 Science & Business Media
 The Ottoman Empire was one of the largest and longest-lasting empires in history—and one of the most culinarily inclined. In this powerful and complex concoction of politics, culture, and cuisine, the production and consumption of food reflected the lives of the empire's citizens from sultans to soldiers. Food bound people of different classes and backgrounds together, defining identity and serving symbolic functions in the social, religious, political, and military spheres. In *Bountiful Empire*, Priscilla Mary

İşin examines the changing meanings of the Ottoman Empire's foodways as they evolved over more than five centuries. İşin begins with the essential ingredients of this fascinating history, examining the earlier culinary traditions in which Ottoman cuisine was rooted, such as those of the Central Asian Turks, Abbasids, Seljuks, and Byzantines. She goes on to explore the diverse aspects of this rich culinary culture, including etiquette, cooks, restaurants, military food, food laws, and food trade. Drawing on everything from archival documents to poetry and featuring more than one hundred delectable illustrations, this meticulously researched, beautiful volume offers fresh and lively insight into an empire and cuisine that until recent

decades have been too narrowly viewed through orientalist spectacles.

Les Vies des hommes illustres de Plutarque, Traduites en François... par M. Dacier... (Supplément... trad. de l'anglais de Thomas Rowe par Bellenger) Hardpress Publishing
 Following Hannibal's crushing victory at the battle of the Trebbia, the reeling Roman Republic sent a new army under the over-confident consul Caius Flaminius to destroy the Carthaginian invaders – unbeknownst to him they were ready and waiting. The destruction of the Roman force at Lake Trasimene firmly established Hannibal as one of the Ancient World's greatest commanders thanks to his use of innovative tactics, including the first recorded use of a turning movement. The

Romans would not send another major army to confront him until the battle of Cannae in 216 BC. This new study, based on recent archaeological work on the battlefield itself, tells the full story of one of Hannibal's greatest victories with the help of maps, full-colour illustrations, and detailed sections on the make-up of the armies and their commanders.

De la Sicile à la Provence Springer Nature Offers a survey of Islamic architecture through essays that discuss how different structures reflect the culture, and profiles with maps, photographs, details, and descriptions of noteworthy buildings.

Petit Larousse illustré Georgetown University Press

This classic volume presents the core vocabulary of everyday life in Morocco--from the kitchen to the mosque, from the hardware store to the natural world of plants and animals. It contains myriad examples of usage, including formulaic phrases and idiomatic expressions. Understandable throughout the nation, it is based primarily on the standard dialect of Moroccans from the cities of Fez, Rabat, and Casablanca. All Arabic citations are in an English transcription, making it invaluable to English-speaking non-Arabists, travelers, and tourists--as well as being an important resource tool for students and scholars in the Arabic language-learning field.

Italian Highways and Byways from a Motor Car Dumbarton Oaks

This book offers a view of shifts in labour relations in various parts of the world over a breathtaking span, from 1500 to 2000, with a particular emphasis on colonial institutions.

Modern Times BoD - Books on Demand Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Monumental epic poem tells the heroic story of Aeneas, a Trojan who escaped the burning ruins of Troy to found Lavinium, the parent city of Rome, in the west.

The Encyclopedia of Motor Sport Michael Joseph

The catalyst for this book is the fact that noted sociologist Charles Tilly, upon his

death in 2008, left one completed chapter of an unfinished manuscript entitled "Cities, States, and Trust Networks," examining the relationships between cities and nation-states over the sweep of history, and in particular the role of trust networks in mediating this relationship. Though this was the catalyst, the book serves a broader purpose: to survey recent frontier work on cities, nation-states, and the relations between the two in historical and contemporary perspective. Essays in the book will address four main themes: city-state relations, trust networks and commitment, democracy and inequality, and the importance of historical legacies in shaping state structures, practices, and capacities. They will be global in scope, with research on the United States, Latin America, Europe, Asia, and Africa; a number of the pieces will be comparative. They will also be interdisciplinary, including works of geography, history, political science, sociology, urban planning. The book addresses several confluent needs of readers. One is to simply update themes addressed in earlier edited work such as *Bringing the State Back In* (1985). A second is to bring together current thinking about cities on the one hand and nation-states on the other, literatures that are often segregated from each other. A third is to perform those two purposes in a way that is global in scope and combines both historical and current analyses, to pull together insights from the full range of human experience.

