[Roberto Busa, S. J., and the Emergence of Humanities Computing](#) AuthorHouse

The Transfer Agreement is Edwin Black's compelling, award-winning story of a negotiated arrangement in 1933 between Zionist organizations and the Nazis to transfer some 50,000 Jews, and \$100 million of their assets, to Jewish Palestine in exchange for stopping the worldwide Jewish-led boycott threatening to topple the Hitler regime in its first year. 25th Anniversary Edition.

**Ethical Artificial Intelligence from Popular to Cognitive Science** Cambridge University Press

In their introduction, the editors of *New Ways of Doing Business* assert that in retrospect, it will be apparent that today's government, that of the early years of the 21st century, "was undergoing its most significant transformation since the decade of the 1930's when direct government-delivered services grew significantly as part of the New Deal." This newest volume in the IBM Endowment for the Business of Government series is an invaluable guide to navigating the sometimes controversial changes taking place in the internal operations of government, the delivery of services to citizens, and the delivery of environmental programs. Possibly the most monumental change taking place in our modern government is the lessening allegiance to the old model of in-house, in-departmental performance of tasks. The new model asks "how and by whom can the tasks of government

best be performed?" The answer sometimes lies with another inter-governmental department, leading to an in-house atmosphere of healthy competition and entrepreneurship, and sometimes with outside contractors. *New Ways of Doing Business* provides descriptions and guidelines for successfully navigating management under the new model. There are also dramatic new ways in which services to the public can now be delivered: via the Internet, via contracts with private organizations, and via faith-based initiatives and business improvement districts. Experts provide valuable checklists and guidelines and case studies exploring the merits and disadvantages of these new service delivery routes. Finally, *New Ways of Doing Business* explores what the editors call one of the most highly experimental policy arenas in government, that of the delivery of environmental programs. The authors of these articles explain via case study analysis many of the innovative programs currently in existence, and postulate that the traditional "command-and-control" stance of government to businesses will be superceded by a flexibility that will allow for incre

**L'express international** Dialog Press

*Financing the Flames* pulls the cover off the robust use of US tax-exempt, tax-subsidized, and public monies to foment agitation, systematically destabilize the Israel Defense Forces, and finance terrorists in Israel. In a far-flung investigation in the United States, Israel and the West Bank, human-rights investigative reporter Edwin Black documents that it is actually the highly politicized human rights organizations and NGOs themselves all American taxpayer supported which are financing the flames that make peace in Israel difficult if not impossible. Black spotlights key charitable organizations such as the Ford Foundation, George Soros s Open Society Foundations, the New Israel Fund, and many others, as well as American

taxpayers as a group. Instead of promoting peace and reconciliation between Arabs and Israelis, a variety of taxpayer-subsidized organizations have funded a culture where peace does not pay, but warfare and confrontation do. Ironically, several Jewish organizations, scooping up millions in tax-subsidized donations, stand at the forefront of the problem. At the same time, the author details at great length the laudable and helpful activities of such groups as the New Israel Fund; he chronicles a heartbreaking conflict between stated intent and true impact on the ground. In addition to documenting questionable 501(c)(3) activity, Black documents the direct relationship between taxpayer assistance to the Palestinian Authority and individuals engaged in terrorism against civilians.

This book examines the “who, what, when, where, and how” of elite-white-male dominance in U.S. and global society. In spite of their domination in the United States and globally that we document herein, elite white men have seldom been called out and analyzed as such. They have received little to no explicit attention with regard to systemic racism issues, as well as associated classism and sexism issues. Almost all public and scholarly discussions of U.S. racism fail to explicitly foreground elite white men or to focus specifically on how their interlocking racial, class, and gender statuses affect their globally powerful decisionmaking. Some of the power positions of these elite white men might seem obvious, but they are rarely analyzed for their extraordinary significance. While the principal focus of this book is on neglected research and policy questions about the elite-white-male role and dominance in the system of racial oppression in the United States and globally, because of their positioning at the top of several societal hierarchies the authors periodically address their role and dominance in other oppressive (e.g., class, gender) hierarchies.

*Elite White Men Ruling* Odile Jacob

This is an attempt to renew our links with the oldest traditions of scholarly thinking, but is also a well-tempered reflection on today's work in objectivization. After a deconstruction of the past and present conditions of scientific understanding of human sex-ratio at birth, the authors propose a reconstruction of the dynamics of the phenomenon based on stochastics. Appendices provide information on the first expression of sex ratio trends, as well as a comparison of Darwin's treatments of the subject.

**Gray Zones** Rowman & Littlefield

Triad Commerce Group, LLC presents the full text of an article entitled "Book, Lawsuit Slam IBM's Nazi Ties," by John L. Micek and published February 2001. The article discusses the book by Edwin Black "IBM and the Holocaust: The Strategic Alliance Between Nazi Germany and America's Most Powerful Corporation," which asserts that the German wing of IBM used its Hollerith tabulators to help Adolf Hitler persecute victims of the Holocaust. A lawsuit has also been filed in a U.S. court in Brooklyn, New York, on behalf of five Holocaust victims.

