"Besides the beguiling story, the affable illustrations of the smiling Gloria, the accidental mayhem in the background, and the myriad safety tips -- such as 'always pull the toothpick out of your sandwich' and 'never lick a stop sign in the winter' -- add to the enjoyment. A glorious picture book." -- The Horn Book "Rathmann is a quick rising star in the world of children's books. In this book, she again shows her flair for creating real characters, dramatic situations and for knowing what will make young audiences giggle and think." -- Children's Book Review Magazine "Rathman brings a lighter-than-air comic touch to this outstanding, solid-as-a-brick picture book." -- Publisher's Weekly "A five-star performance." -- School Library Journal

"None of that people should be spared, not even the babe in its cradle." With these chilling words, the Mongol warlord Genghis Khan declared his intention to destroy the Ismailis, one of the most intellectually and politically significant Muslim communities of medieval Islamdom. The massacres that followed convinced observers that this powerful voice of Shi'i Islam had been forever silenced. Little was heard of these people for centuries, until their recent and dramatic emergence from obscurity. Today they exist as a dynamic and thriving community established in over twenty-five countries. Yet the interval between what appeared to have been their total annihilation, and their modern, seemingly phoenix-like renaissance, has remained shrouded in mystery. Drawing on an astonishing array of sources gathered from many countries around the globe, *The Ismailis in the Middle Ages: A History of Survival, A Search for Salvation* is a richly nuanced and compelling study of the murkiest portion of this era. In probing the period from the dark days when the Ismaili fortresses in Iran fell before the marauding Mongol hordes, to the emergence at Anjudan of the Ismaili Imams who provided a spiritual centre to a scattered community, this work explores the motivations,

passions and presumptions of historical actors. With penetrating insight, Shafique N. Virani examines the rich esoteric thought that animated the Ismailis and enabled them to persevere. A work of remarkable erudition, this landmark book is essential reading for scholars of Islamic history and spirituality, Shi'ism and Iran. Both specialists and informed lay readers will take pleasure not only in its scholarly perception, but in its lively anecdotes, quotations of delightful poetry, and gripping narrative style. This is an extraordinary book of historical beauty and spiritual vision.

The forms taken by scientific writing help to determine the very nature of science itself. In this closely reasoned study, Charles Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for

their findings. Examining such works as the early Philosophical Transactions and Newton's optical writings as well as Physical Review, Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists. The rhetoric of science is, Bazerman demonstrates, an embedded part of scientific activity that interacts with other parts of scientific activity, including social structure and empirical experience. This book presents a comprehensive historical account of the rise and development of the genre, and views these forms in relation to empirical experience.
