Digital Triage Forensics: Processing the Digital Crime Scene provides the tools, training, and techniques in Digital Triage Forensics (DTF), a procedural model for the investigation of digital crime scenes including both traditional crime scenes and the more complex battlefield crime scenes. The DTF is used by the U.S. Army and other traditional police agencies for current digital forensic applications. The tools, training, and techniques from this practice are being brought to the public in this book for the first time. Now corporations, law enforcement, and consultants can benefit from the unique perspectives of the experts who coined Digital Triage Forensics. The text covers the collection of digital media and data from cellular devices and SIM cards. It also presents outlines of pre- and post- blast investigations. This book is divided into six chapters that present an overview of the age of warfare, key concepts of digital triage and battlefield forensics, and methods of conducting pre/post-blast investigations. The first chapter considers how improvised explosive devices (IEDs) have changed from basic booby traps to the primary attack method of the insurgents in Iraq and Afghanistan. It also covers the emergence of a sustainable vehicle for prosecuting enemy combatants under the Rule of Law in Iraq as U.S. airmen, marines, sailors, and soldiers perform roles outside their normal military duties and responsibilities. The remaining chapters detail the benefits of DTF model, the roles and responsibilities of the weapons intelligence team (WIT), and the challenges and issues of collecting digital media in battlefield situations. Moreover, data collection and processing as well as debates on the changing role of digital forensics investigators are explored. This book will be helpful to forensic scientists, investigators, and military personnel, as well as to students and beginners in forensics. - Includes coverage on collecting digital media - Outlines pre- and post-blast investigations - Features content on collecting data from cellular devices and SIM cards

SAS Tracking Handbook Prepper Press

A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

The Evolution of US Army Tactical Doctrine, 1946-76 WaterBrook
In "Our Finest Day," the bestselling author of "Black Hawk Down" reveals the human faces behind D-Day, using reproductions of personal letters, poignant journal entries from soldiers, secret dispatches and pages from code books, and strategic battle plans and maps. Interactive pull-out historical documents.

Have you ever wondered what would happen if the grid went dark for more than a week? In the last decade we've seen this happen several times. Between hurricanes, tornadoes, wild fires, and earth quakes, one thing is astonishingly clear - Most people have NO backup plan. Are you one of the few that does have enough water and propane to hold out? What happens to those that do save enough supplies? When people run out of basic necessities, they will do things they aren't ordinary capable of. That includes pillaging and plundering their neighbor's home to keep their own family fed. What have you done to secure your home? In my book *Prepping: Booby Traps and Hunkering Down*, we're going to cover the following: Booby Traps and Prepping Your Property Trip Wires External Deterrents Internal Perimeter Deterrents Internal Deterrents Building A Safe Room

Kim doesn't hesitate when a stranger offers her a small fortune to break into the travelling magician's wagon in search of a silver bowl. Kim isn't above a bit of breaking-and-entering. Having grown up a waif in the dirty streets of London-disguised as a boy!-has schooled her in one hard lesson: steal from them before they steal from you. But there is something odd about this magician. He isn't like the other hucksters and swindlers that Kim is used to. When he catches her in the act, Kim thinks she's done for--until he suggests she become his apprentice. Kim wonders how tough it could be faking a bit of hocus pocus. But Mairelon isn't an act. His magic is real. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

299 Days: The Preparation ReadHowYouWant.com

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Have you ever wondered what would happen if... You could not rely on modern technology to obtain food? You had to create fishing and hunting tools from scratch? Your family was counting on you to protect them? Learn How To Create Basic Weapons For Hunting, Fishing, And Self Defense Now! This is a short book that was written for anyone with an interest in making their own weapons for hunting, fishing, and self defense when surviving in the wild. All eight of the weapons described in this e-book can be made inexpensively and easily, both for the die-hard survivalists, and the average camper who wants to be able to catch their own food and protect themselves if necessary. As you'll learn, there are many different make weapons for hunting, fishing, and self defense. But make sure you apply what you learn from this book!
LDS Preparedness Manual Hachette UK

Sanger Rainsford is a big-game hunter, who finds himself washed up on an island owned by the eccentric General Zaroff. Zaroff, a big-game hunter himself, has heard of Rainsford's abilities with a gun and organises a hunt. However, they're not after animals - they're after people. When he protests, Rainsford the hunter becomes Rainsford the hunted. Sharing similarities with "The Hunger Games", starring Jennifer Lawrence, this is the story that created the template for pitting man against man. Born in New York, Richard Connell (1893 - 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel "The Most Dangerous Game" and for receiving an Oscar nomination for the screenplay "Meet John Doe".