[The Descent of Human Sex Ratio at Birth](#) Routledge

In this book, we have hand-picked the most sophisticated, unanticipated, absorbing (if not at times crackpot!), original and musing book reviews of "IBM and the Holocaust: The Strategic Alliance between Nazi Germany and America's Most Powerful Corporation." Don't say we didn't warn you: these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. You expect to get pregnant in the next five minutes. 3. You've heard it all.

**IBM and the Holocaust** Basic Books

La souffrance des animaux, leur sensibilité d’êtres vivants, est un des plus vieux tabous de l’homme. Dans ce livre iconoclaste – que certains considéreront même comme scandaleux –, mais courageux et novateur, l’historien américain Charles Patterson s’intéresse au douloureux rapport entre l’homme et l’animal depuis la création du monde. Il soutient la thèse selon laquelle l’oppression des animaux sert de modèle à toute forme d’oppression, et la « bestialisation » de l’opprimé est une étape obligée sur le chemin de son anéantissement. Après avoir décrit l’adoption du travail à la chaîne dans les abattoirs de Chicago, il note que Henry Ford s’en inspira pour la fabrication de ses automobiles. Ce dernier, antisémite virulent et gros contributeur au parti nazi dans les années 30, fut même remercié par Hitler dans Mein Kampf. Quelques années plus tard, on devait retrouver cette organisation du « travail » dans les camps d’extermination nazis, où des méthodes étrangement similaires furent mises en œuvre pour tétaniser les victimes, leur faire perdre leurs repères et découper en tâches simples et répétitives le meurtre de masse de façon à banaliser le geste des assassins. Un tel rapprochement est lui-même tabou, étant entendu une fois pour toutes que la Shoah est unique. Pourtant, l’auteur yiddish et prix Nobel de littérature Isaac Bashevis Singer (qui a écrit, dans une nouvelle dont le titre de ce livre est tiré, « pour ces créatures, tous les humains sont des nazis ») fut le premier à oser la comparaison entre le sort réservé aux animaux d’élevage et celui que les hommes ont fait subir à leurs semblables pendant la Shoah. S’inspirant de son combat, Patterson dénonce la façon dont l’homme s’est imposé comme « l’espèce des seigneurs », s’arrogeant le droit d’exterminer ou de réduire à l’esclavage les autres espèces, et conclut son essai par un hommage aux défenseurs de la cause animale, y compris Isaac Bashevis Singer lui-même. « Le livre de Charles Patterson pèsera lourd pour redresser les torts terribles que les hommes, au fil de l’histoire, ont infligés aux animaux. Je vous incite vivement à le lire et à réfléchir à son important message. » Jane Goodall, primatologue « Le défi moral posé par Un éternel Treblinka en fait un livre indispensable pour celui qui cherche à explorer la leçon universelle de la Shoah. » Maariv, journal israélien

**The Digital Flood** Fortress Press

How computational methods can expand how we see, read, and listen to Holocaust testimony The Holocaust is one of the most documented—and now digitized—events in human history. Institutions and archives hold hundreds of thousands of hours of audio and video testimony, composed of

more than a billion words in dozens of languages, with millions of pieces of descriptive metadata. It would take several lifetimes to engage with these testimonies one at a time. Computational methods could be used to analyze an entire archive—but what are the ethical implications of “listening” to Holocaust testimonies by means of an algorithm? In this book, Todd Presner explores how the digital humanities can provide both new insights and humanizing perspectives for Holocaust memory and history. Presner suggests that it is possible to develop an “ethics of the algorithm” that mediates between the ethical demands of listening to individual testimonies and the interpretative possibilities of computational methods. He delves into thousands of testimonies and witness accounts, focusing on the analysis of trauma, language, voice, genre, and the archive itself. Tracing the affordances of digital tools that range from early, proto-computational approaches to more recent uses of automatic speech recognition and natural language processing, Presner introduces readers to what may be the ultimate expression of these methods: AI-driven testimonies that use machine learning to process responses to questions, offering a user experience that seems to replicate an actual conversation with a Holocaust survivor. With *Ethics of the Algorithm*, Presner presents a digital humanities argument for how big data models and computational methods can be used to preserve and perpetuate cultural memory.

*Suite Francese - L'Amore Senza Confini* HarperCollins

The year was 1932. At age fourteen Robert Beir's journey through life changed irrevocably when a classmate called him a “dirty Jew.” Suddenly Beir encountered the belligerent poison of anti-Semitism. The safe confines of his upbringing had been violated. The pain that he felt at that moment was far more hurtful than any blow. Its memory would last a lifetime. Beir's experiences with anti-Semitism served as a microcosm for the anti-Semitism among the majority of Americans. That year, a politician named Franklin Delano Roosevelt ascended to the presidency. Over the next twelve years, he became a scion of optimism and carried a refreshing, unbridled confidence in a nation previously mired in fear and deeply depressed. His policies and ethics saved the capitalist system. His strong leadership and unwavering faith helped to defeat Hitler. The Jews of America revered President Roosevelt. To a young Robert Beir, Roosevelt was an American hero. In mid-life, however, Beir experienced a conflict. New research was questioning Roosevelt's record regarding the Holocaust. He felt compelled to embark on a historian's quest, asking only the toughest questions of his childhood hero, including: • How much did President Roosevelt know about the Holocaust? • What could Roosevelt have done? • Why wasn't there an urgent rescue effort? In answering these questions and others, Robert Beir has done a masterful job. This book is graphically written, well-researched, and provocative. The portrait depicted of a man he once thought to be morally incorruptible amidst a circumstance of moral bankruptcy is truly unforgettable.

