This book considers whether coercive control (particularly non-physical forms of family violence) should be prohibited by the criminal law. Based on

the premise that traditional understandings of family violence are severely limited, it considers whether the core of family violence is power-based controlling or coercive behavior: attempts by men to psychologically dominate their partners. Such behavior can cause significant psychological, physical and economic

harms to victims and is increasingly recognized as a form of human rights abuse. The book considers the new offences that have been introduced in England and Wales (controlling or coercive behavior), Ireland (controlling behavior) and Scotland (domestic abuse). It invites consideration of three key questions: Do

conventional criminal laws adequately regulate non-physical abuse? Is the criminal law an appropriate mechanism for responding to the coercive control of family members? And if a new and distinctive offence is warranted, what is the optimal form of that offence? This groundbreaking work is essential reading for researchers and practitioners interested in coercive control and the proper role of the criminal law as a mechanism for regulating family violence.

The Law and Special Education Springer Nature  
The book explores a variety of problems connected to philosophy and philosophy of law. It discusses the problem of monism-pluralism in philosophy and philosophy of law, criticizes philosophy of post-positivism and postmodernism, and investigates dialectics as a universal global methodological basis of scientific cognition and philosophy of law. The volume also pays particular attention to

contemporary legal education, offering potential solutions to problems in this field. The book is the result of a range of sociological studies conducted both in Russia and abroad concerning the legal process and legal consciousness.  
*The English Reformation Revisited* Edward Elgar Publishing  
Zen Sand is a classic collection of verses aimed at aiding practitioners of kôan meditation to negotiate the difficult relationship between

insight and language. As such it represents a major contribution to both Western Zen practice and English-language Zen scholarship. In Japan the traditional Rinzai Zen kôan curriculum includes the use of jakugo, or "capping phrases." Once a monk has successfully replied to a kôan, the Zen master orders the search for a classical verse to express the monk's insight into the kôan. Special collections of these jakugo were compiled as handbooks to aid in that search. Until

now, Zen students in the West, lacking this important resource, have been severely limited in carrying out this practice. Zen Sand combines and translates two standard jakugo handbooks and opens the way for incorporating this important tradition fully into Western Zen practice. For the scholar, Zen Sand provides a detailed description of the jakugo practice and its place in the overall kôan curriculum, as well as a brief history of the Zen phrase book. This volume

also contributes to the understanding of East Asian culture in a broader sense.

The present volume is the first systematic reconstruction of the demographic series of the population of Shanghai from the mid-nineteenth

century to 1953. Designed as a reference and source book, it is based on a thorough exploration of all population data and surveys available in published documents and in archival sources. The book focuses mostly on the pre-1949 period and extends to the post-1949 period only in relation to specific topics. Shanghai is probably the only city in China where such a reconstruction is possible over such a long period due to the wealth of sources and its particular administrative history,

especially the existence of two foreign settlements.

School Law for Everyone is the essential textbook and legal guide for teachers, administrators, parents, students, and everyone working with schools. After decades of teaching law to thousands of students, I can tell you with great certainty that if you want to acquire a powerful working knowledge of school law in practice, this is the book you need. From

cover to cover this book is designed to actively engage you in building a strong working knowledge of the law in practice. This book is unique in that it: - Clearly explains even the most complex principles of law in a concise and understandable manner; - Connects essential principles of law to current policies and practices; - Harmonizes complex and contradictory case law into a clear and concise statement of current law; - Provides helpful flowcharts, visual aids,

and summaries; and - Teaches useful practice skills and practice tips for effectively putting legal knowledge into practice in schools. Ten chapters cover the essential areas of school law. Each chapter includes a legal overview; essential questions and answers; practice skills; practice tips; essential points, terms, and cases; a closer look at key aspects of the law; questions for further exploration and discussion; and suggested activities for further learning. The focus

throughout this book is on helping the reader to master essential principles of school law and their application in practice, along with useful practice skills, in an engaging and succinct format.

