This collection of essays gathers contributions from leading international lawyers from different countries, generations and angles with the aim of highlighting the multifaceted history of international law. This volume questions and analyses the origins and foundations of the international legal system. A particular attention is devoted to Hugo Grotius as one of the founding fathers of the law of nations. Several contributions further question the positivist tradition initiated by Vattel and endorsed by scholars of the 19th Century. This immersion in the intellectual origins of international law is enriched by an inquiry into the practice of the law of nations, including its main patterns and changing evolution as well as the role of non-western traditions and the impact of colonization. Le présent ouvrage réunit les contributions de juristes internationaux reconnus en vue d'éclairer les multiples facettes de l'histoire du droit international public. L'ouvrage analyse et questionne les origines et les fondements de l'ordre juridique international. Une attention toute particulière est dédiée à Hugo Grotius l'un des pères fondateurs du droit international. D'autres contributions questionnent également la tradition positiviste initiée par Vattel et confortée par la doctrine du 19ème siècle. Cette immersion dans les origines doctrinales du système juridique

international est enrichie par l'étude de la pratique du droit international public, son évolution ainsi que le rôle des traditions non-occidentales et l'impact de la colonisation.

This book serves to shed some light on several controversial questions about contemporary interventions on religious heritage buildings. In the mid-1960s, a process of renewal of Catholic churches began, which sought to respond to the liturgical modifications implemented

during the Vatican II (1962-65). Fifty years later, this process continues to be problematic in buildings with a high heritage or historical value. From an operational point of view, it is stimulating to revisit the most relevant architectures at the international level, those high-impact works that were generated thanks to an open and serene dialogue between principals, architects, users, artists and patrimonial leaders. Thus, it is essential to know the criteria that have supported interventions, whether legal (both ecclesiastical and civil), architectural, artistic, liturgical or pastoral. In this sense, what references could be used at a time like ours? How can we reform what has already been reformed?

La première édition 2007 du « Traité de droit administratif européen » se voulait un point de départ au développement de la science du droit administratif européen dans la littérature francophone. Sa troisième édition 2022 entièrement actualisée est aujourd'hui devenue une référence pour de nombreux praticiens. Elle s'inscrit dans la continuité des éditions précédentes en mettant en lumière les deux séries majeures d'éléments constitutifs du droit administratif européen : • la part du droit de l'Union européenne qui concerne la mise en oeuvre des législations et des politiques communes, • l'influence que le droit de l'Union européenne exerce sur les droits administratifs nationaux, parce qu'ils forment des instruments de la mise en oeuvre des législations et des politiques communes. L'ouvrage est composé de plus de quarante contributions. La plupart représente une actualisation de

celles présentées en 2007, tenant compte des développements les plus récents. D'autres sont inédites, et rendent compte de l'évolution profonde de la matière et de son enrichissement constant. Cette troisième édition marque une nouvelle étape dans l'étude de cette science du droit administratif européen, dont l'intérêt ne cesse de grandir.

Praise for volume 1: "[...] The authors have taken advantage of the retrospection inherent in this volume to provide perspective that may not be available in the instant commentaries. Thus, the bilingual volume will be useful

both to readers needing a quick summary of a WTO decision and to specialists seeking to trace through the development of the rapidly evolving WTO jurisprudence." - Steve Charnovitz, in: *The American Journal of International Law*, Volume 98

Professor David Pugsley is a man of many talents as well as a paradox. Although he may appear to some to be typically English, this is to overlook his cosmopolitan side. David Pugsley is a well known English Romanist and comparative lawyer who taught for many years at Exeter University, as well as in many other places in the world. In this book, specially dedicated to him, his friends and colleagues pay tribute through a series of papers on comparative law and the history of law. Le Professeur David Pugsley, homme aux multiples talents, incarne un paradoxe. Pur produit de l'intelligentia britannique, de prime abord, on le découvre farouchement cosmopolite. David Pugsley est bien connu comme un spécialiste anglais du droit romain; il est aussi un juriste renommé en droit comparé. Il a enseigné durant de nombreuses années à l'Université d'Exeter, ainsi qu'en de nombreux endroits dans le monde. Dans cet ouvrage, ses amis et collègues lui rendent hommage, au travers d'une série de contributions dans les domaines du droit comparé et de l'histoire du droit qui lui sont particulièrement chers. Le mécanisme de règlement des différends de l'O.M.C. se distingue des autres juridictions internationales en ce qu'il comporte un ensemble sophistiqué de procédures spécifiquement et exclusivement destinées à traiter les désaccords pouvant surgir au cours de l'exécution de l'obligation qui résulte pour un Membre de la décision juridictionnelle qui déclare sa responsabilité. Leur existence même et la façon dont les organes de jugement s'acquittent de leur mission témoignent de ce que l'exécution des obligations résultant des actes juridictionnels dans l'ordre international n'échappe pas fatalement au droit. Ainsi, le système de l'O.M.C. exprime mais aussi réalise une ambition singulière en droit international

