Press Ltd

The discovery of an abandoned baby seal on the desolate Norfolk coastline of England in the 1930's brings Rowena, an orphaned girl, together with Miriam, her reclusive aunt, when the seal's playfulness and pup antics break down barriers in their new relationship. Then Rowena turns their small cottage into a

refuge for an assorted menagerie of wildlife, attracting the attention of a Canadian naturalist who becomes interested in Aunt Miriam as well. *The Age of Discovery* Last Viking
If Grumpy the dwarf were a Swedish elf he'd star in this charming illustrated midsummer book.

Last Viking Returns Pavilion Children's Books

The new installment in the popular Big Book series connects young readers from around the world by emphasizing that we all belong to the same planet Earth. The Big Book of Belonging is a timely celebration of all the ways that humans are connected to life on planet Earth. With children at the heart of every beautifully illustrated spread, this book draws parallels between the way humans, plants, and animals live and behave. We all breathe the same air and take warmth from the same sun, we grow, we adapt to the seasons, and we live together in family groups. Readers will be fascinated to learn that instead of

using words to communicate, fava beans send chemical messages through their roots, Caribbean reef squid send warnings of danger and even declarations of love by changing color, and that adorable big-eyed primates called tarsiers make calls to one another over the noise of the rainforest that are too high-pitched for predators to hear. By putting children at the heart of the book's concept, author Yuval Zommer unites readers of the Big Book series from all corners of the world under one banner—of belonging to planet Earth. The book's gentle message of caring for nature will inspire readers of all ages and encourage a new generation of environmentalists to flourish.

The Roadmap to Literacy Renewal of Literacy Edition Floris Books

Hands-on modelling is key skill for children, leading to the development of their mind and intelligence through a rich complexity of sense experiences. Arthur and Elizabeth Auer make a plea to parents and teachers alike to 'let children work with their hands'. This comprehensive, heavily illustrated book demonstrates a multitude of modelling projects for different ages using different materials including clay, beeswax, plasticine, dough, sand and snow.

D'Aulaires' Book of Norse Myths New York Review of Books

The move from kindergarten to school is a significant one. This book, a companion to 'You're Not the Boss of Me: Understanding the Six/Seven-Year-Old Transformation', is a collection of

essential research and resources to help educators prepare children for starting school. Experienced teachers, doctors and therapists give guidance in the nature and needs of the child between six and seven, how to observe children for signs of readiness, and creating and carrying a healthy transition from kindergarten to grade school. It includes four different sample observation forms, to help schools to develop their own readiness observation procedures.

When the Whales Walked Kelpies

This craft book for children shows how to make a waterwheel, paddle-steamer, propeller plane, parachute, windmill, simple pendulum clock, spinning tops, a little hot-air carousel, a hot-air balloon and lots more.

In this concise book Charles Kovacs explores the structure of our calendar year and looks in detail at the background to each Christian festival, including lesser-known ones such as St. John's Tide and Michaelmas. This book is an inspiring insight into why we worship and celebrate at particular times and the deep spiritual significance found in the Christian year.

Grow: Secrets of Our DNA Floris Books

A retelling of the Norse sagas about Odin, Freya, Thor, Loki, and the other gods and goddesses who lived in Asgard before the dawn of history.

Learning about the World Through Modeling Waldorf Education Resources

This is a resource book for teaching about animals in comparison to human beings. It is recommended for Classes 4 and 5 (age 9 to 11) in the Steiner-Waldorf curriculum. Charles Kovacs taught in Edinburgh so there is a Scottish flavour to the animals discussed in the first half of the book, including seals, red deer and eagles. In the later chapters, he covers elephants, horses and bears.

Whispey Floris Books

"The secrets of DNA, unpacked engagingly and accessibly." --Kirkus Reviews (starred review) Earth is full of life! All living things grow--plants, animals, and human beings. The way they grow, whether it be fast or slow,

enormous or not so big, helps them survive. But growing is also about change: when people grow, they become more complicated and able to do more things, and they don't have to think about it, because bodies come with instructions, or DNA. With simple, engaging language and expressive, child-friendly illustrations, Nicola Davies and Emily Sutton, the award-winning creators of *Tiny Creatures: The World of Microbes* and *Many: The Diversity of Life on Earth*, provide an introduction to genetic code and how it relates to families to make us all both wonderfully unique and wholly connected to every living thing on Earth.

thought it oh so grand. All day he combed and curled and brushed and would not work the land. Then Brother Wind decided to put him to the test; but all ends well... now read the book and it will tell the rest! (Ages 3 - 8 years)

Pico the Gnome Capstone Classroom

When the Whales Walked is an exquisitely illustrated exploration of the most incredible events in evolution, through 13 case studies. Discover a world where whales once walked, crocodiles were warm-blooded, and rhinos ruled the Earth!

First Grade Readiness National Geographic Books

The meaning of some of the world's great myths and legends springs to life in this collection of stories, retold here for children. Through the epic

adventures of colorful characters--from kings and beggars to gods and demons--the reader may glimpse the ancient wisdom of early humankind. Spanning the centuries from Atlantis to the civilizations of India, Persia, Babylonia, and Egypt, the author portrays human development, from primitive hunters to builders of magnificent cities and the great pyramids. Buddha, Krishna, Rama, Zarathustra, Gilgamesh, Isis, and Osiris are just a few of the lively participants in the unfolding historical narrative.

Pippa and Pelle wake up on a sunny

summer's day looking for an adventure. Exploring the meadow, they meet new animal friends and learn about their homes--the snail in his shell, the frog in his pond, and the beetle in his home made of leaves. However, as night falls they are grateful to return to their warm, cozy home in the strawberry patch...

Daniela Drescher's distinctive style brings life to this colorful board book--perfect for little hands. Young children will love spending a day in the countryside with Pippa and Pelle.
