 Learn to provide personal care and professional support in a variety of health care settings! Sorrentino's Canadian Textbook for the Support Worker, 5th Edition helps you build the skills you need to succeed as a PSW (personal support worker). Illustrated, step-by-step guidelines to 93 procedures show how to perform your role safely and effectively. New to this edition are more case studies plus coverage of the latest issues relating to supportive care in long-term care facilities, hospitals, and home care. Written by Sheila Sorrentino, Leighann Remmert, and Canadian educator Mary

Wilk, this text is known for its easy-to-understand approach, superb photographs, and comprehensive coverage. It's no wonder that Sorrentino's is the #1 book used by students in support worker programs across Canada. - NEW! Thoroughly updated content addresses top-of-mind issues such as the use and misuse of social media, bullying and abuse, the concept of professionalism, working on interprofessional teams in health care settings, shiftwork, and more. - NEW! Enhanced illustrations reflect Canada's diversity and depict new content and important procedures. - NEW! Updated chapter organization groups together body systems and anatomy chapters for easier accessibility. - NEW! Additional coverage of the Personal Support Workers' scope of practice includes topics such as what to do when

asked to work outside of your scope of practice, consequences of not following the scope of practice, and more. - NEW! More case studies and procedures are added to address the PSW's expanding scope of practice. - NEW! Greater coverage of the roles played by other health team professionals describes how this impacts PSWs working on these teams, including topics such as delegation, professional conduct, and more. **Textbook on the Indian Penal Code** John Wiley & Sons  
 Mechanical kinetics constitutes one of the basic subjects for Metallurgical Engineering. This well-written book presents the subject of kinetics of metallurgical processes in a compressive fashion. Organized into 14 chapters, the book begins with an introduction of the broad basic concepts. It then discusses the

kinetics of homogeneous and heterogeneous chemical reactions with some real-life examples from the metallurgical field. The book adequately covers the concepts of diffusion, convective mass transfer and mixing in fluids, as well as mass transfer in fluids adjacent to a solid surface. Several important processes in metallurgical and materials engineering involve reactions of porous solids with gases. The book discusses this with the help of two important reactions, namely, reduction of iron ores and gasification of carbon. It also deals with mass transfer among two fields and presents the kinetics of electrochemical reactions and phase transformation in a simple manner. The book also contains plenty of numerical worked-out examples and problems, some of which involve computer programs. The Appendix gives some important data useful for solving problems in kinetics. The book is designed for one-semester course for undergraduate students of metallurgical discipline.

2014 BMA Medical Book Awards Highly Commended in Anaesthesia category! Apply the latest scientific and clinical advances with Wall & Melzack's Textbook of Pain, 6th Edition. Drs. Stephen McMahon, Martin Koltzenburg, Irene Tracey, and Dennis C. Turk, along with more than 125 other leading authorities, present all of the latest knowledge about the genetics, neurophysiology, psychology, and assessment of every type of pain syndrome. They also provide practical guidance on the full range of today's pharmacologic, interventional, electrostimulative, physiotherapeutic, and psychological management options. Benefit from the international, multidisciplinary knowledge and experience of a "who's who" of international authorities in pain medicine, neurology, neurosurgery, neuroscience, psychiatry, psychology, physical medicine and rehabilitation, palliative medicine, and other relevant fields. Access the complete contents online anytime, anywhere at [www.expertconsult.com](http://www.expertconsult.com). Translate scientific findings into clinical practice with updates on the genetics of pain, new pharmacologic and treatment information, and much more. Easily visualize important scientific concepts with a high-quality illustration program, now in full color throughout. Choose the safest and most effective management methods with expanded coverage of anesthetic techniques. Stay abreast of the latest global developments regarding opioid

induced hyperalgesia, addiction and substance abuse, neuromodulation and pain management, identification of specific targets for molecular pain, and other hot topics.

