 Homer's stories of Troy are part of the foundations of Western culture. What's less well known is that they also inspired Ottoman-Turkish cultural traditions. Yet even with all the historical and archaeological research into Homer and Troy, most scholars today rely heavily on Western sources, giving Ottoman work in the field short shrift. This book helps right that balance, exploring Ottoman-Turkish involvement and interest in the subject between 1870, when Heinrich Schliemann began his excavations in search of Troy on Ottoman soil, and the battle of Gallipoli in 1915, which gave the Turks their own version of the heroic epic of Troy.

Homer, Troy and the Turks teNeues

The true story of a clash of ancient cultures: "Beautifully written and stirring . . . An outstanding retelling of one of the seminal events in world history." —Booklist In 480 BC, a huge Persian army, led by the inimitable King Xerxes, entered the mountain pass of Thermopylae as it marched on Greece, intending to conquer the land with little difficulty. But the Greeks, led by King Leonidas and a small army of Spartans, took the battle to the Persians at Thermopylae, and halted their advance—almost. It is one of history's most acclaimed battles, one of civilization's greatest last stands. And in Thermopylae, renowned classical

historian Paul Cartledge looks anew at this history-altering moment and, most impressively, shows how its repercussions have bearing on us even today. The invasion of Europe by Xerxes and his army redefined culture, kingdom, and class. The valiant efforts of a few thousand Greek warriors, facing a huge onrushing Persian army at the narrow pass at Thermopylae, changed the way generations to come would think about combat, courage, and death. "A class in Western Civilization that both instructs and entertains." —Kirkus Reviews (starred review)

The Stedelijk Museum opened its doors in 1895, the same year as the first Venice Biennale. It was a "quiet, civilized museum for the Amsterdam bourgeoisie in a time when there was nothing as troublesome as modern art." Initially, the museum exhibited the legacy of the eccentric Sophia Augusta de Bruyn, Douairire Lopez Suasso: a heterogeneous collection of antiques, coins, jewels, timepieces, silver knickknacks, and other curiosa. Period rooms, from canal houses that had been demolished when Raadhuisstraat was driven through, helped create a presentable whole. The museum's renowned furniture collection was not begun until 1934, but since then it has grown to include more than 1000 objects from circa 1850 to the present, with an accent on the twentieth century. Chairs, settees, tables, folding screens, cabinets, and even complete interiors are included. This publication provides a comprehensive overview of the Stedelijk Museum's furniture collecting activities from 1934 to 2000. It charts the museum's rich collection, which includes work by H.P. Berlage, K.P.C de Bazel, Piet Kramer, Gerrit T. Rietveld, Martin Visser, Piet Hein Eek and Marcel Wanders, as well as international furniture classics designed by Michael Thonet, Charlotte Perriand, Ludwig Mies van der Rohe, Marcel Breuer, Joe Colombo, Arne Jacobsen, Ettore Sottsass, Philippe Starck and Ron Arad. Besides a complete overview of the furniture collection, this annotated catalogue includes an introduction to the history of the collection and its exhibition activities. In addition, the volume explores various themes, such as international and Dutch icons, and contrasts and evolutions, in greater depth in a number of short essays.

Cinema is the form of entertainment that can be, above all, identified with the twentieth century. It gradually replaced theatre as a popular form of performed storytelling, and replaced opera too as the new multimedia art form, soon incorporating music as one of cinema's privileged means to co-tell stories. Speaking of music, jazz was as sensational a twentieth-century novelty as cinema was. The two soon teamed up, and jazz, with its various incarnations and styles, has accompanied the moving images and

the cinematic narratives throughout the decades. It was inevitable that these two iconic art/entertainment forms, jazz and cinema, should meet, blend, cooperate, and have a reciprocal influence. While the early film music was mostly symphonic and inspired by the late-romantic nineteenth-century idiom, jazz and Afro-American music—in various form and with diverse and changing racial/social connotations—appeared onscreen even before the landmark film *The Jazz Singer* (1927), which officially launched the sound era. This collection of essays seeks to study the long-standing relationship between jazz and cinema, from the silent era to the contemporary sound cinema, on an international level.

