neuen Elitetruppe der Luftwaffe – den Fallschirmjägern – erfährt, meldet er sich sofort freiwillig. Es folgt ein knochenharter Ausbildungsdrill, an dessen Ende er imstande ist, aus einem funktionierenden Flugzeug direkt ins Feindfeuer zu springen. Schließlich überschlagen sich die Ereignisse auf der politischen Weltbühne. Der Zweite Weltkrieg bricht aus. Und Jansen kämpft als deutscher Fallschirmjäger an allen Fronten. So knacken er und seine Kameraden die »Festung Holland« mit einer verwegenen Luftlandeoperation. Im Frühsommer 1941 nimmt Jansen an der berühmtesten Operation Merkur – der Schlacht um Kreta – teil, bei der

sich die deutsche Fallschirmjägertruppe bewährt, aber auch immense Verluste hinnehmen muss. Es folgen weitere Kampfeinsätze an der Ostfront, in Italien und später an der Westfront, wo der Krieg für Max Jansen schließlich enden soll ...

- Books on Demand

This is the first book to address the subject of German

Fallschirmjäger troops for the figure modeller.

The major items of Fallschirmjäger uniform

and equipment are covered, with an emphasis on specially designed paratrooper items. Clear step-by-step instructions allow the reader to recreate realistic figures in miniature scale with confidence and ease. Among the tutorials covered in this book are face painting, creating complex camouflage patterns, weathering clothing, and figure conversion techniques, as well as vignette and diorama settings for your figures (creating groundwork and balancing composition). The projects featured range from single-figure studies to full-scale dioramas covering all the major periods and theatres of the war. *The 1st Fallschirmjäger Division in World War II*

A rare collection of personal photographs following Nazi Germany's airborne soldiers on their missions through the Balkans, Crete, and Russia. The photos in this book are taken from an unpublished album that belonged to a member of the elite German Paratroopers. First Sgt Wilhelm Plieschen served with Fallschirmjäger Machine Gun Battalion 7, which suffered very heavy losses in the invasion of Crete, then saw bloody conflict as Hitler's "Fire-fighters" on the Russian Front and later put up fierce resistance in places such as Monte Casino. The revealing images that Jon Sutherland has compiled for us depict these struggles in dramatic detail,

ranging from photographs taken en route to Crete of the paratroopers in a JU52 to 20 May 1941, when Plieschen was dropped over Crete. Some show other paratroopers drifting down and others feature formations of German aircraft amidst flak. Additionally, Sutherland has included amazing images depicting Germans on the deck of the badly damaged and abandoned HMS York in Souda Bay. There are photographs showing Major Erich Schulz decorating paratroopers on Crete and the then Commander of the Fallschirmjäger, General Kurt Student, inspecting the troops. We later pay witness to Plieschen in Russia, where outstanding rare

photos of paratroopers in heavy winter camouflage clothing portray the men enduring the heavy fighting that occurred in the region. "This intriguing book for the military historian consists of 125 contemporary photographs of the German Elite paratrooper regiment the Fallschirmjäger during World War II." —HistoryOfWar.org

Although it is known that Allied airborne forces landed into a German buzzsaw on D-Day, far less is known about the troops they encountered in the dark night of June 6, 1944. One of the formations they encountered was a similarly elite group of paratroopers, who instead of dropping from the skies fought on the defensive,

giving their Allied counterparts a tremendous challenge in achieving their objectives. This is the complete wartime history of one of the largest German paratrooper regiments, 6th , from its initial formation in the spring of 1943 to its last day at the end of the war. With numerous firsthand accounts from key members, reporting on their experiences, they describe the events of 1943-45 vividly and without compromise. These accounts reveal previously unknown details about important operations in Italy, Russia, on the Normandy Front, Belgium, Holland, the last German Parachute drop in the Ardennes, and the final battle to the end in Germany.

With over 220 original photographs, many from private collections and never before published, this book fully illustrates the men, their uniforms, equipment and weapons. Also included is an appendix with maps, battle calendar, staffing plans, a list of field and post-MOB-numbers, and the Knight's Cross recipients of the regiment. Having earned the respect of the Allied forces who fought against it during World War II, this work will inform current readers of the full record of Fallschirmjäger Regiment 6, and why the Allied advance into German-held Europe was so painstaking to achieve.

As elite troops, the German Fallschirmjäger (paratroopers) were regularly engaged in front line combat during the Second World War. Their famed actions such as the fighting in Scandinavia, the taking of the Belgian fortress Eden-Emal in May

1940, and the Battle for Crete just a year later, have given them the reputation of being determined, courageous and loyal soldiers. This book covers the early years of the Fallschirmstruppen (paratroop units) before the beginning of the war, until the height of their successes in 1941, after which the Fallschirmjäger were more often deployed in a more 'traditional' way, even though high-risk actions (such as at Monte Cassino, the Gran Sasso Raid) allowed them to reconnect once more with their glorious past. "One cannot even imagine the panic which was caused by rumors of the appearance of parachutists." Field Marshal Kesselring The Fallschirmjäger were the German paratroopers, the elite troops frequently deployed as the vanguard of attacks and as the bulwark of a difficult defence. In 1940 they spearheaded the campaigns Belgium, Holland and France. They also saw action in the battle for Norway, and in the next yeartook part in major

actions in the Balkans and Crete. Airborne operations were curtailed following heavy losses in Crete after which the Fallschirmjäger took part in the final battles for Tunisia and were prominent on both the Eastern Front and most famously in Italy. In 1944 they appeared on the Western Front serving in Normandy, Holland, the Ardennes and Berlin. This fascinating overview compiled by Emmy Award winning author Bob Carruthers draws on rare primary sources, photographs and combat reports to produce a comprehensive overview of the Fallschirmjäger in action. This book is part of 'The Hitler's War Machine' series, a new military history

