Book #19 in the USA Today bestselling Red Stone Security series. Genre: romantic suspense Forensic Evidence Katie Reus

The last half century has seen an explosion in the study of late antiquity, which has characterised the period between the third and seventh centuries not as one of catastrophic collapse and 'decline and fall', but rather as one of dynamic and positive transformation . Yet research on cities in this period has provoked challenges to this positive picture of late antiquity. This study surveys the nature of this debate, examining problems associated with the sources historians use to examine late antique urbanism, and the discourses and methodological approaches they have constructed from them. It aims to set out the difficulties and opportunities presented by the study of cities in late antiquity in terms of transformation s of politics, the economy, and religion, and to show that this period witnessed very real upheaval and dislocation alongside continuity and innovation in cities around the Mediterranean .
