The Magazines Handbook Routledge

The Magazines Handbook has firmly established itself as the essential introduction to the theories and practices of the modern magazine industry. This fully updated third edition comprehensively examines the business of publishing magazines today and the work of the contemporary magazine journalist. Jenny McKay draws examples from a broad range of publications to explore key jobs in the industry, covering everyone from the sub editor to the fashion assistant, as well as analysing the many skills involved in magazine journalism, including commissioning, researching, interviewing, and production. Updated specialist chapters discuss the growth and development of electronic publishing and online journalism, new directions in magazine design, photography and picture editing, and the most up to date legal frameworks in which magazine journalists must operate. The Magazines Handbook includes: • Interviews with magazine journalists, editors, and publishers • Advice on starting out and freelancing in the magazine industry • An analysis of 'new journalism' and reportage • A glossary of key terms and specialist concepts • Information on contacts, courses and professional training.

The Relevance of Alan Watts in Contemporary Culture Routledge

Whilst accounting for the present-day popularity and relevance of Alan Watts' contributions to psychology, religion, arts, and humanities, this interdisciplinary collection grapples with the ongoing criticisms which surround Watts' life and work. Offering rich examination of as yet underexplored aspects of Watts' influence in 1960s counterculture, this volume offers unique application of Watts' thinking to contemporary issues and critically engages with controversies surrounding the commodification of Watts' ideas, his alleged misreading of Biblical texts, and his apparent distortion of Asian religions and spirituality. Featuring a broad range of international contributors and bringing Watts' ideas squarely into the contemporary context, the text provides a comprehensive, yet nuanced exploration of Watts' thinking on psychotherapy, Buddhism, language, music, and sexuality. This text will benefit researchers, doctoral students, and academics in the fields of psychotherapy, phenomenology, and the philosophy of psychology more broadly. Those interested in Jungian psychotherapy, spirituality, and the self and social identity will also enjoy this volume.

This book shows how, during the period of the Japanese economic miracle, a distinctive female employment system was developed alongside, and different from, the better known Japanese employment system which was applied to male employees. Women, Work and the Japanese Economic Miracle describes and analyses the place of female workers in the cotton textile industry, which was a crucially important industry with a large workforce. In presenting detailed data on such key issues as recruitment systems, management practices and the working experience of the women involved, it demonstrates the importance for Japan's postwar economy of harnessing female labour during these years.

One of the biggest challenges for students of housing is understanding the financial principles which underpin the place of housing in the wider economy. By taking a political economy approach, Peter King's Understanding Housing Finance makes the basic principles of the subject accessible, without requiring detailed prior knowledge of economics or financial systems. The book explains housing finance by exploring the way in which markets and governments react together. It takes a conceptual approach to consider the advantages and limits of housing markets and why governments intervene. The consequences of intervention are explored in detail using examples of housing subsidy systems and policy mechanisms such as rent control, housing allowances and subsidies to owner occupation. This is a key reference for students on housing and planning courses at both undergraduate and postgraduate level. The book's approach means that its relevance is not confined to one particular housing system, but is useful for those studying housing finance in most developed and developing countries.

Environmental improvement is now one of the most important social concerns in the world. Asian and Oceanic countries are also adopting new gaseous emission regulations. Hino Motors, Ltd., has lined up its new engine series to meet the new regulations and to satisfy customer requirements such as improved fuel consumption and durability.

Cautionary Notes

This edition contains new material covering the latest development in electronics, alternative fuels, emissions and diesel systems.