This book raises awareness about gender perspective in political and legal theories and historical analysis. The impacts of feminist political and legal theories, as well as critical

legal studies, have been embedded in all the papers in different ways and degrees. Differences among feminist political and legal ideas are visible in the different approaches. The ongoing issue of defining gender, for example, is a recurring theme in the texts. Some papers question the binary basis of the gender issue and the notion of gender as such, while others start from the binary dichotomy and attempt to expand the consideration towards a multi-dimensional

understanding of gender identities. The main focus is on a feminist reconsideration of all relevant fields of legal knowledge. The primary aim is to demystify the seemingly neutral character of legal norms and legal knowledge and highlight the power relations at different layers, beginning with male and female legal subjects of Western heredity (in terms of culture, ethnicity, and race), then moving on to different needs and power relations among female

persons of different races and classes, and finally addressing differentiating gender relations and identities beyond the framework of the women-men binary codification, i.e., also taking into consideration the multiple options of intersex, transgender, queering, etc. Taking seriously the issue of the “maleness” of political and legal theories is indeed a challenging and relevant endeavor for legal scholars. The male bias is present not only throughout history but also in the present, given

that our “universal” categories of political and legal thought are still overburdened by unequal power relations. It is also important to open our minds and knowledge production for a gender-sensitive and gender-competent intersectional approach, which would also include various queer-, race- and class-based considerations. These tasks should be of interest not only to critical legal scholars but also all those belonging to mainstream legal and political thought.

**Health Impact Assessment** University of Hawaii Press "Climate-smart agriculture, forestry and fisheries (CSA), contributes to the achievement of sustainable development goals. It integrates the three dimensions of sustainable development (economic, social and environmental) by jointly addressing food security and climate challenges. It is composed of three main pillars: sustainably increasing agricultural productivity and incomes;

adapting and building resilience to climate change; reducing and/or removing greenhouse gases emissions, where possible. The purpose of the sourcebook is to further elaborate the concept of CSA and demonstrate its potential, as well as limitations. It aims to help decision makers at a number of levels (including political administrators and natural resource managers) to understand the different options that are available for planning, policies and investments

and the practices that are suitable for making different agricultural sectors, landscapes and food systems more climate-smart. This sourcebook is a reference tool for planners, practitioners and policy makers working in agriculture, forestry and fisheries at national and subnational levels." -- Back cover.

CREDO. I believe. No other statement is so full of intent and subversion and power. A Credo is a call to arms. It is a declaration. A Credo is the act of an individual pushing back against society, against established stigmas, taboos, values, and norms. A Credo provokes. It desires change. A Credo is an artist or community challenging dogma, and putting oneself on the front line. A Credo is art at risk. A Credo can be a marker of revolution. A Credo, is thus, the most

calculating and simple form of a manifesto. CREDO creates a bridge from the philosophical to the practical, presenting a triad of creative writing manifestos, essays on the craft of writing, and creative writing exercises. CREDO: AN ANTHOLOGY OF MANIFESTOS AND SOURCEBOOKS FOR CREATIVE WRITING is a raw look at what motivates authors today. **The Book of Old Silver: English, American, Foreign** Springer Nature The American Diabetes Association/JDRF Type 1

Diabetes Sourcebook serves as both an evidence-based reference work and consensus report outlining the most critical components of care for individuals with type 1 diabetes throughout their lifespan. The volume serves not only as a comprehensive guide for clinicians, but also reviews the evidence supporting these components of care and provides a perspective on the critical areas of research that are needed to improve our understanding of type 1

diabetes diagnosis and treatment. The volume focuses specifically on the needs of patients with type 1 diabetes and provides clear and detailed guidance on the current standards for the optimal treatment of type 1 diabetes from early childhood to later life. To accomplish the book's editorial goals, Editors-in-Chief, Drs. Anne Peters and Lori Laffel, assembled an editorial steering committee of prominent research physicians, clinicians, and educators to develop the topical

coverage. In addition, a Managing Editor was brought on to help the authors write and focus their chapters.

