With Chris Trengove and Peter Lawrence In 1967 Peter 'Dougal' Butler became a roadie for The Who and their mercurial genius drummer Keith Moon. Soon he would be Moon's personal assistant, chauffeur, and all-purpose wingman. The ride lasted a tumultuous ten years, ending just prior to Moon's untimely death in 1978. Full Moon is Butler's memoir of that ride: essential reading for Who fans, and a masterclass in the mayhem caused by rock 'n' roll excess. 'The most candid insight into the Who star's life.' Daily Star 'Written in a wonderful fast, racy style, Runyonesque and full of good jokes.' Girl About Town 'A welcome change from the usual bland rock book reportage... Butler clearly has a deep and lasting affection for Moon.' Andy Gill, NME 'Certainly outrageous, sometimes funny, but mostly a sad account of life with a talented neurotic.' Daily Mirror

Full Moon Feast invites us to a table brimming with locally grown foods, radical wisdom, and communal nourishment. In Full Moon Feast, accomplished chef and passionate food activist Jessica Prentice champions locally grown, humanely raised, nutrient-rich foods and traditional cooking methods. The book follows the thirteen lunar cycles of an agrarian year, from the midwinter Hunger Moon and the springtime sweetness of the Sap Moon to the bounty of the Moon When Salmon Return to Earth in autumn. Each chapter includes recipes that display the richly satisfying flavors of foods tied to the ancient rhythm of the seasons. Prentice decries our modern food culture:

megafarms and factories, the chemically processed ghosts of real foods in our diets, and the suffering--physical, emotional, cultural, communal, and spiritual--born of a disconnect from our food sources. She laments the system that is poisoning our bodies and our communities. But Full Moon Feast is a celebration, not a dirge. Prentice has emerged from her own early struggles with food to offer health, nourishment, and fulfillment to her readers. She recounts her relationships with local farmers alongside ancient harvest legends and methods of food preparation from indigenous cultures around the world. Combining the radical nutrition of Sally Fallon's Nourishing Traditions, keen agri-political acumen, and a spiritual sensibility that draws from indigenous as well as Western traditions, Full Moon Feast is a call to reconnect to our food, our land, and each other.

Excerpt: The full moon cycle is a cycle of about 14 lunations over which full moons vary in apparent size and age (time since new moon). The sequence is The apparent size of the Moon varies because the orbit of the Moon is elliptical, and as a consequence at one time it is nearer to the Earth (perigee) than half an orbit later (apogee). The orbital period of the Moon from perigee to apogee and back to perigee is called the anomalistic month. The appearance, or phase, of the Moon is due to its motion with respect to the Sun. It varies in a period of time called a lunation, also called synodic month. The age is the number of days since new moon. - See Meeus (1981). The ellipticity of the orbit also causes the duration of a half lunation to depend on where in the elliptical orbit it begins, and so affects the

age of the full moon. - See Jawad (1993). The full moon cycle is slightly less than 14 synodic months and slightly less than 15 anomalistic months. Its significance is that when you start with a large full moon at the perigee, then subsequent full moons will occur ever later after the passage of the perigee; after 1 full moon cycle, the accumulated difference between the number of completed anomalistic months and the number of completed synodic months is exactly 1. The average duration of the anomalistic month is: AM = 27.55454988 days (see Meeus (1991) eq. 48.1)The synodic month has an average duration of: SM = 29.530588853 days (see Meeus (1991) eq. 47.1)The full moon cycle is the beat period of these two, ..
