The Beginnings of Architecture Nenad Dikić
 Published on February 11, 1984, Salvifici Doloris addresses the question of why God allows suffering. This 30th anniversary edition includes the complete text of the letter plus commentary by Myles N. Sheehan, SJ, MD, a priest and physician trained in geriatrics with an expertise in palliative care. Acknowledgments of recent episodes of violence bring the papal document into a modern context. Insightful questions suited for individual or group use, applicable prayers, and ideas for meaningful action invite readers to personally respond to the mystery of suffering.

The more traditional forms of leadership that are based on static hierarchies and professional distance between leaders and followers are growing increasingly outdated and ineffective. As organizations face more complex interdependent tasks, leadership must become more personal in order to insure open trusting communication that will make more collaborative problem solving and innovation possible. Without open and trusting communications throughout organizations, they will continue to face the productivity and quality problems that result from reward systems that emphasize individual competition and "climbing the corporate ladder". Authors Edgar Schein and Peter Schein recognize this reality and call for a reimagined form of leadership that coincides with emerging trends of relationship building, complex group work, diverse workforces, and cultures in which everyone feels psychologically safe. *Humble Leadership* calls for "here and now" humility based on a deeper understanding of the constantly evolving complexities of interpersonal, group and intergroup relationships that require shifting our focus towards the process of group dynamics and collaboration. *Humble Leadership* at all levels and in all working groups will be the key to achieving the creativity, adaptiveness, and agility that organizations will need to survive and grow.

Everyday Jewish Life in Imperial Russia Ashgate Publishing

In 1604, Pope Clement VIII despatched a delegation of Discalced Carmelites to Persia to exhort Shah Abbas I to join an alliance with him. Thus began almost two hundred years of Carmelite activity in the region. During their time there, the Order not only bore witness to the great Safavid dynasty and its demise: they also amassed a huge written record. Herbert Chick's two impressive volumes present an important collection of these writings. The records provide an unparalleled source of detailed information on the politics, diplomatic rituals, foreign policy concerns, and matters of court ceremony of the time, including correspondence between the Popes and the Shahs. Now extremely rare, the work remains an invaluable resource for scholars. This new edition contains an introduction by Rudi Matthee, an acknowledged authority on Safavid Persia.

Geographical Names According to Urartian Texts Rodopi

In this key textbook, Andres Kasekamp masterfully traces the development of Estonia, Latvia and Lithuania, from the northern crusades against Europe's last pagans and Lithuania's rise to become one of medieval Europe's largest states, to their incorporation into the Russian Empire and the creation of their modern national identities. Employing a comparative approach, a particular emphasis is placed upon the last one hundred years, during which the Baltic states achieved independence, endured occupation by the Soviet Union and Nazi Germany, and transformed themselves into members of the European Union. This is an essential textbook for undergraduate students taking modules on Eastern or Central European History, Communism and Post-Communism, the Soviet Union, or Baltic Culture and Politics. Engaging and accessible, this is also an ideal introduction to the Baltic States for general readers.

On the Christian Meaning of Human Suffering Manchester University Press

Der erste Teil bietet eine kritische Gesamtschau unseres Wissens und zugleich eine Einführung in das Studium der altassyrischen Epoche (die ersten beiden Jahrhunderte des 2. Jahrtausends), wie wir sie durch Entdeckungen in Assur und die Keilschriftarchive der altassyrischen Händler kennen, die in der Handelskolonie (genannt Karum) in der Unterstadt des alten Kanesh (moderne Kültepe) in Zentralanatolien lebten. Die ersten Kapitel bestimmen, was "altassyrisch" ist und analysieren die Chronologie und die verfügbaren archäologischen und schriftlichen Quellen. Darauf folgt eine kritische Darstellung der Veröffentlichungen zu den altassyrischen Quellen. Nach einem Abriss der Altassyrischen Geschichte folgt ein Überblick zur "anatolischen Situation", der die Städte, lokale Herrscher und die rund vierzig altassyrischen Handelsniederlassungen in Nordmesopotamien und Anatolien behandelt. Ein eigenes Kapitel ist den wichtigen altassyrischen Handelsverträgen gewidmet. Der zweite Teil fasst die jüngsten Erkenntnisse zur Geschichte Nordsyriens zeitgleich mit der spätesten Phase des altassyrischen Handels zusammen. Der ausführlichen Untersuchung der Quellen ist ein Appendix der wichtigsten Texte beigefügt. Das Buch ist durch umfassende Indices erschlossen und enthält eine ausführliche Bibliographie.

