 "Cookery and
 Dining in
 Imperial
 Rome" by
 Apicius is the
 oldest known

cookbook in
 existence.
 There are
 recipes for
 cooking fish
 and seafood,
 game,
 chicken, pork,
 veal, and

other domesticated animals and birds, for vegetable dishes, grains, beverages, and sauces; virtually the full range of cookery is covered. There are also methods for preserving food and revitalizing them in ways that are surprisingly still relevant. Made to Matter NYU Press
A biography of Gouverneur Morris (1752-1816) by his granddaughter, making extensive use

of his letters and diary. Passing to América Harvard University Press
This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of & the Pacific once the limits and lineaments of the ocean were set and this was

undeniably the work of Europeans. Fifty years after the Conquista, Nueva Espaa and Peru were the bases from which the ocean was turned into virtually a Spanish lake. **The Ascetic Imperative in Culture and Criticism** Open Road Media
Hannah Arendts authoritative report on the trial of Nazi leader Adolf Eichmann includes further factual material that came to light after the trial,

as well as Arendts postscript directly addressing the controversy that arose over her account. Bastard!!, Vol. 4 Good Press With their powerful blend of political and aesthetic concerns, Edward W. Said's writings have transformed the field of literary studies. This long-awaited collection of literary and cultural essays offers evidence of how much the

fully engaged critical mind can contribute to the reservoir of value, thought, and action essential to our lives and culture.

Annual Supplement to the Catalogue of the Library of Parliament in Alphabetical and Subject Order Simon and Schuster Winner of the Distinguished Contribution to Scholarship Award, American Sociological Association Co-Winner of

the Ralph J. Bunche Award, American Political Science Association In a work of prodigious scholarship and enormous breadth, which draws on the tribal, ancient, premodern, and modern worlds, Orlando Patterson discusses the internal dynamics of slavery in sixty-six societies over time. These include Greece and Rome, medieval Europe, China,

Korea, the Islamic kingdoms, Africa, the Caribbean islands, and the American South. Praise for the previous edition: “Densely packed, closely argued, and highly controversial in its dissent from much of the scholarly conventional wisdom about the function and structure of slavery worldwide.” —Boston Globe “There can be no doubt that this rich and learned book

will reinvigorate debates that have tended to become too empirical and specialized. Patterson has helped to set out the direction for the next decades of interdisciplinary scholarship.” —David Brion Davis, New York Review of Books “This is clearly a major and important work, one which will be widely discussed, cited, and used. I anticipate that it will be considered among the

landmarks in the study of slavery, and will be read by historians, sociologists, and anthropologists—as well as many other scholars and students.” —Stanley Engerman
The Windsor Border Region VIZ Media LLC
Today we associate the Renaissance with painting, sculpture, and architecture—the “major” arts. Yet contemporaries often held the “minor” arts—gem-studded goldwork,

richly embellished armor, splendid tapestries and embroideries, music, and ephemeral multi-media spectacles—in much higher esteem. Isabella d’Este, Marchesa of Mantua, was typical of the Italian nobility: she bequeathed to her children precious stone vases mounted in gold, engraved gems, ivories, and antique bronzes and marbles; her favorite ladies-in-

waiting, by contrast, received mere paintings. Renaissance patrons and observers extolled finely wrought luxury artifacts for their exquisite craftsmanship and the symbolic capital of their components; paintings and sculptures in modest materials, although discussed by some literati, were of lesser consequence. This book endeavors to return to the mainstream material long marginalized

as a result of historical and ideological biases of the intervening centuries. The author analyzes how luxury arts went from being lofty markers of ascendancy and discernment in the Renaissance to being dismissed as “decorative” or “minor” arts—extravagant trinkets of the rich unworthy of the status of Art. Then, by re-examining the objects themselves and their uses in their day,

she shows
how
sumptuous
creations
constructed
the world and
taste of
Renaissance
women and
men.

