Publisher Description

*Journal de Son Voyage a la Cour de Henri Iv en 1607 Et Sa Biographie.* John Wiley & Sons

Using plant material as raw materials for construction is a relatively recent and original topic of research. This book presents an overview of the current knowledge on the material properties and

environmental impact of construction materials made from plant particles, which are renewable, recyclable and easily available. It focuses on particles and as well on fibers issued from hemp plant, as well as discussing hemp concretes. The book begins by setting the environmental, economic and social context of agro-concretes, before discussing the nature of plant-based aggregates and binders. The formulation, implementation and mechanical behavior of such building materials are the subject of the following chapters. The focus is then put upon the hygrothermal behavior and acoustical properties of hempcrete, followed by the use of plant-based concretes in structures. The book concludes with the study of life-cycle analysis (LCA) of the environmental characteristics of a banked hempcrete wall on a wooden skeleton. Contents 1. Environmental, Economic and Social Context of Agro-Concretes, Vincent Nozahic and Sofiane Amziane. 2. Characterization of Plant-Based Aggregates. Vincent Picandet. 3. Binders, Gilles Escadeillas, Camille Magniont, Sofiane Amziane and Vincent Nozahic. 4. Formulation and Implementation,

Christophe Lanos, Florence Collet, Gérard Lenain and Yves Hustache. 5. Mechanical Behavior, Laurent Arnaud, Sofiane Amziane, Vincent Nozahic and Etienne Gourlay. 6. Hygrothermal Behavior of Hempcrete, Laurent Arnaud, Driss Samri and Étienne Gourlay. 7. Acoustical Properties of Hemp Concretes, Philippe Glé, Emmanuel Gourdon and Laurent Arnaud. 8. Plant-Based Concretes in Structures: Structural Aspect - Addition of a Wooden Support to Absorb the Strain, Philippe Munoz and Didier Pipet. 9. Examination of the Environmental Characteristics of a Banked Hempcrete Wall on a Wooden Skeleton, by Lifecycle Analysis: Feedback on the LCA Experiment from 2005, Marie-Pierre Boutin and Cyril Flamin. About the Authors Sofiane Amziane is Professor and head of the Civil Engineering department at POLYTECH Clermont-Ferrand in France. He is also in charge of the research program dealing with bio-based building materials at Blaise Pascal University (Institut Pascal, Clermont Ferrand, France). He is the secretary of the RILEM Technical Committee 236-BBM dealing with bio-based building materials and the author or co-author of over one

hundred papers in scientific journals such as Cement and Concrete Research, Composite Structures or Construction Building Materials as well as international conferences. Laurent Arnaud is a Bridges, Waters and Forestry Engineer (Ingénieur des Ponts, Eaux et Forêts) and researcher at Joseph Fourier University in Grenoble, France. He is also Professor at ENTPE (Ecole Nationale des Travaux Publics de l'Etat). Trained in the field of mechanical engineering, his research has been directed toward the characterization and development of new materials for civil engineering and construction. He is head of the international committee at RILEM - BBM, as well as the author of more than one hundred publications, and holder of an international invention patent.

«Основные задачи математической физики» Владимир Стеклов – значимая работа выдающегося ученого, вошедшая в книжную серию «Математика». Книги серии «Математика» открывают любознательным читателям содержание различных разделов математической науки. Эти книги будут полезны и интересны широкому кругу читателей: учителям, студентам, школьникам и всем, кто увлекается математикой.

A New French Dictionary, in two parts ... French and English ... English and French

... To which is prefixed, a French grammar ... The third edition, carefully revised ... by Mr. Des Carrières

This book includes some selected presentations given at the 3rd International Congress on Neo-Adjuvant Chemotherapy which was held in Paris from February 6th to February 9th, 1991. It was attended by over 2000 physicians from around the world and by 700 nurses. Its organisation was saddened by the untimely death of Professor Claude Jacquillat on October 12th, 1990. It was further complicated in January and February 1991 by the gulf events which led some guests to cancel their participation. However with the outstanding help of the two presidents chosen by Claude Jacquillat before his death, Pierre Banzet from Paris and James F. Holland from New York, the organizers could set up an exciting meeting confirming the impact of neo-adjuvant chemotherapy on relatively new indications such as non-small lung cancers, bladder cancer, esophageal cancer, cervical cancer, etc ... It is noteworthy that a contradictory debate on primary chemotherapy in non-small lung cancer

turned into a consensus conference. In breast cancer, the downstaging induced by primary chemotherapy is acknowledged by all and the conviction that Jacquillat defended so heartily that breast preservation should be proposed to all patients with breast cancer whatever their tumour size is shared now by more and more people. A special emphasis was given to new drugs, new combination, new access (locoregional therapy) and new developments such as that of growth factors and of interleukin 2.
