Microbiology Lippincott Williams & Wilkins

Among the wide variety of written methods of assessment, multiple choice questions (MCQs), especially the single best option variety, remain the staple of examinations administered to medical students. MCQs are used extensively by medical schools and also in the initial steps of examinations by licensing bodies. Their logistical advantage of allowing testing of large number of students and broad sampling of topics in a relatively short time remains unchallenged by any other formats of written examinations. The format and wording of the stem of a MCQ, play an essential role in determining what is being assessed. In its simplest form a MCQ can ask about an isolated fact. Such a 'context-free' MCQ tests rote knowledge only. Higher order skills, such as interpretation and problem solving are best tested using a 'context-rich' stem, in which the question is embedded in a meaningful context. In medical subjects, context enrichment most often

takes the form of a clinical vignette. The advantages of enriching the stem with a clinical vignette are two-fold. First, it allows for the assessment of higher order cognitive skills. Second, information is thought to be better recalled when the learning context is similar to retrieval context. In this book, MCQs are based on clinical vignettes. The clinical context will increase commitment of the student to acquire and retain basic knowledge of medical biochemistry.

MCQs (multiple choice questions) are well-established tools, widely used in assessment at the undergraduate and postgraduate levels of medical examinations. MCQs are used to measure understanding, judgement and problem solving abilities of medical students; they have been shown to be more reliable in testing knowledge than traditional essay questions. This book is a compilation of MCQs in Medical Biochemistry. The MCQs focus on all topics of Medical Biochemistry and are arranged chapter-wise. This book has over 1500 MCQs (and their correct answers) that are

thought for and should help students in their self-evaluation. Dr. Ranjit Patil. Dr. Kavindra Borgaonkar
