For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide.

Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

**Dubai Energy Policy Laws and Regulations Handbook Volume 1 Strategic Information and Regulations** Routledge

UAE Oil, Gas Exploration Industry Business and Investment Contacts Handbook

*The Report: Abu Dhabi 2014* Routledge

Представлены современные тенденции развития методологии экологических оценок проектов. Оценки эффектов проводятся с использованием новых для отечественной практики понятий, таких как: значимые компоненты, индикаторы, измеряемые параметры, пороговые значения, региональные и локальные области оценки. Знание характеристик эффекта - величины, географического размаха, продолжительности, обратимости и периодичности позволяет обоснованно судить о его существенности. Этот методический подход дает

возможность последовательно представить результаты проведения оценки, сделать ЭО более логичной и понятной неспециалистам. ЭО обсуждаются на основе материалов проектов, сделанных как в России, так и за рубежом, начиная с 90-х гг. приведены примеры природоохранных мероприятий и методы проведения оценок. Отдельная глава посвящена особенностям ЭО, которые проводятся международными финансовыми организациями. Книга предназначена для практикующих экологов, специалистов по охране окружающей среды и может быть полезна студентам соответствующих специальностей и всем, кто интересуется проблемами окружающей среды. Материалы этой книги были положены в основу практического курса по управлению окружающей средой.

Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream

capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

**Handbook of Loss Prevention Engineering** Lulu.com

Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments, Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

**Professional Safety** Oxford Business Group

Loss prevention engineering describes all activities intended to help organizations to prevent loss, whether it be through injury, fire, explosion, toxic release, natural disaster, terrorism or other security threats. Compared to process safety, which only focusses on preventing loss in the process industry, this is a much broader field. Here is the only one-stop source for loss prevention principles, policies, practices, programs and methodology presented from an engineering vantage point. As such, this handbook discusses the engineering needs for manufacturing, construction, mining, defense, health care, transportation and quantification, covering the topics to a depth that allows for their functional use while providing additional references should more information be required. The reference nature of the book allows any engineers or other professionals in charge of safety concerns to find the information needed to complete their analysis, project, process, or design.

**Easy Guide to Harmonized System Codes** OECD Publishing

At the root of inequality, unemployment, and populism are radical changes in the world economy. Digital technology is allowing talented foreigners to telecommute into our workplaces and compete for service and professional jobs. Instant machine translation is melting language barriers, so the ranks of these "tele-migrants" will soon include almost every educated person in the world. Computing power is dissolving humans' monopoly on thinking, enabling AI-trained computers to compete for many of the same white-collar jobs. The combination of globalization and robotics is creating the globotics upheaval, and it threatens the very foundations of the liberal welfare-state. Richard Baldwin, one of the world's leading globalization experts, argues that the inhuman speed of this transformation threatens to overwhelm our capacity to adapt. From computers in the office to automatic ordering systems in restaurants, we are familiar with the how digital technologies offer convenience while also eliminating jobs. Globotics will disrupt the lives of millions of white-collar workers much faster than automation, industrialization, and globalization disrupted the lives of factory workers in previous centuries. The result will be a backlash. Professional, white-collar, and service workers will agitate for a slowing of the unprecedented pace of disruption, as factory workers have done in years past. Baldwin argues that the globotics upheaval will be countered in the short run by "shelter-ism" - government policies that shelter some service jobs from tele-migrants and thinking computers. In the long run, people will work in more human jobs-activities that require real people to use the uniquely human ability of independent thought-and this will strengthen bonds in local communities. Offering effective strategies such as focusing on the social value of work, The Globotics Upheaval will help people prepare for the oncoming wave of an advanced robotic workforce.

**The Globotics Upheaval** Lulu.com

This publication is aimed at managers in all industries. It explains why human factors are important in health and safety and how they need to be assessed and managed in the same way as other risk factors. It gives practical advice on how to develop systems designed to take account of human capabilities and fallibilities.

An Invaluable Reference for Members of the Drilling Industry, from Owner-Operators to Large Contractors, and Anyone Interested In Drilling Developed by one of the world's leading authorities on drilling technology, the fifth edition of The Drilling Manual draws on industry expertise to provide the latest drilling methods, safety, risk management, and management practices, and protocols. Utilizing state-of-the-art technology and techniques, this edition thoroughly updates the fourth edition and introduces entirely new topics. It includes new coverage on occupational health and safety, adds new sections on coal seam gas, sonic and coil tube drilling, sonic drilling, Dutch cone probing, in hole water or mud hammer drilling, pile top drilling, types of grouting, and improved sections on drilling equipment and maintenance. New sections on drilling applications include underground blast hole drilling, coal seam gas drilling (including well control), trenchless technology and geothermal drilling. It contains heavily illustrated chapters that clearly convey the material. This manual incorporates forward-thinking technology and details good industry practice for the following sectors of the drilling industry: Blast Hole Environmental Foundation/Construction Geotechnical Geothermal Mineral Exploration Mineral Production and Development Oil and Gas: On-shore Seismic Trenchless Technology Water Well The Drilling Manual, Fifth Edition provides you with the most thorough information about the "what," "how," and "why" of drilling. An ideal resource for drilling personnel, hydrologists, environmental

engineers, and scientists interested in subsurface conditions, it covers drilling machinery, methods, applications, management, safety, geology, and other related issues.

