The Art of Illumination Dover

A comprehensive design source book of all types of Celtic illuminated letters by leading exponent of Celtic art, Courtney Davis. The 101 illuminated letters reflect the history of Celtic design from the earliest examples to Courtney Davis's own celebrated modern interpretations. Many of the illuminated letters are from, or

inspired by, the famous Celtic manuscripts such as the Lindisfarne Gospels and the Book of Kells. The 101 designs are all hand painted by Courtney Davis and printed in full colour. Each is accompanied by a black and white version of the same image on the adjacent page - perfect for scanning or photocopying for use on readers' personal art, design or craft project. The book contains two complete alphabets and the remaining letters are structured so that those most commonly used at the beginning of words are represented with many more examples than the least common letters. The introduction gives a brief history of the Celts and an explanation of the birth and development of their artistic style with particular relation to illuminated letter designs.

"This richly illustrated catalogue accompanies the exhibition that celebrates the bicentenary of the Fitzwilliam Museum in Cambridge with a display of its finest illuminated manuscripts. Of all the medieval and Renaissance arts - from sculptures, ivories, frescoes and stained glass to easel and wall paintings - it is manuscript illuminations, protected inside volumes, that best preserve the glowing colours and precious metals that would have dazzled their original spectators. The focus of this exciting and innovative exhibition is on COLOUR: it integrates scientific and art

historical analyses of painting materials and techniques with studies on the manuscripts' historic contexts of production, including the relationships between artists and patrons. Identifications of the pigments' chemical composition and methods of application are considered alongside their aesthetic impact as well as the multiple dimensions and meanings of colour appreciated by medieval and Renaissance viewers. Over 150 manuscripts are displayed in the exhibition dating from the 8th to the 19th century and all are catalogued and fully illustrated here. The manuscripts are grouped in 14 thematic sections each of which is introduced by an essay that includes further relevant illustrations and presents the scientific and art historical analyses in a broader cultural context. The majority of the exhibits are from the Museum's collection and the main focus is on Western European illumination, but examples of Byzantine, Armenian, Persian and Sanskrit manuscripts are also included. In addition there are special loans from other Cambridge, British and European collections. The catalogue entries and introductory essays are written

by a team of leading manuscript scholars, scientists and conservators who offer an integrated, cross-disciplinary approach and new insights into the art of illumination."--

Illuminated Alphabets Postcards from Chicago-based jewelry engraver J. M. Bergling (1866–1933) created thousands of letter styles, signets, monograms, and ciphers. A noted author on the subjects of lettering and heraldic design, Bergling

created books that became standard references of his era. He assembled his first book, *Art Monograms and Letters*, with the hopes of inspiring other etchers, engravers, sign painters, and artisans. This volume contains selected illustrations from that publication in addition to his complete *Art Alphabets and Lettering*, which comprises 96 pages of layouts and letter styles ranging from simple to ornate. Commercial artists, designers, calligraphers, engravers, amateurs, and professionals will prize this exclusive edition as a source of high-quality images and alphabets. This reference book features an appreciative Foreword by artist and author James Gurney, which places Bergling's works in historical context.
