Discover the essential thinking tools you've been missing with The Great Mental Models series by Shane Parrish, New York Times bestselling author and the mind behind the

acclaimed Farnam Street blog and "The Knowledge Project" podcast. This first book in the series is your guide to learning the crucial thinking tools nobody ever taught you. Time and time again, great thinkers such as Charlie Munger and Warren Buffett have credited their success to mental models—representations of

how something works that can scale onto other fields. Mastering a small number of mental models enables you to rapidly grasp new information, identify patterns others miss, and avoid the common mistakes that hold people back. The Great Mental Models: Volume 1, General Thinking Concepts shows you how making a few

tiny changes in the way you think can deliver big results. Drawing on examples from history, business, art, and science, this book details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making and productivity. This book will teach you how to: Avoid blind spots when looking at problems. Find non-obvious solutions. Anticipate and achieve desired outcomes. Play to your strengths, avoid your weaknesses, ... and more.

The Great Mental Models series demystifies once elusive concepts and illuminates rich knowledge that traditional education overlooks. This series is the most comprehensive and accessible guide on using mental models to better understand our world, solve problems, and gain an advantage.

**First Flight** Christian Focus Project Manhigh took humans to the threshold of space using balloons. In the 1950s, a small band of Air Force doctors were

on the cutting edge of the United States' space research programs. Working at the Aeromedical Field Laboratory at Holloman Air Force Base in southern New Mexico, they used balloons to carry laboratory animals followed by human pilots above 99% of the atmosphere. Drawing upon flight reports and technical data, this book documents Project Manhigh and the high altitude flights that preceded it. The Manhigh flights were, in many

ways, prototypes for future space missions. On each of the three flights, the Air Force placed a lone pilot in a sealed capsule nineteen miles above the ground. At such extreme altitudes, the pilots were well within the functional equivalent of outer space and needed the sealed capsule to survive. Manhigh existed prior to the creation of NASA and helped pave the way for human space exploration.

FOR DISTRIBUTION OUTSIDE THE USA. In Tim LaHaye---creator and co-author of the world-renowned Left Behind series---and Craig Parshall's Edge of Apocalypse, Joshua Jordan's new weapons defense system will secure America against an array of new enemies, including a nuclear strike on New York City by North Korea. But global forces are mounting and corrupt government leaders will

go to any extreme to prevent an impending economic catastrophe. As world events begin setting the stage for the 'end of days' foretold in Revelation, Jordan must weigh the personal price he must pay to save the nation he loves.

Sarah Drake has come home . . . Ever since Damon Wilder sought refuge in Sea Haven, he's heard the same breathless rumor pass the lips of nearly every local in the sleepy coastal town. Even the wind seems to whisper her name - a reverie so

powerfully suggestive that it carries the curious Damon to Sarah's clifftop home, and seeks to shelter him there. But Damon has not arrived alone. A killer has tracked him to Sea Haven, and into the shadows of Drake House. But Sarah has her own secrets, and danger - as well as a desire more urgent than either has ever known - is just a whisper away . . . Please note this story is also available in the Drake Sisters duo *Magic Before Christmas*

Your Strong Will Is God's  
Will! As a strong-willed  
woman, you meet the  
world head-on,  
undeterred by those who  
say something can't be  
done. When applied in the  
right ways, your God-  
given passion produces  
clear-eyed purpose, deep

compassion, and a bold  
spirit that can change the  
world. But sometimes  
your determination leads  
to misunderstandings and  
fractured relationships.  
Cynthia Tobias knows  
firsthand the positive  
potential of a strong will  
channeled appropriately.  
In *A Woman of Strength  
and Purpose*, she offers  
practical strategies for  
applying your confidence  
and drive to enrich your  
friendships, career,  
ministry, marriage, and  
parenting. You'll also hear  
from hundreds of other  
women who share your

strong will and the desire  
to use it for God. You  
don't need to silence your  
strengths. Instead, let God  
use them to impact your  
world for good.