This publication examines the contribution of MENA SOEs to industrial development, diversification, poverty elimination and the provision of goods and services to the public, and provides an overview of the diverse mandates and roles of MENA SOEs.

**The Report: Abu Dhabi 2007** Trident Press Ltd

This guide and Approved Code of Practice is aimed at employers. It explains their duties under the Management of Health and Safety at Work Regulations 1999.

**All about Piggling** Springer

Material is arranged geographically. For each country there is a country profile followed by information on marketing data, communications, transportation, business travel, key contacts, and a summary trade regulations and documentation required. Also included are brief sections on U.S. ports, U.S. foreign trade zones, World Trade Center Association members, U.S. government agencies providing assistance to exporters, foreign trade organizations, foreign communications, and general exports and shipping information and practice.

**The Report: Abu Dhabi 2015** Springer Nature

Environment, health and safety (EHS) management has become increasingly important in the past 10 years, especially within high risk and high reliability organizations. EHS is driven from the top of an organization, and whilst there has been much research on the subject of EHS leadership, there is very little on EHS governance and the director's role in leading or influencing change in organizational safety/EHS performance. Environment, Health and Safety Governance and Leadership: The Making of High Reliability Organizations reviews the factors influencing safety/EHS leadership and governance and addresses all the areas where the role impacts on the performance and sustainability of organizations. Based on the author's in-depth research, the book draws on much of the best-practice standards developed by many leading organizations such as the UK Health and Safety Executive (HSE), the Institute of Directors (IoD) and the Organisation for Economic Co-operation and Development (OECD). This book provides exclusive insights and legal imperatives for practitioners and leaders to inform decision making, strategy and EHS governance, all of which can have a fundamental impact on business continuity, developing company value and the sustainability of large organizations around the world.

What is the future of the oil and gas sector in Lebanon? Following the recent discovery of these valuable resources in the southern Mediterranean, including in the Cypriot and Israeli offshore reserves, the possibility of Lebanon also becoming a petroleum-producing country has been raised. This collection of essays addresses the major challenges and opportunities that accompany the country's hope to join the petroleum club. Covering the key policy issues - from Lebanon's susceptibility to the oil curse, to the environmental risks of production - this book brings together expert analysis to offer answers at the institutional level. Of central importance, the contributors argue, is that for Lebanon to benefit from the discovery of petroleum, it must first reform its institutions with the full support of the voting public and civil society. Combining rigorous quantitative and qualitative research, the Lebanese Center for Policy Studies has produced here an essential book that puts petroleum in Lebanon, and the important questions that come with it, within a global perspective.

**Environmental Assessment of Projects (in Russian)** John Wiley & Sons

In the span of one generation, the nation witnessed the rapid modernisation, following the discovery of oil, from a scattered tribal land with a primitive economic structure to the regional and global economic powerhouse the UAE became by the late twentieth century. Through interviews from those who steered and experienced the changes, The First Barrel of Fortune explores the development of not only the economy but also the changes on Emirati society's three pillars - the tribe, Islam and the family. "He who does not know his past cannot make the best of his present and future, for it is from the past that we learn." - Sheikh Zayed bin Sultan Al Nahyan

**The First Barrel of Fortune** Oxford University Press

This broad-ranging text offers a comprehensive outline of how visual images, language and discourse work as 'systems of representation'. Individual chapters explore: representation as a signifying practice in a rich diversity of social contexts and institutional sites; the use of photography in the construction of national identity and culture; other cultures in ethnographic museums; fantasies of the racialized 'Other' in popular media, film and image; the construction of masculine identities in discourses of consumer culture and advertising; and the gendering of narratives in television soap operas.

The Persian Gulf 2020 is the eighth in the annual Persian Gulf series published by MEI@ND. It is a comprehensive analysis of India's bilateral relations with the nine countries in the Persian Gulf and the GCC and focuses on developments in 2019. It gives a comprehensive account of the internal political, economic and security situation in the Persian Gulf countries and India's strategic, political, economic and cultural engagements with the region. The book also offers policy recommendations based on the current state of affairs.