- Aligned as per the competency based curriculum; includes a competency mapper to help identify relevant competency coverage throughout the text.
- Well-illustrated text, in sync with DOAP model as adopted in the new curriculum.
- Written in simple language with explanations to make it student friendly.
- Decision making algorithms for better understanding, mnemonics to help in retention.
- Includes numerous boxes, figures, tables to aid in quick learning.
- Contains recent advances in pediatrics.
- Special emphasis laid on behavioral disorders and psychiatric problems in children.
- Includes detailed coverage of emergencies in children; modern diagnostic tests provides an up-to-date content in the field of Pediatrics and Neonatology.
- Will aid in preparation for the forthcoming NEXT exam. The book has been written with the intent of help students remember and recollect medical facts easily. With the ever-expanding field of medicine, the students are facing an increased burden to compete. The book through its approach and simple construct helps ease this burden in the understanding of pediatrics. It follows a point-wise simple format that is easy to read and comprehend. Liberal use of mnemonics and clues are used throughout to make learning more impactful. One should be aware of any adverse events following administration of drugs or vaccines or else it may be missed. The temporal criteria for adverse events following immunization is discussed in detail so that the adverse events can be identified.

The field of movement disorders is one of the key subspecialty areas in clinical neurology, and understanding of the relevant conditions can often be difficult. The scope of this area requires a wide knowledge base, and clinicians might, in the course of a single clinic, need to recall the differential of Huntington's-like disorders, the gene implicated in dopa-responsive dystonia, and compare a case of suspected neuroacanthocytosis with a 'classical' case. Part of the accessible Oxford Textbooks in Clinical Neurology series, this volume covers the basic science and clinical concepts underlying the movement disorders, as well as the diagnosis and treatment of individual hypokinetic and hyperkinetic movement disorders. Specifically written to aid understanding and treatment of a wide range of movement disorders, this textbook includes a useful section covering miscellaneous causes of disordered movement, which are routinely encountered by neurologists. It is also supplemented with illustrative video clips that can be accessed through the concurrent online edition. Although firmly rooted in evidence-based management approaches, the authors included their own top tips and experience on the management of difficult cases where no current guidance exists, engaging the reader and providing a better feel for handling real-world clinical problems. The Oxford Textbook of Movement Disorders is an indispensable reference for neurologists and senior trainees in neurology, as well as any physicians advising people with movement disorders.

The Oxford Textbook of Neurohaematology is a single source of knowledge on the diverse neurological conditions associated with malignant and classical haematological diseases. The book covers the full range of haematological diseases, both malignant and classical, that impact the central, peripheral, and autonomic nervous systems. The book is divided into three sections. In the first section, neurological conditions associated with malignant haematological diseases are presented. This section begins with chapters on primary haematological malignancies of the nervous system including primary central nervous system lymphomas, vitreoretinal lymphoma, and other rare primary malignancies such as Hodgkin disease and lymphoproliferative disorders. Next, a chapter on histiocytic tumours of the central nervous system presents the neurological conditions associated with the Langerhans and non-Langerhans histiocytoses. This is followed by chapters covering the neurological complications of systemic myeloid and lymphoid malignancies. The second section of the book covers neurological complications of the treatments used in the management of haematological malignancies such as chemotherapy, radiation, and immunotherapy including chimeric antigen receptor T cells. The third and final section of the book features chapters on the neurological complications associated with classical haematological diseases including disorders of red blood cells (e.g.,

sickle cell anaemia), disorders of platelets and coagulation (e.g., immune thrombocytopenia), and disorders of white blood cells (e.g., hyperviscosity syndrome). Edited by leading authorities in the field, this book will serve as a useful resource for neurologists, haematologists, and oncologists, as well as for subspecialists and allied health professionals involved in the management of haematological diseases and their neurological manifestations.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control. This is the only authorized hardcover edition in the US. In the book that People magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

