This text provides a detailed account of current approaches to the education of teachers of second languages. The paperback edition provides a detailed account of current approaches to the education of teachers of second languages. It offers valuable

ideas on the observation and supervision of classrooms, on self-evaluation by teachers, and on teaching itself. Its emphasis reflects the shift in orientation from teacher training to teacher education, in which teachers are involved in developing their own theories of teaching, understanding the nature of teacher decision making, and developing strategies for critical self-evaluation. The book is aimed at teachers, teacher educators, and workshop facilitators involved both in pre-service and in-service education of teachers of second and foreign languages. Effective schools or improving schools are fashionable terms in the rhetoric of recent education movements, yet the heart of these movements is often more to do with teaching quality than with school practice. This book takes a holistic view of teacher

development, examining the contexts and conditions of teaching: school leadership and culture; teachers' lives and histories; change; teacher learning, competence and expertise; and the moral purposes of teaching. Day looks at the conditions under which teacher development may be enhanced, and brings together research and other information, from the UK and overseas.

This comprehensive collection, comprising both theoretical and practical contributions, is unique in its focus on language learning strategy instruction (LLSI). The chapters, written by leading international experts, embrace both sociolinguistic and psycholinguistic perspectives. The issues presented include different models of strategy instruction and how they can be tailored according to context and the learners' age and attainment level. The collection will be an important resource for researchers in the field, both for its critical perspectives and its guidance on collaborating with teachers to design interventions to implement strategy instruction. It also identifies key areas for research, including the teaching of less studied groups of strategies such as grammar and affective strategies. The book will prove equally valuable to language teachers through the provision of detailed teaching materials and tasks. Those engaged in professional development, whether pre- or in-service teacher education, will find a wealth of concrete ideas for sessions, courses and assignments.

Together, the essays address a wide array of topics, including early childhood English education, uses of information technology to teach English, and teaching English to Chinese minority students. This work is essential reading for those who want to expand their understanding of English literacy education in China.