Christian Gauss Award Shortlist Winner of the ASAP Book Prize A Literary Hub Book of the Year "Makes the case that the gimmick...is of tremendous critical value...Lies somewhere between critical theory and Sontag's best work." —Los Angeles Review of Books "Ngai exposes capitalism's tricks in her mind-blowing study of the time- and labor-saving devices we call gimmicks." —New Statesman "One of the most creative humanities scholars working today...My god, it's so good." —Literary Hub "Ngai is a keen analyst of overlooked or denigrated categories in art and life...Highly original." —4Columns "It is undeniable that part of what makes Ngai's analyses of aesthetic categories so appealing...is simply her capacity to speak about them brilliantly." —Bookforum "A page turner." —American Literary History Deeply objectionable and yet strangely attractive, the gimmick comes in many guises: a musical hook, a financial strategy, a striptease, a novel of ideas. Above all, acclaimed theorist Sianne Ngai argues, the gimmick strikes us both as working too little (a labor-saving trick) and working too hard (a strained effort to get our attention). When we call something a gimmick, we register misgivings that suggest broader anxieties about value, money, and time, making the gimmick a hallmark of capitalism. With wit and critical precision, Ngai explores the extravagantly impoverished gimmick across a range of examples: the fiction of Thomas Mann, Helen DeWitt, and Henry James; the video art of Stan Douglas; the theoretical writings of Stanley Cavell and Theodor Adorno. Despite its status as cheap and compromised, the gimmick emerges as a surprisingly powerful tool in this formidable contribution to aesthetic theory.

The forms by which a deceased person may be brought to rest are as many as there are causes of death. In most societies the disposal of the corpse is accompanied by some form of

celebration or ritual which may range from a simple act of deportment in solitude to the engagement of large masses of people in laborious and creative festivities. In a funerary context the term ritual may be taken to represent a process that incorporates all the actions performed and thoughts expressed in connection with a dying and dead person, from the preparatory pre-death stages to the final deposition of the corpse and the post-mortem stages of grief and commemoration. The contributions presented here are focused not on the examination of different funerary practices, their function and meaning, but on the changes of such rituals - how and when they occurred and how they may be explained. Based on case studies from a range of geographical regions and from different prehistoric and historical periods, a range of key themes are examined concerning belief and ritual, body and deposition, place, performance and commemoration, exploring a complex web of practices.

No city has captured the imagination like Troy does. Since the famous poet Homer wrote the Iliad and the Odyssey in the eighth century BC, many peoples have sung, edited, studied and appropriated the stories of the city, the war between Greeks and Trojans and the famous Trojan horse. Roman emperors and many European monarchs have traced their roots to Trojan or Greek heroes. Troy was a legendary city, a city of poetry, paintings, operas and films. But the city really existed: in 1871 the German archaeologist Heinrich Schliemann found the remains of Troy during excavations in Turkey. Since the end of the nineteenth century, teams of archaeologists exposed the history of the city. In this handbook, with contributions from numerous experts from the Netherlands and Turkey, the latest insights and discoveries about both the historical and legendary Troy are presented. Exhibition: Allard Pierson Museum, Amsterdam, The Netherlands (7.12.2012-5.5.2013).

Combat Trauma and the Ancient Greeks Palgrave Macmillan

During the last millennium B.C., before the coming of the Romans, the Etruscans built a thriving civilization in the western Mediterranean basin, which was rich in natural resources. From the eighth century B.C., Etruria became a destination on the Italian peninsula for refined works by artisans of the Hellenic regions, the Near East, and central Europe, and for masters from these regions, who emigrated and began to work for the local clientele. These artisans would contribute significantly to the development of an art that was recognizably Etruscan. The influence of Etruscan civilization on other cultures has received less attention from archaeologists than has the effect of the Eastern and Greek worlds on Etruscan culture. This lavishly illustrated volume seeks to redress this imbalance by tracing the Etruscans' impact beyond Etruria. It focuses on the panorama of their commerce and the Etruscan ideological and cultural initiatives that radiated from their native territory into other regions. Etruscan civilization spread across a surprisingly vast area, from ancient Italy out into the Mediterranean basin and continental Europe. The book devotes new attention to details that vary from region to region, with a number of chapters devoted to regional specialists. They offer fresh perspectives on the history, art, and political organization of a culture that, in many ways, remains mysterious.

This text is presented in English and German. This book contains 19 articles dealing with various aspects of the Greek goddess Artemis and the Roman goddess Diana. The themes presented in the volume deal with the Near Eastern equivalents of Artemis, the

Bronze Age Linear B testimonies, and Artemis in Homer and in the Greek tragedies. Sanctuaries and cult, and regional aspects are also dealt with - encompassing Cyprus, the Black Sea region, Greece and Italy. Pedimental sculpture, mosaics and sculpture form the basis of investigations of the iconography of the Roman Diana; the role of the cult of Diana in a dynastic setting is also examined. There is a single section that deals with the reception of the iconography of the Ephesian Artemis during the Renaissance and later periods.