Koehler Publishers  
ABOUT THIS READING  
BOOK SERIES These  
cumulative, decodable  
phonics ebooks provide

an effective and enjoyable 'stand-alone' approach to teach beginning reading. They are also designed to complement No Nonsense Phonics Skills (Pupil Books 1 to 8) and the Phonics International programme - a FREE online programme (Units 1 to 6 of 12 Units). The books can be used to complement and supplement other early reading programmes and reading instruction. The series is colour-coded for ease of organisation and management. The back covers indicate the code featured cumulatively in

each book. Purpose - these books are designed for children: 1. to practise the technical skill of decoding new printed words by sounding out and blending ('lifting the words off the page') using their knowledge of letter/s-sound correspondences (the alphabetic code) 2. to learn the meaning of new words, enriching their vocabulary, in the context of events in the storylines 3. to practise reading aloud with increasing confidence and fluency - learning how to use

expression when re-reading The books are challenging: The books are structured to be 'cumulative' and 'decodable' and they are also challenging. They include shorter and longer words from the outset and some words that are likely to be new to children's spoken language. Generally, there are many words on most pages to provide plenty of accurate decoding practice. After the children have decoded any new words they do not automatically recognise, the supporting

adult can discuss the storylines, including with reference to the illustrations, to explain new words. There is 'Vocabulary Support' in the back of the books. Capital letters are code for the same sounds as their lower case letters. Children should attempt to decode the words, sentences or pages by themselves at first with the adult encouraging, supporting, re-reading words, sentences and pages as required. Some beginners may only manage one page in any

one reading session until they have perfected the phonics skill of sounding out in response to letters and letter groups, and blending the sounds (synthesising) to decode new words. Children learn at different rates and have different needs: Debbie's approach includes incidental phonics teaching and support as well as systematic provision. Some children may need reminding of letter/s-sound correspondences that are not yet embedded in memory.

Some children will self-teach as they learn more about the alphabetic code, and some children will recognise words they've previously read more easily than others. Some children may be able to 'discern' (detect) a word they've sounded out because they know the word in their spoken language, but struggle to 'discern' a new printed word that is not in their spoken language. This will improve over time as children decode and learn new words from the literature they read not

just the words they hear and speak. Using the books in the school and at home advisedly: In school, teachers may decide to use these books lagging behind the introduction of the various letter/s-sound correspondences for additional reading practice. Both the No Nonsense Phonics and the Phonics International programmes already provide plain 'matched texts' for children's reading, writing, spelling and language comprehension. These reading books are

additional and complementary to the phonics programmes. Teachers may decide to cascade these books to children for home-reading starting with the children who are the quickest and most adept at sounding out and blending to decode new words. Teachers may decide to use these books in school for supported practice in school before sending them home for re-reading in the home. Again, this may depend on the children themselves and how teachers decide the

books will be most beneficial – particularly when children are beginners. Teachers may use later books differently according to children's changing needs over time. Children can be introduced to letter/s-sound correspondences 'incidentally' and this will add to their code knowledge and capacity to self-teach over time. Illustrations: The pictures in children's books enhance the storylines and often tell a story beyond the words on the pages. It is important that

the ‘back and forth’ discussions between adults and children always take place with these phonics reading books no less than with storybooks. In addition, ‘homophones’ are so common in the English language that it is helpful, as adults, to point out that the same words can have various meanings in different contexts – and to engage children fully with this notion. About the ‘sounds’ and the alphabetic code: Parents and carers can ‘hear’ the sounds via an audio

Alphabetic Code Chart at [alphabeticcodecharts.com](http://alphabeticcodecharts.com). There are also free printable alphabetic code charts at this site. Tweaking or modifying pronunciation: It is very common that a spoken word’s final pronunciation needs to be ‘tweaked’ or ‘modified’ after sounding out and blending. Early examples of this are words such as ‘is’, ‘his’, ‘as’, ‘has’. In reality, these words are pronounced ‘iz’, ‘hiz’, ‘az’, ‘haz’ with a /z/ sound at the end, not a /s/ sound, but most children who are decoding these

words will automatically sound them out and then say them with their correct pronunciation even without thinking about it. The sooner adults and children alike understand this constant process of slight modification of pronunciation (as required), the sooner a wider range of words can be included for beginners. *The Night Flight* Penguin Tim and Jim are off for their first plane ride. Schiffer Military History

