Why is the Big Book of Cursive Handwriting Practice an important addition to your student's curriculum? A 2013 New York Times article states that, "Learning to write in cursive is shown to improve brain development in the areas of thinking, language and working memory. Cursive handwriting stimulates brain synapses and synchronicity between the left and right hemispheres, something absent from printing and typing. As a result, the physical act of writing in cursive leads to increased comprehension and participation. The College Board found that students who wrote in cursive for the essay portion of the SAT scored slightly higher than those who printed." This handwriting book is perfect for improving cursive penmanship. The Big Book of Cursive

Handwriting Practice is a great resource for the homeschool classroom as well as public and private 1st grade, 2nd grade, and 3rd grade classrooms.
