Disordered eating, negative body image, and problems with
weight have become an epidemic—and research shows that
traditional treatments are not always effective. This professional
resource offers proven-effective interventions using mindfulness
and acceptance for treating clients with disordered eating, body
image, or weight issues—and for whom other treatments have
failed. Millions of people in the United States suffer from eating
disorders, and dissatisfaction with weight and body type—even in

individuals whose weight is considered normal—is similarly widespread. In addition, more than half of Americans could benefit from healthy weight loss. Unfortunately, not all people with eating disorders or weight concerns respond to traditional therapeutic interventions; many continue to suffer significant symptoms even after treatment. What these clients need is an integrated therapeutic approach that will prove effective in the long run—like the scientifically backed methods in this much-needed clinical guide. Edited by Ann F. Haynos, Jason Lillis, Evan M. Forman, and Meghan L. Butryn; and with contributors including Kay Segal, Debra Safer, and Hugo Alberts; *Mindfulness and Acceptance for Treating Eating Disorders and Weight Concerns* is the first professional resource to incorporate a variety of proven-effective acceptance- and mindfulness-based approaches—such as acceptance and commitment therapy (ACT), dialectical behavior therapy (DBT), and mindfulness-based cognitive therapy (MBCT)—into the treatment of persistent disordered eating, body image issues, and weight problems. With these evidence-based interventions, you'll be ready to help your clients move beyond their problems with disordered eating, body dissatisfaction, and weight management once and for all.

The conservation of cultural heritage is a major commitment for all countries around the world, since it is a complex task and a matter of great responsibility. Amongst other sectors of society, science has a contribution to make to heritage preservation. This book is the result of the international conference Heritage, Weathering and Conservation (HWC2006), held in Madrid, Spain, in 2006. It brought together prominent scientists and professionals from a variety of disciplines who have been active in the field and have raised the profile of heritage preservation. The main aspects addressed at this conference were those related to the causes of decay of cultural materials (stone, ceramics, metals, paintings, mortars, timber, adobes, etc); the

characterization of their properties and the assessment of analytical techniques for their study, with a focus on non-destructive techniques. Many of the studies stress the importance of salt crystallization, atmospheric pollution and biodeterioration and relate these specific factors to decay. A variety of case studies are included, as well as an examination of policies and management. This book will be useful to professionals and scientists working in a variety of fields related to heritage: geologists, geographers, chemists, physicists, biologists, architects, engineers, restorers, historians, archaeologists, policy makers and the general public.

Fires of Invention Adventurer's Wanted

A rhyming, read-aloud book with warm illustrations conveys a comforting, faith-filled message from a Black father and mother to their children who see visual representations of their faith, but question what it means when they don't see their skin color, their physical features, or their gender portrayed. "What about the angels, will they stop and stare, when they see that I may not have their same color hair?" asks the girl. In soothing verse, the father assures his children that everyone looks like Jesus and the

angels by the things they do. As the family walks through their neighborhood, the father points out the beauty in God's creations, from flowers, all unique and different, to all the children in their community "each with skin a different shade." He reminds his children that pictures of faith such as angels were drawn by someone and encourages his children to draw their own pictures so angels look like all of us.

"When the odds were stacked against us, and there have been many times when the great experiment we call America could have and should have failed, did God intervene to save us?" That question, posed by authors Chris and Ted Stewart, is the foundation for this remarkable book. And the examples they cite provide compelling evidence that the hand of Providence has indeed preserved the United States of America on multiple occasions. Skillfully weaving story vignettes with historical explanations, they examine seven instances that illustrate God's protecting care. Never, at any of these critical junctures, was a positive outcome certain or even likely. Yet America prevailed. Why?" "No man is perfect," write the authors. "And neither is any nation. Yet, despite our weakness, we are still, as Abraham

Lincoln said, the best nation ever given to man. Despite our faults, this nation is still the last, best hope of earth." In short, God still cares what happens here. This reassuring message is a bright light in a world that longs for such hope.

The dragons that have been kept in sanctuaries want their freedom—and their revenge—and the world's only hope is the reformation of the ancient order of Dragonwatch in this New York Times bestselling first novel of a new sequel series to Fablehaven from author Brandon Mull. In the hidden dragon sanctuary of Wyrmoost, Celebrant the Just, King of the Dragons, plots his revenge. He has long seen the sanctuaries as prisons, and he wants nothing more than to overthrow his captors and return the world to the Age of Dragons, when he and his kind ruled and reigned without borders. The time has come to break free and reclaim his power. No one person is capable of stopping Celebrant and his dragon horde. It will take the ancient order of Dragonwatch to gather again if there is any chance of saving the world from destruction. In ancient times, Dragonwatch was a group of wizards, enchantresses, dragon slayers, and others who originally confined the majority of dragons into sanctuaries. But nearly all of the original Dragonwatch members are gone, and so the wizard Agad reaches out to Grandpa Sorenson for help. As Kendra and Seth confront this new danger, they must draw upon all their skills, talents, and knowledge as only they have the ability to function together as a powerful dragon tamer. Together they must battle against forces with superior supernatural powers and breathtaking magical abilities. How will the epic dragon

showdown end? Will dragons overthrow humans and change the world as we know it?