The Antichrist JHU Press

'This is BRAVO TWO ZERO meets ONE FLEW OVER THE CUCKOO'S NEST. Tom Read's story had me on the edge of my seat. It also made me cry.' Andy McNab A former member of the British Parachute Regiment, Tom Read was preparing to freefall from more than 23 miles above the earth to become the first man to

punch a hole through the sound barrier unassisted. It didn't work out that way. From his hospital bed in a French sanatorium, Tom began to review his life in an attempt to trace the roots of his madness: the tough childhood, moving from place to place; joining the Parachute Regiment at seventeen and confronting riots, IRA snipers and booby-traps; doing more than 1,000 jumps with the Red Devils and the first ever Parachute drop onto the Falklands; and the high-altitude work that may have created a chemical imbalance in his brain. Weaving backwards and forwards between a haunting present and a remarkable past FREEFALL is an unrelentingly suspenseful account of an amazing life. 'Extraordinary' Mail on Sunday 'A courageous book' The Times

Deviance and Deviants Houghton Mifflin Harcourt

This paper focuses on the formulation of doctrine since World War II. In no comparable period in history have the dimensions of the battlefield been so altered by rapid technological changes. The need for the tactical doctrines of the Army to remain correspondingly abreast of these changes is thus more pressing than ever before. Future conflicts are not likely to develop in the leisurely fashions of the past where tactical doctrines could be refined on the battlefield itself. It is, therefore, imperative that we apprehend future problems with as much accuracy as possible. One means of doing so is to pay particular attention to the business of how the Army's doctrine has developed historically, with a view to improving methods of future development.

U.S. Army Guide to Boobytraps Macmillan

With fiercely detailed information and visuals provided by the U.S. Army, U.S. Army Special Forces Guide to Unconventional Warfare is meant for experienced soldiers and novices alike. With this guide, you will be able to apply its material to understand and create initiators, igniters, and incendiary materials. The vast table of contents includes coverage on napalm, gelled gasoline, fire fudge, silver nitrate, concentrated sulfuric acid, fuse cords, delay mechanisms, and spontaneous combustion. Filled with special forces secrets, U.S. Guide to Unconventional Warfare is an invaluable tool for any provocateur-in-training and an invitation to look at how our special forces are fighting our enemies overseas. Skyhorse Publishing is proud to publish a range of books for readers interested in military tactics and skills. We publish content provided by or of interest to the U.S. Army, Army

Rangers, the U.S. Navy, Navy SEALs, the U.S. Air Force, the U.S. Marine Corps, and the Department of Defense. Our books cover topics such as survival, emergency medicine, weapons, guns, weapons systems, hand-to-hand combat, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

House to House Lulu.com

The viral video star behind Dude Dad offers a humorous and heartfelt guide to helping expectant fathers survive and thrive during the wild ride that is forty weeks of pregnancy. Numerous apps and books exist to help expectant parents understand their baby's development by comparing their unborn child to a raspberry or a stalk of broccoli, but Taylor Calmus takes issue with that. First off, your baby is not some wimpy little vegetable. Your baby is a hardcore little lug nut who is straight-up growing organs on a weekly basis. Second, how big is a stalk of broccoli? And what the heck is a kumquat? Clearly this situation calls for a better approach. Enter . . . A Dude's Guide to Baby Size. • At week nine, your little shredder resembles the circumference of a guitar pick. • At week twenty-four, your budding jalapeño is the size of some concession-stand nachos. • By week thirty-four, your little lopper is now the size of a sixteen-inch largemouth bass that weighs four to five pounds! This book is full of fun facts about your growing baby, advice on how to help Mom-to-be, as well as ideas and encouragement for you on your journey from Dude to Dude Dad. Buckle up for a wild ride full of maternity metaphors, gnarly playlists for all the special occasions, new parenting tales, dos and don'ts for expecting dads, and even an entire chapter dedicated to beef brisket!

