They came from diverse social, educational, and cultural backgrounds, but engagement with Greek and Roman antiquity was decisive in shaping their war poetry. This volume explores how, when, and why classical materials were so influential in these poets' work.

**Sex and the Nose** Houghton Mifflin Harcourt

The focus of this volume is on the aesthetics, semantics and function of materials in Roman antiquity between the 2nd century B.C. and the 2nd century A.D. It includes contributions on both architectural spaces (and their material design) and objects - types of 'artefacts' that differ greatly in the way they were used, perceived and loaded with cultural significance. With respect to architecture, the analysis of material aesthetics leads to a new understanding of the performance, imitation and transformation of surfaces, including the social meaning of such strategies. In the case of objects, surface treatments are equally important. However, object form (a specific design category), which can enter into tension with materiality, comes into particular focus. Only when materials are shaped do their various qualities emerge, and these qualities are, to a greater or lesser extent, transferred to objects. With a focus primarily on Roman Italy, the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world.

Mund, Lippen, Zunge und Zähne - Sprache, Schmerz und Schrei - Essen, Schlingen, Speien und Spucken - Lust und Leidenschaft: Die Mundhöhle ist im wahrsten Sinne des Wortes eine äußerst reizvolle Körperzone. Ihrer Erkundung haben sich dabei nicht nur Wissenschaft und Medizin gewidmet, Gleiches gilt auch für die Kunst- und Kulturgeschichte - von der Antike bis zur Gegenwart. Diesen breit gefächerten motivgeschichtlichen Pfad verfolgt das Kunstmuseum Wolfsburg im Herbst 2020 erstmals in einer umfassenden Ausstellung rund um den Mund. Der begleitende Bildband

bietet mit seinen anschaulichen Essays nicht nur inhaltliche Vertiefungsebenen an, sondern reicht weit über die Ausstellung hinaus. Hier wird der Mund mit seinen Fähigkeiten auch im Bereich der Filmgeschichte, Ethnologie, Literaturwissenschaften und Architektur unter die Lupe genommen.

This volume collects the most important writings by Mark Twain in which he used biblical settings, themes, and figures. Featuring Twain's singular portrayals of God, Adam, Eve, Satan, Methuselah, Shem, St. Peter, and others, the writings stand among Twain's most imaginative expressions of his views on human nature and humankind's relation to the Creator and the universe. Composed over four decades (1871-1910), the writings range from farce to fantasy to satire, each one bearing the mark of Twain's unmistakable wit and insight. Among the many delights in store for readers are Adam and Eve's divergent accounts of their domestic troubles; Methuselah's discussion of an ancient version of baseball, complete with a parody of baseball jargon; Shem's hand-wringing account of how material shortages and labor troubles were hampering the progress of the ark his father, Noah, was building; a description of the disruptive actions of the fire-and-brimstone evangelist Sam Jones upon arriving in heaven; Captain Stormfield's revelations of what heaven is really like; Satan's musings on our puerile concepts of the afterlife; and Twain's advice on how to dress and tip properly in heaven. Twain's humor, however, is never gratuitous. As readers laugh their way through this volume, they will find ample evidence of Twain's concerns about scriptural fallacies and inconsistencies, the Bible's rather flat portrayal of important characters, and our limited notions about the nature and meaning of our own--and God's--existence. Many of the pieces in this collection, even the most lighthearted, might still be considered controversial; of some of the darker pieces, Twain himself acknowledged that they would be heretical in any age. Moreover, these writings are valuable cultural artifacts of a time when, across the Western world, fundamental religious beliefs were being called into question by the precepts of Darwinism and the rapid advances of science and technology. Several of this volume's selections are previously unpublished; others, like *Letters from the Earth*, are classics. Virtually all have been newly edited to reflect as closely as possible Twain's final intentions for their form and content. For serious Twain devotees, editors Howard G. Baetzhold and Joseph B. McCullough have supplied an abundance of background material on the writings, including details on the history of their composition, publication, and relevance to the Twain canon.

A page-turning novel that is also an exploration of the great philosophical concepts of Western thought, Jostein Gaarder's *Sophie's World* has fired the imagination of readers all over the world, with more than twenty million copies in print. One day fourteen-year-old Sophie Amundsen comes home from school to find in her mailbox two notes, with one question on each: "Who are you?" and "Where does the world come from?" From that irresistible beginning, Sophie becomes obsessed with questions that take her far beyond what she knows of her Norwegian village. Through those letters, she enrolls in a kind of correspondence course, covering Socrates to Sartre, with a mysterious philosopher, while receiving letters addressed to another girl. Who is Hilde? And why does her mail keep turning up? To unravel this riddle, Sophie must use the philosophy she is learning—but the truth turns out to be far more complicated than she could have imagined.

Physiognomy and ekphrasis are two of the most important modes of description in antiquity and represent the necessary precursors of scientific description. The primary way of divining the characteristics and fate of an individual, whether inborn or acquired, was to observe the patient's external characteristics and behaviour. This volume focuses initially on two types of descriptive literature in Mesopotamia: physiognomic omens and what we might call ekphrastic description. These modalities are traced through ancient India, Ugaritic and the Hebrew Bible, before arriving at the physiognomic features of famous historical figures such as Themistocles, Socrates or Augustus in the Graeco-Roman world, where physiognomic discussions become intertwined with typological analyses of human characters. The Arabic compendial culture absorbed and remade these different physiognomic and ekphrastic traditions, incorporating both Mesopotamian links between physiognomy and medicine and the interest in characterological 'types' that had emerged in the Hellenistic period. This volume offer the first wide-ranging picture of these modalities of description in antiquity.