### The Elements of Legal Style Epic

This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and

can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

With Japanese Philosophy: A Sourcebook, readers of English can now access in a single volume the

richness and diversity of Japanese philosophy as it has developed throughout history. Leading scholars in the field have translated selections from the writings of more than a hundred philosophical thinkers from all eras and schools of thought, many of them available in English for the first time. The Sourcebook editors have set out to represent the entire Japanese philosophical tradition—not only the broad spectrum of academic philosophy dating from the

introduction of Western philosophy in the latter part of the nineteenth century, but also the philosophical ideas of major Japanese traditions of Buddhism, Confucianism, and Shinto. The philosophical significance of each tradition is laid out in an extensive overview, and each selection is accompanied by a brief biographical sketch of its author and helpful information on placing the work in its proper context. The bulk of the supporting material, which comprises

nearly a quarter of the volume, is given to original interpretive essays on topics not explicitly covered in other chapters: cultural identity, samurai thought, women philosophers, aesthetics, bioethics. An introductory chapter provides a historical overview of Japanese philosophy and a discussion of the Japanese debate over defining the idea of philosophy, both of which help explain the rationale behind the design of the Sourcebook. An exhaustive glossary of

technical terminology, a chronology of authors, and a thematic index are appended. Specialists will find information related to original sources and sinographs for Japanese names and terms in a comprehensive bibliography and general index. Handsomely presented and clearly organized for ease of use, Japanese Philosophy: A Sourcebook will be a cornerstone in Japanese studies for decades to come. It will be an essential reference for anyone interested in

traditional or contemporary Japanese culture and the way it has shaped and been shaped by its great thinkers over the centuries.

Latin America offers a democratic and constitutional process, with the goals to respect fundamental human rights and control the excess of power. Nevertheless, the

weaknesses of the rule of law's institutions does not guarantee for all citizens the protection of old and new rights. In this sense, the Inter-American Fundamental Rights Conference organized by the Inter-American Network on Fundamental Rights and Democracy (RED-IDD) is an annual meeting of professors and researchers from the different universities of Latin America, addressing topics of particular importance regarding the possibilities and challenges of the

consolidation of the constitutional state in the region. This book presents the minutes of the Fourth Inter-American Fundamental Rights Conference, and explores topics such as political rights and the consolidation of democracy in Latin America; impeachment and judicial guarantees; the challenges of freedom of information: and judicial protection and due process, amongst others.

This anthology provides insights into processes of violent extremism, both locally and globally, questioning how and why it arises and what can be done about it. The book will be relevant for policy makers, post-graduates and researchers in the social and political sciences, religious studies, law, psychology, medicine and education, as well as practitioners in direct contact with targeted individuals or vulnerable groups. The anthology contributes

models, analyses and practical tools helpful for first-liners who are well placed to both see and prevent incipient extremism and to rehabilitate: to aid those who have been extremists in returning to society and finding a life worth living. In addition to chapters focusing on work in Norway, Denmark and Sweden, there are contributions from North America, Africa, Australia, the Middle East and Europe.

"This book is a comparative study of two Church Communities, specifically the Anglican Communion and the Universal Catholic Church. It demonstrates what caused the Church in England to break away from the Catholic Church, and focuses on how English Law has influenced the Church of England since the sixteenth century, and

how the Common Law system has molded its doctrine and ecclesiology. In its comparison, it follows the Churches' histories from their inception up until the English Reformation. It highlights the differences between the two Church Communities from that time, and gives a detailed study of the two Church Communities' understanding of law,

authority and ecclesiology and how these influence the governing aspects of their respective communities. Concomitantly, it discusses the differences between the two main figures of each Community, the Pope and the Archbishop of Canterbury. This book will appeal to Anglicans, Catholics, historians, lawyers, theologians and Christians in general."