Book

NATIONAL BESTSELLER "If you loved the movie, you will love the real story in the book." -- Fox & Friends On the 50th anniversary of the creation of the "Topgun" Navy Fighter School, its founder shares the remarkable inside story of how he and eight other risk-takers revolutionized the art of aerial combat. When American fighter jets were being downed at an unprecedented rate during the Vietnam War, the U.S. Navy turned to a young lieutenant

commander, Dan Pedersen, to figure out a way to reverse their dark fortune. On a shoestring budget and with little support, Pedersen picked eight of the finest pilots to help train a new generation to bend jets like the F-4 Phantom to their will and learn how to dogfight all over again. What resulted was nothing short of a revolution -- one that took young American pilots from the crucible of combat training in the California desert to the blistering skies of

Vietnam, in the process raising America's Navy combat kill ratio from two enemy planes downed for every American plane lost to more than 22 to 1. Topgun emerged not only as an icon of America's military dominance immortalized by Hollywood but as a vital institution that would shape the nation's military strategy for generations to come. Pedersen takes readers on a colorful and thrilling ride -- from Miramar to Area 51 to the decks of aircraft carriers in war and

peace-through a historic moment in air warfare. He helped establish a legacy that was built by him and his "Original Eight" -- the best of the best -- and carried on for six decades by some of America's greatest leaders. Topgun is a heartfelt and personal testimony to patriotism, sacrifice, and American innovation and daring.

Time management remains a huge challenge for most people. This book shares the habits and processes used by top leaders worldwide to

minimize distractions and maximize accomplishments. In researching more than 1,260 managers and executives from more than 108 different organizations, Steve and Rob Shallenberger discovered that 68 percent of them feel like their number one challenge is time management, yet 80 percent don't have a clear process for how to prioritize their time. Drawing on their forty years of leadership research, this book offers

three powerful habits that the top 10 percent of leaders use to Do What Matters Most. These three high performance habits are developing a written personal vision, identifying and setting Roles and Goals, and consistently doing Pre-week Planning. And Steve and Rob make an audacious promise: these three habits can increase anyone's productivity by at least 30 to 50 percent. For organizations, this means higher profits, happier employees, and increased innovation. For

individuals, it means you'll find hours in your week that you didn't know were there—imagine what you could do! You will learn how acquiring this skillset turned an “average” employee into her company's top producer, enabled a senior vice president to reignite his team and achieve record results, transformed a stressed-out manager's work and home life, helped a CEO who felt like he'd lost his edge regain his fire and passion, and much more. By implementing these

simple and easy-to-understand habits, supported by tools like the Personal Productivity Assessment, you will learn how to lead a life by design, not by default. You'll feel the power that comes with a sense of control, direction, and purpose.

A one-page tool to reinvent yourself and your career The global bestseller Business Model Generation introduced a unique visual way to summarize and creatively brainstorm any business or product idea on a single sheet of paper. Business Model You uses the same powerful one-

page tool to teach readers how to draw "personal business models," which reveal new ways their skills can be adapted to the changing needs of the marketplace to reveal new, more satisfying, career and life possibilities. Produced by the same team that created Business Model Generation, this book is based on the Business Model Canvas methodology, which has quickly emerged as the world's leading business model description and innovation technique. This

book shows readers how to: Understand business model thinking and diagram their current personal business model Understand the value of their skills in the marketplace and define their purpose Articulate a vision for change Create a new personal business model harmonized with that vision, and most important, test and implement the new model When you implement the one-page tool from Business Model You, you create a game-changing business model for your

life and career.
