The present book, *Cases of Assessment in Mathematics Education*, is one of two studies resulting from an ICMI Study Conference on *Assessment in Mathematics Education and Its Effects*. The book which is published in the series of ICMI Studies under the general editorship of the President and Secretary of ICMI is closely related to another study resulting from the same conference: *Investigations into Assessment in Mathematics Education* (Niss, 1992). The two books, although originating from the same sources and having the same editor, emphasize different aspects of assessment in mathematics education

and can be read independently of one another. While the present book is devoted to presenting and discussing cases of assessment that are actually implemented, the other study attempts to critically analyze general and principal aspects of assessment. Naturally, the content of either book is enriched by the materials and perspectives provided by the other one. In order to put this book and its background into context, the nature and scope of the ICMI studies are outlined briefly below.

The 2012 GCSE English
results prompted
significant controversy,
which ultimately
resulted in an
application for judicial
review. This report sets
out the background to
these events and
identifies lessons to be
learned. The problems
with GCSE English can
be traced back to the
2007-09 development
phase of the
qualification- in
particular the
turbulence which
resulted from the shift
away from a mostly
linear to a modular
system, combined with
a high proportion of
controlled assessment
and generous marking

tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual

must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.
