"Dissection can be an aspect of scientific education that can make some parties queasy, but it is a fascinating way to learn more about the different body systems, their operations, and basic animal anatomy. Entering the world of pig dissection can make budding scientists even more squeamish, but they need never fear, as this site allows these individuals the opportunity to engage in a bit of virtual pig dissection. Originally created by Professor Earl W. Fleck of Whitman College's biology department, the site lets users go inside the pig to learn about its various systems, via a set of high-quality color photographs, which can be viewed at different angles and perspectives. Of course, what would a lab be without a quiz? Rounding out the site, visitors can take short quizzes on the pig's anatomy and such." The Bohensky Dissection Series has been used successfully by more than 300,000 biology students nationwide. Each book in the series is designed to guide the student through the study of anatomical structures. The books do this through the use of clearly marked photographs and illustrations. Accompanying text offers the student both easy-to-follow dissection instructions and factual information about the section under observation. At the end of each chapter there are tests which can be used for self-study or for grade course evaluation. Within the traditional dissection portion of a biology course, many programs include the sheep heart, eye, and brain. Within many of these guides, the author has incorporated photographs of these structures to more closely follow standard course curriculum. The author also provides important information on human organs such as the eye, ear, and heart. In this way, the student can better understand the role and function of these organs as they relate to human life processes. Add to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.

For the two-semester A&P laboratory course. Fully engage students in their A&P Lab experience Human Anatomy & Physiology Laboratory Manual: Making Connections distinguishes itself from other A&P lab manuals by focusing on and addressing the most common teaching challenges in the lab--getting students to engage in the lab, to prepare for the lab, and to apply concepts in the lab. Catharine Whiting's active learning approach incorporates a rich variety of hands-on activities and guided questions to get students engaged and asking questions. The 2nd Edition provides new features, such as "What You Need to Know Before You Start this Unit" at the beginning of each Unit and new Pre-Lab Video Coaching Activities to help students learn what they need to review before lab. Developed as the companion to Erin Amerman's Human Anatomy & Physiology, 2nd Edition, Whiting's lab manual reflects the same superb art program and terminology found in the Amerman textbook. Human Anatomy & Physiology Laboratory Manual: Making Connections, 2nd Edition is available in three versions for your students: Main, Cat and Fetal Pig. The Cat and Fetal Pig versions are identical to the Main version except that they include seven additional cat dissection and nine additional fetal pig dissection exercises, respectively, at the back of the lab manual. Also available with Mastering A&P Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and improves results for each student. Mastering A&P assignments support interactive features in the lab manual and include new Pre-Lab Video coaching activities, new Cat Dissection Video and Fetal Pig Dissection Video coaching activities, new fully mobile PAL 3.1 plus PAL 3.1 Customizable Flashcards, Learning Catalytics (tm) , A&P Flix 3D muscle animations, a variety of Art Labeling Questions, Clinical Application Questions, and more. One way to determine if all students can learn through the use of computers is to introduce a lesson taught completely via computers and compare the results with those gained when the same lesson is taught in a traditional manner. This study attempted to determine if a virtual fetal pig dissection can be used as a viable alternative for an actual dissection for females enrolled in high school biology classes by comparing the knowledge acquisition and attitudinal change between the experimental (virtual dissection) and control (actual dissection) groups. Two hundred and twenty four students enrolled in biology classes in a suburban all-girl parochial high school participated in this study. Female students in an all-girl high school were chosen because research shows differences in science competency and computer usage between the genders that may mask the performance of females on computer-based tasks in a science laboratory exercise. Students who completed the virtual dissection scored significantly higher on practical and objective tests that were used to measure knowledge acquisition. Attitudinal change was measured by examining the students' attitudes toward dissections, computer usage in the classroom, and toward biology both before and after the dissections using pre and post surveys. Significant results in positive gain scores were found in the virtual dissection group's attitude toward dissections and their negative gain score toward virtual dissections. Attitudinal changes toward computers and biology were not significant. A purposefully selected sample of the students were interviewed, in addition to gathering a sample of the students' daily dissection journals, as data highlighting their thoughts and feelings about their dissection experience. Further research is suggested to determine if a virtual laboratory experience can be a substitute for actual dissections, or may serve as an enhancement to an actual dissection.

A Dissection Guide & Atlas to the Fetal Pig Macmillan

A Dissection Guide & Atlas to the Fetal Pig, 3rd Ed. by David G. Smith and Michael P. Schenk is designed to provide students with a comprehensive introduction to the anatomy of the fetal pig. This

full-color dissection guide and atlas gives the student carefully worded directions for learning basic mammalian anatomy through the use of a fetal pig specimen.

