellectually—with its enduring power.

"With Brecht, Benn, Bobrowski and Celan, Peter Huchel is one of a

handful of essential post-war poets in the German language. A precise observer of natural phenomena, Huchel is above all a realist whose metaphors take us deep into the social and historical landscape, into zones of devastation and despair, the zero-hour of isolation. His world is devoid of illusion or sentimentality; there is no redemption, at most an exactitude that is itself a confirmation of what is human and real. Lifted out of the schismatic currents of the Cold War era by Martyn Crucefix's supple and arrestingly sensual translations, Huchel surprises us as a fresh and startling voice for our own numbered days." --Iain Galbraith  
*Some Folk Think the South Pole's Hot* Other Press (NY)

From the author of *Lovecraft Country*: Myth and reality collide on a college campus "in a comic fantasy of wonderful energy, invention, and generosity of spirit" (Alison Lurie). Stephen Titus George is a young writer-in-residence at Cornell University in upstate New York. A bestselling author in search of a new story, he sees his life as a modern-day fairy tale starring himself as a would-be knight trying to woo a lovely maiden—or, actually, two: the bewitching Calliope and his guiding light, Aurora Borealis Smith. But he's not quite in control of the narrative. There's another writer with even greater influence on campus. The unseen Mr. Sunshine is an eternal, semi-retired deity who's been fashioning his own story for centuries. He has all his characters in

place: dragons, sprites, gnomes, and villains. And now, finally, his hero. As Mr. Sunshine's world comes to fabulous and violent life, how can Stephen decide his own fate if it's already being plotted by a god? An epic of life and death, good and evil, love and sorcery, *Fool on the Hill* lands Matt Ruff happily on the shelf between Tom Robbins and J. R. R. Tolkien for every lover of the "funky and fantastical" (New York magazine). "Inspired . . . rich in flavorful language . . . [a] dazzling tour de force." —San Francisco Chronicle "The plot comes together like a brilliant clockwork toy." —Locus