range compiled and edited by Emmy Award winning author and historian Bob Carruthers. The series draws on primary sources and contemporary documents to provide a new insight into the true nature of Hitler's Wehrmacht. “An enthralling account of how German Special Forces fought to take and hold the key river crossings to allow the main German Army to swarm into France.”—Firetrench
Much has been written about the capture of Fort Eben-Emael in Belgium by German paratroopers, on May 10, 1940. This operation marked the first use of gliders and shaped charges—and proved it possible to drop paratroopers

behind enemy lines. Training, secrecy, accuracy and speed linked to the element of surprise made these men lethal, causing chaos among Belgian soldiers. However, it should be stressed that these paratroopers were part of a larger group: The Sturmabteilung Koch (Koch Assault Group), the elite of the Luftwaffe in 1940, whose mission was not only to take Eben-Emael, but also the three bridges over the Alberto Canal near Veldwezelt, Vroenhoven, and Kanne. The success of the attack on Belgium and France would depend on the rapid conquest of those bridges. The aim of this book is to show how the assault on the Albert Canal bridges

was planned and carried out, based on documents, records and evidence, and also through many photos never published until now. Every detail—from the creation of the Koch Assault Group to the final attack—has been impeccably researched, as well as verified through testimonies of Belgian and German soldiers. “An impressive and beautifully presented book, with a meticulously researched, clear and readable narrative which is generously supported by innumerable photographs, first-hand accounts and a complete list of all those who took part. This must be considered an important addition to

the library of airborne literature.”—Pegasus Archive

Schiffer Military History

In the late 1930's, an aggressive and innovative rearmament program in Nazi Germany gave rise to the tactics of vertical envelopment.

Pioneering the use of gliders as troop carriers, parachutists, and the air landing of reinforcements to exploit tactical success, the German Wehrmacht used the new technique of airborne warfare with startling success as part of the Blitzkrieg campaign against the Low Countries and France in 1940. -When the tactical doctrine used to seize bridges, strong points and road

junctions in Fall Gelb was transferred to the seizure of an entire island that was heavily defended in 1941, however, the German airborne effectively committed suicide. -In ten days in May 1941, half the airborne forces in the entire German army were killed or wounded on Crete. Hitler wrongly ascribed the disaster to a playing out of the surprise factor, and banned further parachute operations until 1943. -The right conclusions were arrived at by the commander of the German airborne himself, General Kurt Student, in post-battle analysis. His own insistence on faulty tactics was devastating... The German innovation of vertical envelopment in

the 1930's was as revolutionary to modern military tactics as the simultaneous development of the integrated combined arms offensive known today as the Blitzkrieg. In putting Billy Mitchell's ideas into practice, Luftwaffe General Student demonstrated vision, innovative thinking and practical military skill. Poor intelligence and reliance on his "spreading oil drops" tactics for the deployment of his paratroopers, the Fallschirmtruppe, on Crete, however, led directly to their removal as a significant weapon from the German arsenal in World War II. A little more than 30,000 men of the Wehrmacht and SS qualified to wear the famed Fallschirmschützenabzeichen, or Paratrooper Badge, between 1936 and 1944. The badges they wore, and the images of the men who wore them, are avidly sought by collectors and historians around the world today. The authors have assembled over 300 indoor and outdoor

posed portrait photographs of the Fallschirmjäger for this volume, most never before published, providing a fascinating representation of the photographers art in World War II and a superb study of their uniforms, badges and insignia. In poses ranging from fierce to thoughtful and even poignant, the German paratroops of World War II are seen here in perfect focus, as they wanted to be seen, preserved in deliberate portraiture for posterity.

The Fallschirmtruppe of the Wehrmacht won recognition for their valor and endurance not only from their fellow German soldiers,

but from their former enemies as well. On the basis of careful and comprehensive research, including utilizing extensive unpublished documentary and personal materials, the author covers the history of the Fallschirmtruppe from its genesis and early training to its employment in combat in Scandinavia, the Albert Canal in Belgium, Holland, the Greek mainland and, of course, at Crete. The reasons for the remarkable successes of the German Fallschirmtruppe during this period are analyzed, as are also the conceptual weaknesses inherent in its formation and the faults in the command and control during its combat employment.

The author, himself a former Bundeswehr Fallschirmjäger and General Staff officer, has also utilized accounts from those who fought the Fallschirmtruppe, and has thus been able to correct many errors perpetuated in previous books on this subject, besides providing more complete coverage. The text is supplemented by approximately 100 b/w photos and more than 25 detailed color maps. This is a remarkably detailed study, firmly based on documentary sources, and is destined to become one of the definitive works on its subject in the English language. This revised edition has been prepared exactly according to the author's instructions.

Based on their combat achievements, friends and foes alike have singled out the men from the German 1st Parachute Division as the best soldiers in World War II, as they at Eben Emael executed the most successful commando raid of the war; on Crete the most audacious attack; and in Monte Cassino the most dogged defense. A total of 129 Knight's Crosses were awarded to men from this division - twice as many as any other German division. For the first time a comprehensive book has been written about the fate of this division based on all available

sources and with the invaluable aide of veterans from the division. It is a warts-and-all tale, which gives a candid insight not only to the battles from the German perspective, but also to the minds of the men who became the backbone of the division. The book contains more than 500 color and black and white photos, many of which have never been printed before. Furthermore, there are thirty unique maps in color, thirty detailed Orders of Battle, 500 short biographies of the key personnel in the division, and a list of all the division's Knight's Cross and the German Cross in Gold winners. _x000D_ _x000D_ The first volume, Years of Attack, follows the