Nicole Loraux has devoted much of her writing to charting the paths of the Greek "imaginary," revealing a collective masculine psyche fraught with ambivalence as it tries to grasp the differences between nature and culture, body and soul, woman and man. The Experiences of Tiresias, its title referring to the shepherd struck blind after glimpsing Athena's naked body, captures this ambivalence in exploring how the Greek male defines himself in relationship to the feminine. In these essays, Loraux disturbs the idea of virile men and feminine women, a distinction found in official discourse and aimed at protecting the ideals of male identity from any taint of the feminine. Turning to epic and to Socrates, however, she insists on a logic of an inclusiveness between the genders, which casts a shadow over their clear, officially defined borders. The emphasis falls on the body, often associated with feminine vulnerability and weakness, and often dissociated from the ideal of the brave, self-sacrificing male warrior. But heroes such as the Homeric Achilles, who fears yet fights bravely, and Socrates, who speaks of the soul through the language of the body, challenge these representations. The anatomy of pain, the heroics of childbirth, the sorrows of tears, the warrior's wounds, and the madness of the soul: all these experiences are shown to engage with both the masculine and the feminine in ways that do not denigrate the experiences for either gender. Natural Hazards: Earth Processes as Hazards, Disasters and Catastrophes, Fourth Edition, is an introductory-level survey intended for university and college courses that are concerned with earth processes that have direct, and often sudden and violent, impacts on human society. The text integrates principles of geology, hydrology, meteorology, climatology, oceanography, soil science, ecology and solar system astronomy. The book is

designed for a course in natural hazards for non-science majors, and a primary goal of the text is to assist instructors in guiding students who may have little background in science to understand physical earth processes as natural hazards and their consequences to society. *Natural Hazards* uses historical to recent examples of hazards and disasters to explore how and why they happen and what we can do to limit their effects. The text's up-to-date coverage of recent disasters brings a fresh perspective to the material. The Fourth Edition continues our new active learning approach that includes reinforcement of learning objective with a fully updated visual program and pedagogical tools that highlight fundamental concepts of the text. This program will provide an interactive and engaging learning experience for your students. Here's how: Provide a balanced approach to the study of natural hazards: Focus on the basic earth science of hazards as well as roles of human processes and effects on our planet in a broader, more balanced approach to the study of natural hazards. Enhance understanding and comprehension of natural hazards: Newly revised stories and case studies give students a behind the scenes glimpse into how hazards are evaluated from a scientific and human perspective; the stories of real people who survive natural hazards, and the lives and research of professionals who have contributed significantly to the research of hazardous events. Strong pedagogical tools reinforce the text's core features: Chapter structure and design organizes the material into three major sections to help students learn, digest, and review learning objectives.

Within modern frameworks of knowledge and representation, Dionysos often appears to be atypical for ancient culture, an exception within the context of ancient polytheism, or even an instance of a difference that anticipates modernism. How can recent research contribute to a more precise understanding of the diverse transformations of the ancient god, from Greek antiquity to the Roman Empire? In this volume, which is the result of an international conference held in March 2009 at the Pergamon Museum Berlin, scholars from all branches of classical studies, including history of scholarship, consider this question. Consequently, this leads to a new look on vase paintings, sanctuaries, rituals and religious-political institutions like theatre, and includes new readings of the texts of ancient poets, historians and philosophers, as well as of papyri and inscriptions. It is the diversity of sources or methods and the challenge of former views that is the strength of this volume, providing a comprehensive, innovative and richly faceted account of the "different" god in an unprecedented way.

"A passionate, incisive critique of the many ways in which women and girls of color are systematically erased or marginalized in discussions of police violence." —Michelle Alexander, author of *The New Jim Crow* *Invisible No More* is a timely examination of how Black women, Indigenous women, and women of color experience racial profiling, police brutality, and immigration enforcement. By placing the individual stories of Sandra Bland, Rekia Boyd, Dajerra Becton, Monica Jones, and Mya Hall in the broader context of the twin epidemics of police violence and mass incarceration, Andrea Ritchie documents the evolution of movements centered around women's experiences of policing. Featuring a powerful forward by activist Angela Davis, *Invisible No More* is an essential exposé on police violence against WOC that demands a radical rethinking of our visions of safety—and the means we devote to achieving it.
