Cantik itu mahal. Ini dogma pertama yang sering melekat di pikiran kita. Perawatannya sulit, ribet. Belum lagi, katanya bikin ketergantungan. Mau perawatan seperti apa pun, rasanya kalah jauh pula dengan artis-artis kekinian yang sering muncul di medsos kita. Apa merawat kesehatan dan kebersihan diri identik dengan harga yang bikin dompet menangis? Psst..., kita akan belajar bareng-bareng di buku *Beauty Undercover for Muslimah* ini. Memahami mengapa kita harus melakukan ini lebih penting dibandingkan sekadar apa yang harus kita lakukan . In fact, *Beauty Undercover* is a matter of balancing our bright mind, healthy body, and positive spirit. Kita akan sama-sama belajar untuk tampil cantik yang sehat dan nyaman dipandang.

Judul : Model Serli : Social, Education, Reaction, Leadership, Inovation Penulis : Serly Daud, Asna Aneta, Novrianty Djafri, dan Muhammad Isman Jusuf Ukuran : 15,5 x 23 cm Tebal : 134 Halaman Cover : Soft Cover No. ISBN : 978-623-162-994-4 No. E-ISBN : 978-623-162-993-7 (PDF) SINOPSIS Paradigma Learning and development bertujuan untuk meningkatkan kinerja pegawai masing-masing baik secara kelompok dan individu. Pengembangan kompetensi bagi seluruh pegawai ini menjadi bagian dari strategi manajemen dalam menyelaraskan tujuan dan sasaran dengan visi misi organisasi. Paradigma baru ini memberikan ruang berkembangnya berbagai model pengembangan kompetensi. Service excellent merupakan salah satu pelatihan yang dapat dikembangkan dalam peningkatan pelayanan perawat di rumah sakit. Service excellent merupakan upaya memberikan layanan terbaik untuk yang berorientasi pada kepentingan pasien yang memungkinkan perawat mampu memberikan dan terciptanya kepuasan yang optimal. Peningkatan service excellent oleh perawat di rumah sakit dilakukan melalui pelatihan yang berkesinambungan, bukan saja secara teoretis tetapi juga penugasan dan mentoring oleh rekan kerja atau oleh pimpinannya. Salah satu model pelatihan yang dapat digunakan dalam meningkatkan service excellent adalah model 70:20:10. Menurut Jennings and Wagnier (2016:14), Model 70:20:10 telah banyak diterapkan pada rumah sakit-rumah sakit di negara-negara Eropa dan Amerika yang menjadi basis dari strategi pembelajaran organisasi dalam meningkatkan jumlah rumah sakit besar di beberapa tahun terakhir, termasuk rumah sakit yang memiliki merk ternama seperti Sun Microsystems, Goldman Sachs, Nokia, Maersk, Mars, Bank of America, Coca Cola, Microsoft, HP, Wal-Mart, Reuters, American Express, Caterpillar dan banyak lagi. Berbeda dengan di Indonesia, penerapan model 70:20:10 lebih banyak di terapkan di organisasi pemerintah khususnya lembaga-lembaga pelatihan. Penerapan model 70:20:10 dalam pendidikan dan pelatihan perawat adalah meningkatnya kompetensi pada aspek pengetahuan, keterampilan dan sikap perawat sehingga dapat meningkatkan pelayanan kesehatan kepada pasien rumah sakit baik yang rawat inap maupun rawat jalan. Dengan adanya pelayanan yang maksimal maka visi dan misi rumah sakit toto kabila akan tercapai. Demikian pula halnya dengan pencapaian visi dan misi kesehatan nasional akan terwujud.