The History of Mongolia (3 Vols.) Dr Ludwig Reichert

In the span of only seventy years, Estonia first proclaimed its independence, was occupied and deprived of its sovereignty, saw many of its citizens deported, and yet managed to recover its independence. How did this small nation keep its language and traditions alive during half a century of occupation, and how did it maintain such a vivid sense of identity? For the first time in English, this book gives a comprehensive view of the events which shaped the destiny of contemporary Estonia. The Editor, Jean-Jacques Subrenat, has called upon an unusually broad spectrum of the best experts (in history, archeology, political science, genetics, literature), but also on some of the leaders who took part in the rebuilding of Estonia, to offer more than a history, rather a unique testimony on a nation reborn. Estonia: Identity and Independence provides rare insight into the many aspects of a country whose location in Northern Europe, within the European Union, and as a NATO ally, but also as a close neighbour of Russia, deserves the attention of scholars, journalists, and informed readers today. This volume includes a thorough chronology of Estonia (from prehistory to accession to the European Union), and a brief c.v. of each co-author. Estonia: Identity and Independence is also available in three other languages (A. Bertriveau is the pen-name of Jean-Jacques Subrenat, the initiator and Editor of this book): Estonian: 1st and 2nd edition: A. Bertriveau, "Eesti identiteet ja iseseisvus," published by Avita in Tallinn, 2001 and 2002; Russian: A. Bertriveau, "Samoopredelenie i nezavissimost' Estonii," published by Avita in Tallinn, August 2001; French: A. Bertriveau, "Estonie, identite et independance," published by L'Harmattan in Paris, November 2001.

The Poles in America Peter Lang

Humans vs Computers is a book about people caught between wrong assumptions and computer bugs. You'll read about humans who are invisible to computers, how a default password once caused a zombie apocalypse and why airlines sometimes give away free tickets. This is also a book on how to prevent, avoid and reduce the impact of such problems. Our lives are increasingly tracked, monitored and categorised by software, driving a flood of information into the vast sea of big data. In this brave new world, humans can't cope with information overload. Governments and companies alike rely on computers to automatically detect fraud, predict behaviour and enforce laws. Inflexible automatons, barely smarter than a fridge, now make life-changing decisions. Clever marketing tricks us into believing that phones, TV sets and even cars are somehow smart. Yet all those computer systems were created by people - people who are well-meaning but fallible and biased, clever but forgetful, and who have grand plans but are pressed for time. Digitising a piece of work doesn't mean there will be no mistakes, but instead guarantees that when mistakes happen, they'll run at a massive scale. The next time you bang your head against a digital wall, the stories in this book will help you understand better what's going on and show you where to look for problems. If nothing else, when it seems as if you're under a black-magic spell, these stories will at least allow you to see the lighter side of the binary chaos. For people involved in software delivery, this book will help you find more empathy for people suffering from our mistakes, and discover heuristics to use during analysis, development or testing to make your software less error prone. About the author Gojko Adzic is a partner at Neuri Consulting LLP, winner of the 2016 European Software Testing Outstanding Achievement Award, and the 2011 Most Influential Agile Testing Professional Award. Gojko's book *Specification by Example* won the Jolt Award for the best book of 2012, and his blog won the UK Agile Award for the best online publication in 2010. Gojko is a frequent keynote speaker at leading software development conferences and one of the authors of *MindMup* and *Claudia.js*. A. Kirk Grayson presents the texts of the royal inscriptions from the earlier phase of the Neo-Assyrian period, a time in which the Assyrian kings campaigned as far as the Mediterranean and came into direct contact with biblical lands.

Assyrian Rulers of the Early First Millennium BC. Saint-Paul

This is an edition of the Hieroglyphic inscriptions of the Late Hittite states of Turkey and Syria. These inscriptions, surviving largely on stone, include monuments of kings to their reigns and works as well as the humbler memorials of subordinates. A few precious survivals of documents in the form of lead strips give us a different type of document: letters and economic texts. Recent

discoveries have improved the decipherment and understanding of these inscriptions to a point where new and comprehensive translations can be offered, and the presentation of this in English will make them available for the first time to the wide audience of the English-speaking world. At the same time we are in a position to present more reliable texts than those which have appeared in editions hitherto regarded as standard.

The Worst of Crimes Simon and Schuster

Drawing on rich source material in several languages and three scripts (Arabic, Cyrillic, and Latin), this book presents a broad picture of international relations in early modern Eastern Europe, at the crossing point of Genghisid, Islamic, Orthodox, and Latin traditions.