#### *Oxford Textbook of Oncology* S. Chand Publishing

This textbook provides current information on best practice in multidisciplinary cancer care. Divided into six sections, the contributors look at the aetiology of cancer, patient care, population health and the management of specific types of disease. Written and edited by internationally recognised leaders in the field, the new edition of the *Oxford Textbook of Oncology* has been fully revised and updated, taking into consideration the advancements in each of the major therapeutic areas, and representing the multidisciplinary management of cancer. Structured in six sections, the book provides an accessible scientific basis to the key topics of oncology, examining how cancer cells grow and function, as well as discussing the aetiology of cancer, and the general principles governing modern approaches to oncology treatment. The book examines

the challenges presented by the treatment of cancer on a larger scale within population groups, and the importance of recognising and supporting the needs of individual patients, both during and after treatment. A series of disease-oriented, case-based chapters, ranging from acute leukaemia to colon cancer, highlight the various approaches available for managing the cancer patient, including the translational application of cancer science in order to personalise treatment. The advice imparted in these cases has relevance worldwide, and reflects a modern approach to cancer care. The Oxford Textbook of Oncology provides a comprehensive account of the multiple aspects of best practice in the discipline, making it an indispensable resource for oncologists of all grades and subspecialty interests. Review: Each chapter is nicely illustrated with schemes, cartoons and images. The text, although written by top oncologists, is readily understandable for a non-expert. Thus, the textbook will no doubt be appreciated by a broader audience. \* Recent Patents on Anti-Cancer Drug Discovery Vol. 11 Issue No. 4, Alexander Shtil \* I recommend this book highly to all oncology and oncologists in training as a thorough, informative, and readable reference. Every large intuitional library and every oncology library should have it. \* NEJM, 2002 \* This comprehensive textbook of oncology is the first new major textbook on cancer to appear in a decade and is designed for a broad audience of clinicians, oncologists in training, and academics. The coverage is comprehensive...The overall appearance of the book is outstanding. It is a welcome combination of epidemiology, aspects of

basic science, pharmacology and radiation therapy that trainees will find a nice change...should enjoy a wide readership...because of its appealing design and comprehensive approach to oncology. It is the most user-friendly comprehensive text currently available. The pathology, basic science, epidemiology, and radiation therapy sections are all presented with extreme clarity. \* Doody's Journal, 2002 \* A landmark reference...It sets new standards for publishing in oncology offering a ground-breaking innovative approach to the field combined with the quality, accuracy, and intellectual rigour you have come to expect from the world's most prestigious reference publisher. \* Biomedicine and Pharmacotherapy, 2002 \* Under new editorship, the second edition is far more than an updated version of the first...the prose in the Oxford Textbook is exemplary...this textbook is unique among its peers in giving the sense that the authors are addressing the reader personally...an exception level of quality...Respect for the evidence-based medicine is apparent throughout the text...illustrative and anatomical drawing...of remarkable high quality...excellent discussion of doctor-patient communication in relation to genetic counselling, psychological issues, and terminal cancers. \* JAMA, Volume 287, Issue 24, 2002 \* The Oxford Textbook of Oncology covers virtually the entire spectrum of malignant diseases in adults and children. It meets very high editorial and production standards: the organization, illustrations, and eye-pleasing typography are outstanding... I have high praise for this textbook. \* NEJM,

Volume 347, Number 2, 2002 \* Review from previous edition The Oxford Textbook of Oncology is a classic and fresh approach to the field. It is a must for all libraries and all those who like to have a single up-to-date reference book that contains sufficient detail for the clinician in all subspecialties: surgery and chapters are sufficiently detailed to provide a reference for trainees in the field. \* Oncology, Volume 63, 2002 \* The Oxford Textbook of Oncology is what it is meant to be: a textbook with comprehensive information of the actual status of oncology... an indispensable and attractive source of information. \* Professor Jaak Ph. Janssens, European Journal of Cancer Prevention \* This volume provides a comprehensive account of the multiple aspects of best practice in the discipline, making it an indispensable resource for oncologists of all grades and subspecialty interests. \* Anticancer Research Vol. 36 (2016) \* An outstanding gift to the international scientific community... The new textbook is an excellent demonstration of this multifaceted and astonishingly variable problem, as well as of the latest achievements in its understanding and practical management. \* Alexander A. Shtil, Recent Patents on Anticancer Drug Discovery \* I would recommend anyone considering buying an oncology textbook, and particularly those who work in oncology support services, to consider this textbook as it is well set out, easy to read, easy to comprehend, and covers all of the important aspects of modern day oncology. \* Dr Andrew Davies, Consultant in Palliative Medicine, Royal Surrey County Hospital; Review for Supportive Care in Cancer \*