Histoire generale d'Espagne, comprise en XXXVI livres Reaktion Books

Individual essays discuss Byzantine conceptions of paradise, the textual evidence for monastic horticulture, animal and game parks, herbs in medicinal pharmacy, and the famous illustrated copy of Dioskorides's herbal manual in Vienna. An opening chapter explores questions and observations from the point of view of a non-Byzantine garden historian, and the closing chapter suggests possible directions for future scholarship in the field.

Les vies des hommes illustres de Plutarque, traduites en françois, avec des remarques historiques, par m. Dacier ... Tome premier (-quatorzieme)

Metropolitan Museum of Art

Originally published in 1983 and named one of the Best Books of the Year by *The New York Times*, this bestselling history is now revised and updated and includes a new final chapter. A far-reaching and masterful work, it explores the events, ideas, and personalities of the seven

decades since the First World War.

Aeneid Courier Corporation

This book brings together scholars for their fresh perspectives on religious conversion, transnational migration, economic globalization, and the politics of education, power, and femininity in African Islam in Senegal.

Etruscan Inscriptions Springer

This book covers novel aspects of epilepsy without ignoring its foundation and therefore, apart from the classic issues that cannot be missing in any book about epilepsy, we introduced novel aspects related with epilepsy and neurocysticercosis as a leading cause of epilepsy in developing countries. We are looking forward with confidence and pride in the vital role that this book has to play for a new vision and mission. Therefore, we introduce novel aspects of epilepsy related to its impact on reproductive functions, oral health and epilepsy secondary to tuberous sclerosis, mitochondrial disorders and lisosomal storage disorders.

Mission from Cape Coast Castle to Ashantee Thames & Hudson

The book examines the history of abortion and contraception in Modern Greece from the time of its creation in the 1830s to 1967, soon after the Pill became available. It situates the history of abortion and contraception within the historiography of the fertility decline and the question of whether the decline was due to adjustment to changing social conditions or innovation of contraceptive methods. The study reveals that all methods had been in use for other purposes before they were employed as contraceptives. For example, Greek women were employing emmenagogues well before fertility was controlled; they did so in order to 'put themselves right' and to enhance their fertility. When they needed to control their fertility, they employed abortifacients, some of which were also emmenagogues, while others had been used as expellants in earlier times. Curettage was also employed since the late nineteenth century as a cure for sterility; once couples desired to control their fertility curettage was employed to procure abortion. Thus couples did not need to innovate but rather had to repurpose old methods and materials to new birth control methods. Furthermore, the role of physicians was found to have been central in advising and encouraging the use of birth control for 'health' reasons, thus facilitating and speeding fertility decline in Greece. All this occurred against the backdrop of a state and a church that were at times neutral and at other times

disapproving of fertility control.

Collection des auteurs latins

Amsterdam University Press

This edited volume deals with the understanding of the issues concerned with the pollution caused by toxic elements and heavy metals and their impacts on the different agro-ecosystems as well as the techniques involved in sustainable remediation and amelioration of polluted soils. Furthermore, the book is a detailed comprehensive account for the treatment technologies from unsustainable to sustainable which includes chapters prepared by

professionals with expertise in environmental microbiology, biotechnology, bioremediation, and environmental engineering. It focuses on the characterization, reclamation, bioremediation, and phytoremediation of polluted soils. The research presented also highlights some of the significantly important plant and microbial species involved in remediation, the physiology, biochemistry, and the mechanisms of remediation by various plants and microbes, and suggestions for future improvement of bioremediation

technology. It offers insights into the current focus and recent advances in bioremediation and green technology applications for sustainable soil management.
