Children Above 180 is a small sampling of a special selection of gifted children. Leta Stetter Hollingworth conducts studies about the subjective experience of highly gifted children. Excerpt: "It was in November 1916, shortly after taking appointment as instructor in educational psychology at Teachers College,

Columbia University, that I saw for the first time a child testing above 180 IQ (S-B). I was teaching a course in the psychology of mentally deficient children, and it seemed to me that my class should if possible observe under test conditions one bright child for the sake of contrast."

This detailed account of the Kapella (Russian Court Chapel Choir) examines the influence it exerted on the development of Russian sacred music. The educational importance of the institution has always been overshadowed by the achievements of the St. Petersburg Conservatoire; Dr Dunlop investigates the consequences of the Kapella's monopoly on music publications. The wonderfully rich choral repertoire of the Russian Orthodox Church has, until now, been unavailable to most English-speaking choirs due to the problems of language and accessibility. Two volumes of Russian Court Chapel Choir music, Galuppi to Vorotnikov and Bakhmetev to Lyapunov, are available separately in performing

editions. They are easily accessible sources of nineteenth-century Russian choral pieces by a range of composers, in a variety of styles. Carolyn Dunlop received a postgraduate degree in Russian language from the University of Strathclyde. She was awarded her doctorate in Russian Orthodox Church

Music and Historical Critique provides a definitive collection of Gary Tomlinson's influential studies on critical musicology, with the watchword throughout being history. This collection gathers his most innovative essays and lectures, some of them published here for the first time, along with an introduction outlining the context of the contributions and

commenting on their aims and significance. Music and Historical Critique provides a retrospective view of the author's achievements in bringing to the heart of musicological discourse both deep-seated experiences of the past and meditations on the historian's ways of understanding them.

**Aural Skills Acquisition** SAGE  
Publications

This book is about thinking in music. Music listeners who understand what they hear are thinking in music. Music readers who understand and visualize what they read are thinking in music. This book investigates the various ways musicians acquire those skills through an examination of the latest research in music perception and cognition, music theory, along with centuries of insight

from music theorists, composers, and performers. Aural skills are the focus; the author also works with common problems in both skills teaching and skills acquisition.

The Cambridge History of Western Music Theory is the first comprehensive history of Western music theory to be published in the English language. A collaborative project by leading music theorists and historians, the volume traces the rich panorama of music-theoretical thought from the Ancient Greeks to the present day. Recognizing the variety and complexity of music theory as an historical subject, the volume has been organized within a flexible framework. Some chapters are defined chronologically within a restricted historical domain, whilst others are

defined conceptually and span longer historical periods. Together the thirty-one chapters present a synthetic overview of the fascinating and complex subject that is historical music theory. Richly enhanced with illustrations, graphics, examples and cross-citations as well as being thoroughly indexed and supplemented by comprehensive bibliographies of the most important primary and secondary literature, this book will be an invaluable resource for students and scholars alike.

While Reading may be known today for the Fightin' Phils, it has also been the site of 72 games played by 17 major-league franchises and barnstorming teams since 1874. Among the teams

that have played in these exhibition games are the Philadelphia Phillies, Philadelphia Athletics, Pittsburgh Pirates, New York Giants, and St. Louis Cardinals, along with appearances by baseball greats Babe Ruth, Lou Gehrig, Mike Schmidt, Ernie Banks, and Rogers Hornsby. Reading fans have looked on as both the 1906 Phillies and A's tried to catch a bunny on the field mid-game, cheered for Christy Mathewson's shutouts, sang "Happy Birthday" to Pete Rose, and watched "Shoeless" Joe Jackson hit a home run.