Scar, Vol. 2

VIZ Media LLC
Gibbon offers an

explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries. *Capitalist Patriarchy and the Case for Socialist Feminism*
Oxford

University Press
25th ANNIVERSARY EDITION •
From the bestselling author of *The Passenger* and the Pulitzer Prize-winning novel *The Road*: an epic novel of the violence and depravity that attended America's westward expansion, brilliantly subverting the conventions of the Western novel and the mythology of the Wild West. Based on historical events that took place on the Texas-

Mexico border in the 1850s, Blood Meridian traces the fortunes of the Kid, a fourteen-year-old Tennessean who stumbles into the nightmarish world where Indians are being murdered and the market for their scalps is thriving. Look for Cormac McCarthy's latest bestselling novels, *The Passenger* and *Stella Maris*. *Paddle Your Own Canoe* Britannia Press For four hundred years--from the first Spanish assaults against the Arawak people of Hispaniola in the 1490s to the U.S. Army's massacre of Sioux Indians at Wounded Knee in the 1890s--the indigenous inhabitants of North and South America endured an unending firestorm of violence. During that time the native population of the Western Hemisphere declined by as many as 100 million people. Indeed, as historian David E. Stannard argues in this stunning new book, the European and white American destruction of the native peoples of the Americas was the most massive act of genocide in the history of the world. Stannard begins with a portrait of the enormous richness and diversity of life in the Americas prior to Columbus's fateful voyage in 1492. He then follows

the path of genocide from the Indies to Mexico and Central and South America, then north to Florida, Virginia, and New England, and finally out across the Great Plains and Southwest to California and the North Pacific Coast. Stannard reveals that wherever Europeans or white Americans went, the native people were caught between imported plagues and barbarous

atrocities, typically resulting in the annihilation of 95 percent of their populations. What kind of people, he asks, do such horrendous things to others? His highly provocative answer: Christians. Digging deeply into ancient European and Christian attitudes toward sex, race, and war, he finds the cultural ground well prepared by the end of the Middle Ages

for the centuries-long genocide campaign that Europeans and their descendants launched--and in places continue to wage--against the New World's original inhabitants. Advancing a thesis that is sure to create much controversy, Stannard contends that the perpetrators of the American Holocaust drew on the same ideological wellspring as did the later

architects of the Nazi Holocaust. It is an ideology that remains dangerously alive today, he adds, and one that in recent years has surfaced in American justifications for large-scale military intervention in Southeast Asia and the Middle East. At once sweeping in scope and meticulously detailed, American Holocaust is a work of impassioned scholarship that is certain to ignite intense

historical and moral debate. *Eichmann in Jerusalem* Crown Fourteen provocative papers on the oppression of women in capitalist countries, along with three articles on the subordinate position of women in two communist countries, Cuba and China. These important, often path-breaking articles are arranged in five basic sections, the titles of which indicate the broad range of

issues being considered: Introduction; motherhood, reproduction, and male supremacy; socialist feminist historical analysis; patriarchy in revolutionary society; socialist feminism in the United States. The underlying thrust of the book is toward integrating the central ideas of radical feminist thought with those pivotal for Marxist or socialist class analysis. **History of**

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. *Monstrous Imagination* Topeka Bindery "If you liked *Chaos*, you'll love *Complexity*. Waldrop creates the most exciting

intellectual adventure story of the year” (The Washington Post). In a rarified world of scientific research, a revolution has been brewing. Its activists are not anarchists, but rather Nobel Laureates in physics and economics and pony-tailed graduates, mathematicians, and computer scientists from all over the world. They have formed an iconoclastic think-tank and their radical

idea is to create a new science: complexity. They want to know how a primordial soup of simple molecules managed to turn itself into the first living cell—and what the origin of life some four billion years ago can tell us about the process of technological innovation today. This book is their story—the story of how they have tried to forge what they like to call the science of the twenty-first century.

“Lucidly shows physicists, biologists, computer scientists and economists swapping metaphors and reveling in the sense that epochal discoveries are just around the corner . . . [Waldrop] has a special talent for relaying the exhilaration of moments of intellectual insight.” —The New York Times Book Review
 “Where I enjoyed the book was when it dove into the actual

question of complexity, talking about complex systems in economics, biology, genetics, computer modeling, and so on. Snippets of rare beauty here and there almost took your breath away.”
—Medium “[Waldrop] provides a good grounding of what may indeed be the first flowering of a new science.”
—Publishers Weekly Shadow's Stand Harvard University

Press What woeful maternal fancy produced such a monster? This was once the question asked when a deformed infant was born. From classical antiquity through to the Enlightenment , the monstrous child bore witness to the fearsome power of the mother's imagination. What such a notion meant and how it reappeared, transformed, in the Romantic period are the

questions explored in this book, a study of theories linking imagination, art and monstrous progeny.