Saunders General Biology Laboratory Manual Ingram

A Photographic Atlas for the Biology Laboratory, Seventh Edition by Byron J. Adams and John L. Crawley is a full-color photographic atlas that provides a balanced visual representation of the diversity of biological organisms. It is designed to accompany any biology textbook or laboratory manual.

Laboratory Anatomy of the Fetal Pig Benjamin-Cummings Publishing Company

This lab manual for major and non-majors can accompany any introductory biology text. It covers most major laboratory topics used in introductory biology and includes comprehensive coverage of vertebrate dissection (fetal pig). Most labs in this laboratory manual do not require special equipment.

Fetal Pig Dissection McGraw-Hill Science, Engineering & Mathematics

Cat Dissection: A Laboratory Guide, 3rd Edition directs readers through a series of dissection activities for use in the lab accompanied by new, full color photos and figures. The guide can be used as a stand-alone dissection guide or in conjunction with any Anatomy and Physiology Laboratory Manual.

Human Anatomy and Physiology Lab Manual, Pig Version is a clearly written and comprehensive lab manual that guides readers through well-planned lab activities and feature illustrations and full-color photographs that help readers better understand the material. Designed to stand alone or for use with other materials, the manual offers hands-on experience with anatomical structures and physiological concepts to aid in mastery of the subject. The pig version also includes detailed dissection exercises that clearly lead readers through the dissection process. Packaged with the book, the new PhysioEx Version 6.0 includes new Serological Testing laboratory simulations, a revised and redesigned Histology Tutorial, and online worksheets with multiple-choice answers. PhysioEx Version 6.0 is available in CD-ROM format and on the Web at www.physioex.com. The Human body, An Orientation, The Microscope and Its Uses, The Cell, Histology, The Integumentary System and Body Membranes, The Skeletal System, The Muscular System, The Nervous System, The Endocrine System, The Circulatory System, The Respiratory System, The Digestive System, The Urinary System, The Reproductive System, Development, and Heredity, Surface Anatomy, Dissection Exercises. For all readers interested in learning the basics of human anatomy and physiology.

Pigs, Plants and Other Biological Wonders McGraw-Hill Science, Engineering & Mathematics

The laboratory guide directs students through a series of dissection activities for use in the lab accompanied by new, full color photos and figures. The guide can be used as a stand-alone dissection guide or in conjunction with any Anatomy and Physiology Laboratory Manual.

Anatomy & Physiology Revealed (APR) is an interactive human cadaver, fetal pig, and cat dissection tool to enhance lecture and lab that students can use anytime, anywhere. APR contains all the systems covered in A & P and Human Anatomy courses, including Body Orientation, Cells and Chemistry, and Tissues. Animations, rotatable 3D models, dissection, histology, imaging, and

quizzing capabilities aid in preparing students for ultimate success. SmartBook 2.0 is the adaptive learning solution that is personalized to individual student needs, continually adapting to pinpoint knowledge gaps and focus learning on concepts requiring additional study. For instructors, SmartBook 2.0 provides greater control over course content and performance data—most importantly, students are better prepared, so instructors can focus on advanced instruction for a more dynamic class experience. LABORATORY MANUAL FETAL PIG VERSION FOR MCKINLEY'S ANATOMY & PHYSIOLOGY.

The study of human anatomy and physiology really comes to life in the anatomy and physiology laboratory, where students get hands-on experience with human cadavers and bones, classroom models, preserved and fresh animal organs, histology slides of human tissues, and learn the process of scientific discovery through physiology experimentation. This lab manual is intended to provide students with tools to make the subject matter more relevant to their own bodies and to the world around them. It is an interactive workbook for students: a 'how-to' guide to learning human anatomy and physiology through touch, dissection, observation, experimentation, and critical thinking exercises.

Applying Anatomy & Physiology Concepts through Active Learning Developed as the companion lab manual to Amerman's Human Anatomy & Physiology, Catharine Whiting's lab manual takes an active learning approach that uses a rich variety of hands-on activities, along with guided questions, to engage students and help them apply concepts learned in lecture to lab. The active learning approach to Whiting's Human Anatomy & Physiology Laboratory Manual: Making Connections includes unique hands-on activities that use different learning modes including labeling, sketching, touching, dissecting, observing, conducting experiments, interacting with groups, and making predictions. Whiting also includes pre-lab assignments to help students better prepare for lab; and post-lab assignments to solidify learning and challenge students to see interrelationships of concepts across topics. Also available with MasteringA&P® This title is also available with MasteringA&P -- an online homework, tutorial, and assessment system proven to help students learn. It helps instructors maximize lab time with customizable, easy-to-assign, automatically graded assessments that motivate students to learn outside of class and to arrive prepared for lab. The powerful gradebook provides unique insight into student and class performance.