MASTER MODERN MEDICINE! Introducing the Landmark Twentieth Edition of the Global Icon of Internal Medicine The definitive guide to internal medicine is more essential than ever with the latest in disease mechanisms, updated clinical trial results and recommended guidelines, state-of-the-art radiographic images, therapeutic approaches and specific treatments, hundreds of demonstrative full-color drawings, and practical clinical decision trees and algorithms A Doody's Core Title for 2019! Recognized by healthcare professionals worldwide as the leading authority on applied

pathophysiology and clinical medicine, Harrison's Principles of Internal Medicine gives you the informational foundation you need to provide the best patient care possible. Essential for practice and education, the landmark 20th Edition features: Thoroughly revised content—covering the many new breakthroughs and advances in clinical medicine that have occurred since the last edition of Harrison's. Chapters on acute and chronic hepatitis, management of diabetes, immune-based therapies in cancer, multiple sclerosis, cardiovascular disease, HIV, and many more, deliver the very latest information on disease mechanisms, diagnostic options, and the specific treatment guidance you need to provide optimal patient care. State-of-the-art coverage of disease mechanisms: Harrison's focuses on pathophysiology with rigor, and with the goal of linking disease mechanisms to treatments. Improved understanding of how diseases develop and progress not only promotes better decision-making and higher value care, but also makes for fascinating reading and improved retention. Harrison's summarizes important new basic science developments, such as the role of mitochondria in programmed and necrotic cell death, the immune system's role in cancer development and treatment, the impact of telomere shortening in the aging and disease processes, and the role of the microbiome in health and disease. Understanding the role of inflammation in cardiovascular disease, the precise mechanisms of immune deficiency in HIV/AIDS, prions and misfolded proteins in neurodegenerative diseases, and obesity as a predisposition to diabetes are just a few examples of how this edition provides essential pathophysiology information for health professionals. All-new sections covering a wide range of new and emerging areas of vital interest to all healthcare professionals. New sections include: Sex and Gender-based Issues in Medicine; Obesity, Diabetes Mellitus, and Metabolic Syndrome; and Consultative Medicine— Plus, a new Part covering cutting-edge topics in research and clinical medicine includes great new chapters on the role of Epigenetics in Health and Disease, Behavioral Strategies to Improve Health, Genomics and Infectious Diseases, Emerging Neuro-Therapeutic Technologies, and Telomere Function in Health and Disease, and Network System Medicine. Important and timely new chapters—such as Promoting Good Health, LGBT Health, Systems of Healthcare, Approach to Medical Consultation, Pharmacogenomics, Antimicrobial Resistance, Worldwide Changes in Patterns of Infectious Diseases, Neuromyelitis Optica, and more—offer the very latest, definitive perspectives on must-know topics in medical education and practice. Updated clinical guidelines, expert opinions, and treatment approaches from renowned editors and authors contribute to the accuracy and immediacy of the text material and present a clear blueprint for optimizing patient

Achieving, maintaining and improving accuracy, timeliness and reliability are major challenges for health laboratories. Countries worldwide committed themselves to build national capacities for the

detection of, and response to, public health events of international concern when they decided to engage in the International Health Regulations implementation process. Only sound management of quality in health laboratories will enable countries to produce test results that the international community will trust in cases of international emergency. This handbook was developed through collaboration between the WHO Lyon Office for National Epidemic Preparedness and Response, the United States of America Centers for Disease Control and Prevention (CDC) Division of Laboratory Systems, and the Clinical and Laboratory Standards Institute (CLSI). It is based on training sessions and modules provided by the CDC and WHO in more than 25 countries, and on guidelines for implementation of ISO 15189 in diagnostic laboratories, developed by CLSI. This handbook is intended to provide a comprehensive reference on Laboratory Quality Management System for all stakeholders in health laboratory processes, from management, to administration, to bench-work laboratorians. This handbook covers topics that are essential for quality management of a public health or clinical laboratory. They are based on both ISO 15189 and CLSI GP26-A3 documents. Each topic is discussed in a separate chapter. The chapters follow the framework developed by CLSI and are organized as the "12 Quality System Essentials".