*IBM en de Holocaust* John Wiley & Sons

An investigative journalist peels back the lid on a shameful century of mass sterilization and human breeding programs in the U.S. that began in 1904 with a large-scale eugenics movement, a movement that has been reborn in the modern era with the rise of genetics and human engineering. Reprint.

*IBM und der Holocaust* Self-Publish

"Nazi Nexus" is the single explosive volume that details the pivotal corporate American connection to the Holocaust. The work includes some of the biggest names in business from IBM and General Motors to the Rockefeller Foundation and the Carnegie Institution.

*Financing the Flames* U of Minnesota Press

“Powerful memoir. . . Ford's thought-provoking narrative tells the story of African-American pride and perseverance.” –Publisher's Weekly (Starred) “A masterful storyteller, Ford interweaves his personal story with the backdrop of the social movements unfolding at that time, providing a revealing insider's view of the tech industry. . . simultaneously informative and entertaining. . . A powerful, engrossing look at race and technology.” –Kirkus Review (Starred) In this thought-provoking and heartbreaking memoir, an award-winning writer tells the story of his father, John Stanley Ford, the first black software engineer at IBM, revealing how racism insidiously affected his father's view of himself and their relationship. In 1947, Thomas J. Watson set out to find the best and brightest minds for IBM. At City College he met young accounting student John Stanley Ford and hired him to become IBM's first black software engineer. But not all of the company's white employees refused to accept a black colleague and did everything in their power to humiliate, subvert, and undermine Ford. Yet Ford would not quit. Viewing the job as the opportunity of a lifetime, he comported himself with dignity and professionalism, and relied on his community and his "street smarts" to succeed. He did not know that his hiring was meant to distract from IBM's dubious business practices, including its involvement in the Holocaust, eugenics, and apartheid. While Ford remained at IBM, it came at great emotional cost to himself and his family, especially his son Clyde. Overlooked for promotions he deserved, the embittered Ford began blaming his fate on his skin color and the notion that darker-skinned people like him were less intelligent and less capable—beliefs that painfully divided him and Clyde, who followed him to IBM two decades later. From his first day of work—with his wide-lapelled suit, bright red turtleneck, and huge afro—Clyde made clear he was different. Only IBM hadn't changed. As he, too, experienced the same institutional racism, Clyde began to better understand the subtle yet daring ways his father had fought back.

**New Ways of Doing Business** Taylor & Francis

When Thomas Watson, Sr., was hired to run IBM in 1914, financial strains were so great that company policy was to pay no bills that weren't at least 6 months overdue. In the next 40 years he and his son turned the company into the most successful company in the world.

**War Against the Weak** Princeton University Press

In this book it explores science and technology, makes connections between these epistemic, cultural, and political trends, and develops profound insights into the nature of our postmodernity.

*Alternative Historiographies of the Digital Humanities* Routledge

The Nazis needed oil. The Arabs wanted the Jews and British out of Iraq. The Mufti of Jerusalem forged a far-ranging alliance with Hitler resulting in the June 1941 Farhud, a Nazi-style pogrom in Baghdad that set the stage for the devastation and expulsion of the Iraqi Jews and ultimately almost a million Jews across the Arab world. The Farhud was the beginning of what became a broad Nazi-Arab alliance in the Holocaust.

[The Transfer Agreement](#) Lennex

Future of the Prophetic argues that in the persistence of the prophetic, the legacy of the ancient Jewish world spread beyond the boundaries of the Jewish community and took root throughout the world. As a way of wisdom and hope, this dual rooting—its grounding in the tradition of ancient Israel and its uncontained itinerancy—unveils a startling but promising new context: a re-presentation of the prophetic from outside the Jewish world to the Jewish community. The new situation of contemporary prophetic challenges the fixed religious landscape by reversing traditional boundaries, eschewing power and privilege, and brokering peace through solidarity and common struggle in ecumenical and interfaith contexts.

**IBM y el holocausto** McGraw-Hill Companies

An in-depth look at how The New York Times failed in its coverage of the fate of European Jews from 1939–45. It examines how the decisions that were made at The Times ultimately resulted in the minimizing and misunderstanding of modern history's worst genocide. Laurel Leff, a veteran journalist and professor of journalism, recounts how personal relationships at the newspaper, the assimilationist tendencies of The Times' Jewish owner, and the ethos of mid-century America, all led The Times to consistently downplay news of the Holocaust. It recalls how news of Hitler's 'final solution' was hidden from readers and - because of the newspaper's influence on other media - from America at large. Buried by The Times is required reading for anyone interested in America's response to the Holocaust and for anyone curious about how journalists determine what is newsworthy.
