Oxford

A book that lists French language words and gives their equivalent in English, and English language words with their equivalent in French.

Bulletins Et Mémoires de la Société Médicale Des Hôpitaux de Paris BoD

- Books on Demand

George Moore (1852-1933) was one of the most influential and versatile writers and journalists of the turn of the century. This five-volume, reset critical edition addresses scholarly interest in Moore, making available his generally neglected short story collections.

Supplementary Despatches, Correspondence, and Memoranda of Field Marshal Arthur Duke of Wellington

... American Mathematical Soc.

Vols. for 1963- include as pt. 2 of the Jan. issue: Medical subject headings.

The Mathematical Heritage of Henri Poincare Taylor & Francis

Reprint of the original, first published in 1874. The publishing house Anatiposi publishes historical books as reprints.

Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make

them available to the public so that they do not get lost.

The Studio Walter de Gruyter GmbH & Co KG

Set includes revised editions of some issues.

Agriculture Handbook

On April 7-10, 1980, the American Mathematical Society sponsored a Symposium on the Mathematical Heritage of Henri Poincaré, held at Indiana University, Bloomington, Indiana.

This volume presents the written versions of all but three of the invited talks presented at this Symposium (those by W. Browder, A. Jaffe, and J. Mather were not written up for publication). In addition, it contains two papers by invited speakers who were not able to attend, S. S. Chern and L. Nirenberg. If one traces the influence of Poincaré through the major mathematical figures of the early and midtwentieth century, it is through American mathematicians as well as French that this influence flows, through G. D. Birkhoff, Solomon Lefschetz, and Marston Morse. This continuing tradition represents one of the major strands of American as well as world mathematics, and it is as a testimony to this tradition as an opening to the future creativity of mathematics that this volume is dedicated. This part contains sections on topological methods in nonlinear problems, mechanics and dynamical

systems, ergodic theory and recurrence,
and historical material.