[Hospital Law](#) World Bank Publications

This guide provides a step-by-step explanation of how to use the Safe Hospitals Checklist, and how the evaluation can be used to obtain a rating of the structural and nonstructural safety, and the emergency and disaster management capacity, of the hospital. The results of the evaluation enable hospital's own safety index to be calculated. The Hospital Safety Index tool may be applied to individual hospitals or to many hospitals in a public or private hospital network, or in an administrative or geographical area. In some countries, such as Moldova, all government hospitals have been evaluated using the Hospital Safety Index. In this respect, the Hospital Safety Index provides a useful method of comparing the relative safety of hospitals across a country or region, showing which hospitals need investment of resources to improve the functioning of the health system. The purpose of this Guide for Evaluators is to provide guidance to evaluators on applying the checklist, rating a hospital's safety and calculating the hospital's safety index. The evaluation will facilitate the determination of the hospital's capacity to continue providing services following an adverse event, and will guide the actions necessary to increase the hospital's safety and preparedness for response and recovery in case of emergencies and disasters. Throughout this document, the terms "safe" or "safety" cover structural and nonstructural safety and the emergency and disaster management capacity of the hospital. The Hospital Safety Index is a tool that is used to assess hospitals' safety and vulnerabilities, make recommendations on necessary actions, and promote low-cost/high-impact measures for improving safety and strengthening emergency preparedness. The evaluation provides direction on how to optimize the available resources to increase safety and ensure the functioning of hospitals in emergencies and disasters. The results of the evaluation will assist hospital managers and staff, as well as health system managers and decision-makers in other relevant ministries or organizations in prioritizing and allocating limited resources to strengthen the safety of hospitals in a complex network of health services. It is a tool to guide national authorities and international cooperation partners in their planning and resource allocation to support improvement of hospital safety and delivery of health services after emergencies and disasters. Over the past three years, the expert advice of policy-makers and practitioners from disciplines, such as engineering, architecture and emergency medicine, has been compiled, reviewed and incorporated into this second edition of the Guide. Global and regional workshops and virtual consultations have enabled technical and policy experts to contribute to the revision of Hospital Safety Index until consensus was reached on the content for its publication and distribution. Further comments and observations are certain to arise as the Hospital Safety Index continues to be applied across the world and these experiences will enable us to improve future editions. The rapid diagnostic application of the Hospital Safety Index provides, as a comparison, an out-of-focus snapshot of a hospital: it shows enough of the basic features to allow evaluators to confirm or disprove the presence of genuine risks to the safety of the hospital, and the hospital's level of preparedness for the emergencies and disasters to which it will be expected to provide health services in the emergency response. The Hospital Safety Index also takes into account the hospital's environment and the health services network to which it belongs. This second version of the second edition was released in December 2016.

In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (Ue) and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to

assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

Beranjak dari kisah pemanggilan Abraham yang keluar dari zona nyamannya ke tempat yang nanti ditunjukkan oleh Tuhan dan memperhatikan akhir kisahnya, mengajak kita untuk berefleksi apa sesungguhnya yang dimaksud dengan menjadi berkat. Menjadi berkat tentu berbeda dengan hanya menjadi saluran. Menjadi berkat, siap untuk selalu berbagi dengan apa yang ada pada diri kita tanpa harus merasakan kekhawatiran tentang hari esok. Dengan memandang sama kebutuhan orang lain dengan diri sendiri dan siap untuk berbagi, di situlah kita sudah menjadi berkat. Dengan kata lain untuk menjadi berkat tidak perlu menunggu. Sekarang juga, dalam kondisi apa pun kita terpanggil untuk memberkati orang lain. Kendala apa yang sering kali kita temui ketika mau memberkati orang lain? Alasan klasik adalah kita akan menjadi berkat ketika sudah diberkati. Hidup kita yang telah diselamatkan oleh Tuhan Yesus adalah berkat yang tidak tertandingi. Karena itu tidak ada alasan bagi setiap orang percaya tidak menjadi berkat dalam hidupnya apa pun kondisi yang sedang dihadapi. Selama empat tahun GKPb telah berupaya merefleksikan dirinya dalam rangka mewujudkan tema pelayanan "Menjadi Gereja yang Memberkati" melalui berbagai bentuk kegiatan pelayanan di jemaat-jemaat, lembaga-lembaga dan departemen-departemen. Demikian juga keterlibatan gereja dalam gerakan oikumene serta berbagai organisasi kemasyarakatan. Peristiwa yang sedang melanda dunia, 'Covid-19' mengajak kita untuk lebih merenung akan arti dan makna hidup ini. Bahwa dalam sekejap mata segala aktivitas dunia dalam kehidupan ini dapat terhenti olehnya. GKPb bersama gereja-gereja lainnya baik yang ada di Bali, Indonesia, maupun internasional berupaya untuk turut ambil bagian dalam bencana ini. Mengikuti dan melaksanakan dengan ketaatan penuh kepada Tuhan akan apa yang menjadi arahan dan ketentuan pemerintah dan upaya memutuskan mata rantai penyebaran Covid-19. Terlepas dari berbagai upaya yang ditempuh dalam penanganan Covid-19 ini, GKPb terpanggil untuk mendampingi setiap warga dalam pertumbuhan iman mereka. Kemandirian dan kedewasaan iman bisa dikatakan dipaksa untuk tumbuh di setiap keluarga-keluarga. Adanya pembatasan pertemuan sosial dan fisik, tidak menjadi kendala relasi warga dengan Tuhan. Kepala keluarga menjadi imam dan kehidupan kerohanian anggota keluarga. Di setiap rumah tangga terbangun mezbah keluarga, terdengar puji-pujian penyembahan dan firman Tuhan dibagikan. Demikian juga keterikatan di antara keluarga semakin dapat dirasakan, yang mungkin sebelumnya masih dirasa kurang. Dalam kebersamaan memutuskan rantai penyebaran Covid-19, di jemaat-jemaat segera membentuk satgas, demikian juga secara sinodal. Sungguh sangat mengharukan di antara jemaat-jemaat telah saling memberkati. Demikian juga yang tidak terjangkau oleh satgas jemaat-jemaat, satgas sinode berusaha menjangkaunya. Inilah wujud nyata "Gereja yang Memberkati." Demikian pula tercipta pasar online dalam skala terbatas. Kesulitan warga jemaat dalam memasarkan hasil kebun, atas inisiatif pendeta dan vikaris membantu mereka menciptakan pasar online dan ini sungguh sangat membantu. Masih banyak lagi contoh-contoh atau aksi nyata yang dilakukan GKPb dalam mewujudkan tema "Menjadi Gereja yang Memberkati." Dalam tulisan (bunga rampai ini) pembaca akan dihantar untuk mengenal cara pandang dan gerak GKPb "Menjadi Gereja yang Memberkati."

THE UPDATED DEFINITIVE REFERENCE ON MEDICAL AND DENTAL OFFICE DESIGN Medical and Dental Space Planning is an indispensable guide to the myriad of details that make a medical or dental practice efficient and productive. The unique needs of more than thirty specialties, as well as primary care, are explained in the context of new technology and the many regulatory and compliance issues influencing design. Concepts are also presented for ambulatory surgical centers, diagnostic imaging, clinical laboratories, breast care clinics, endoscopy centers, community health centers, radiation oncology, and single-specialty and multispecialty group practices and clinics. A thorough review of the latest dental technology and many creative space plans and design ideas for each dental specialty will be of interest to both dentists and design professionals. Important topics

like infection control are top of mind, influencing every aspect of dental office design. An "inside look" at what goes on in each specialist's office will familiarize readers with medical and dental procedures, how they are executed, and the types of equipment used. Technology has radically impacted medical and dental practice: digital radiography, electronic health records, mobile health devices, point-of-care diagnostic testing, digital diagnostic instrumentation, CAD/CAM systems for digital dental impressions and milling of restorations in the dentist's office, portable handheld X-ray, and 3D cone beam computed tomography for dentists all have major implications for facility design. The influence of the Affordable Care Act is transforming primary care from volume-based to value-based, which has an impact on the design of facilities, resulting in team collaboration spaces, larger consultative examination/assessment rooms, and accommodation for multidisciplinary practitioners who proactively manage patient care, often in a patient-centered medical home context. The wealth of information in this book is organized to make it easy to use and practical. Program tables accompany each medical and dental specialty to help the designer compute the number and sizes of required rooms and total square footage for each practice. This handy reference can be used during interviews for a "reality check" on a client's program or during space planning. Other features, for example, help untangle the web of compliance and code issues governing office-based surgery. Illustrated with more than 600 photographs and drawings, Medical and Dental Space Planning is an essential tool for interior designers and architects as well as dentists, physicians, and practice management consultants.