: renforcer la garantie de la légalité en habilitant la juridiction à encadrer, contrôler, et, en définitive, participer à assurer l'exécution de ses propres décisions. The WTO dispute settlement system has created a sophisticated set of procedures designed with the sole purpose of dealing with all disagreements that can arise between the parties during the implementation process. The very existence of these procedures, and the manner in which the adjudicative bodies accomplish their task, give evidence of the fact that compliance with judgments in the international legal order does not inevitably lie outside the realm of the law. The WTO system thereby expresses but also fulfills a strong ambition, unique when considered through the lens of international law: strengthening the rule of law by vesting the adjudicative bodies with the task of supervising, reviewing, and ultimately contributing to inducing and enforcing compliance with their own judgments.

This volume offers a unique reflection on the historic and contemporary influence of the New Approaches to International Law (NAIL) movement within the context of Europe and America. In particular, the contributions focus on the intellectual product of NAIL's founder, David Kennedy, in relation to three legal streams: human rights, legal history, and the law of war. On the one hand, the volume is valuable reading for a broad audience interested in the current challenges facing global governance, and how critical studies might contribute to innovative intellectual and practice-oriented developments in international law. On the other hand, stemming from a 2010 seminar in Madrid that brought together scholars to discuss David

Kennedy's scholarship over the last three decades, the contributions here are a testament to the community and ideas of the NAIL tradition. The volume includes scholars from a wide field of legal interests and backgrounds.

This volume provides the first comprehensive analysis of international legal debates between 1955 and 1975 related to the formal decolonization process. It is during this era, couched between classic European imperialism and a new form of US-led Western hegemony, that fundamental legal debates took place over a new international legal order for a decolonised world. The book argues that this era presents in essence a battle, a battle that was fought out in particular over the premises and principles of international law by diplomats, lawyers, and scholars. In a moment of relative weakness of European powers, 'newly independent states' and international lawyers from the South fundamentally challenged traditional Western

perceptions of international legal structures engaging in fundamental controversies over a new international law. The legal outcomes of this battle have shaped the world we live in today. Contributions from a global set of authors cover contemporary debates on concepts central to the time, such as self-determination, sources and concessions, non-intervention, wars of national liberation, multinational corporations, and the law of the sea. They also discuss influential institutions, such as the United Nations, International Court of Justice, and World Bank. The volume also incorporates contemporary regional approaches to international law in the 'decolonization era' and portraits of important scholars from the Global South.

No other scholar has so deeply influenced the development of international law or shaped the doctrinal debates as Vattel. More than 250 years after its publication, his Law of Nations has remained the most frequently quoted treatise of international law. Vattel's International Law from a XXIst Century Perspective explores the reasons behind the extraordinary authority of Vattel and analyses its continuing relevance for thinking and understanding contemporary international law. It gathers the contributions from well-known experts of international law and history for the purpose of evaluating the Law of Nations from a XXIst century perspective. The multiple facets of Vattel's thinking are apprehended through a wide-ranging and comprehensive analysis respectively devoted to the international system, the sources of international law, the subjects of international law, the law of peace, and the law of war.

Recueil Des Cours BRILL

L'institutionnalisation et l'organisation d'un ordre juridique sur un mode représentatif impliquent un processus de différenciation fonctionnelle entre représentés et représentants permettant la réduction de la multiplicité à l'unité. La personne morale apparaît comme le terme réunificateur de tout système représentatif. Dans l'ordre international, ce processus est perturbé par la présence, dans les organes intergouvernementaux, de représentants d'Etat qui sont autant d'organes des Etats membres, présence prolongée par le consentement aux actes adoptés en leur sein. Quel en est donc le sujet d'imputation : l'organisation ou ses membres ? Une théorie de l'acte doit être développée au cœur de la théorie de l'organe pour démontrer que l'organisation internationale est la personnification juridique d'une collectivité d'Etats dotée d'un système représentatif, et n'est que cela. La qualité de partie à un traité constitutif et de membre d'une organisation internationale ne prive l'Etat d'aucun des attributs de la souveraineté dans l'ordre international. Au contraire, la faculté d'investir un sujet de droit de

compétences nouvelles est précisément un attribut de la souveraineté : l'organisation est tout entière une création des Etats membres. Leur souveraineté n'inhibe pas le processus de personnification de l'organisation qui, en retour, ne la confisque pas : la souveraineté et la relativité des rapports juridiques demeurent les principes régulateurs de l'ordre international.

This work applies discourse analysis to investment awards and WTO reports to

unveil the narratives behind the use of unwritten law. Adopting a CLS and Neo-Gramscian approach, this linguistic inquiry studies the neoliberal and hegemonic structures of international economic adjudication. Cette étude développe une analyse du discours du juge de l'OMC et de l'arbitre de l'investissement portant sur le droit non écrit. En employant une approche critique et néo-gramscienne, elle s'intéresse aux structures néolibérales et hégémoniques du contentieux international économique.