The Trapper's Bible Hot Key Books

Demetra Brodsky's Last Girls is a twisting, suspenseful YA thriller about sisterhood, survival, and family secrets set in the world of doomsday prepping. No one knows how the world will end. On a secret compound in the Washington wilderness, Honey Juniper and her sisters are training to hunt, homestead, and protect their own. Prepare for every situation. But when danger strikes from within, putting her sisters at risk, training becomes real life, and only one thing is certain: Nowhere is safe. On 8 November 2004, the largest battle of the War on Terror began, with the US Army's assault on Fallujah and its network of tens of thousands of insurgents hiding in fortified bunkers, on rooftops, and inside booby-trapped houses. For Sgt. David Bellavia of 3rd Platoon, Alpha Company, it quickly turned into a battle on foot, from street to street and house to house. On the second day, he and his men laid siege to a mosque, only to be driven to a rooftop and surrounded, before heavy artillery could smash through to rescue them. By the third day, Bellavia charges an insurgent-filled house and finds himself trapped with six enemy fighters. One by one, he shoots, wrestles, stabs, and kills five of them, until his men arrive to take care of the final target. It is one of the most hair-raising battle stories of any age -- yet it does not spell the end of Bellavia's service. It would take several more weeks before the Battle of Fallujah finally came to a close, with Bellavia, miraculously, alive. In the words of the author: "HOUSE TO HOUSE holds nothing back. It is a raw, gritty look at killing and combat and how men react to it. It is gut-wrenching, shocking and brutal. It is honest. It is not a glorification of war. Yet it will not shy from acknowledging this: sometimes it takes something as terrible as war for the full beauty of the human spirit to emerge."

LIMA-3 Hachette+ORM

In 2004-2006, the U.S. government acted to revise the way that the planning and implementation of Stabilization, Security, Transition, and Reconstruction (SSTR) operations are conducted. The primary emphasis of the changes was on ensuring a common U.S. strategy rather than a collection of individual departmental and agency efforts and on mobilizing and involving all available U.S. government assets in the effort. The proximate reason for the policy shift stems from the exposing of gaps in the U.S. ability to administer Afghanistan and Iraq after the U.S.-led ousters of the Taliban and Ba'athist regimes. But the effort to create U.S. government capabilities to conduct SSTR operations in a more unified and coherent fashion rests on the deeper conviction that,

as part of the U.S. strategy to deal with transnational terrorist groups, the United States must have the capabilities to increase the governance capacities of weak states, reduce the drivers of and catalysts to conflict, and assist in peacebuilding at all stages of pre- or post-conflict transformation. According to the Joint Operating Concept for Military Support to SSTR operations, these operations are civilian-led and conducted and coordinated with the involvement of all the available resources of the U.S. government (military and civilian), nongovernmental organizations (NGOs), and international partners. Although military assets are an essential component of many SSTR operations, specific military goals and objectives are only a portion of the larger SSTR operation.

Preparing to Survive Paladin Press

A booby trap is simply any device that is designed to detect, injure, kill, or simply to scare an intruder (or intruders). You can set up booby traps around your home and property to defend it against thieves, raiders, and looters during a disaster scenario. Now in your day-to-day life right now, it's absolutely critical that any booby traps you have set up around your home are non-lethal. But in a disaster scenario, where there will be desperate people who will try to kill you for the supplies you have, you can use lethal booby trap defensive weapons to defend your home, property, family, and supplies. In this guide, we are going to cover the top ten booby traps and a step-by-step process for how to build each one. The specific booby traps that we will cover in this book include: Personal Alarm Tripwire Blast Alarm Trap Entanglement Trap Nail Board Trap Feather Spear Trap Heavy Weight Trap Razor Blade Trap Fish Hook Trap Chemical Bucket Drop Trap Tripwire Trap By the end of this book, you will not only know about the top ten best booby traps that you can set up with your own supplies and resources at home, you will know about the exact steps you need to follow to build each one as well.

Prepper's Home Defense John Wiley & Sons

In 1966, career Marine Lieutenant Frank McCarthy received the assignment of a lifetime when he was assigned as a platoon

commander in an infantry battalion preparing for deployment to Vietnam. Following several months of training his men, whom he would soon come to believe were some of the finest Marines ever to wear the uniform, boarded a ship in San Diego and set sail for Southeast Asia, not knowing how many of them would ever see their beloved country again. Following a harrowing sea voyage that nearly ended their tour before it began, they finally arrived in Vietnam. Though a "cherry" unit with no combat experience, within three short months that all changed. Eighty-two of those first ninety nights were spent in mud filled foxholes or ambush positions, covered with leeches, shivering through the limitless, and cold monsoon rains and incessant enemy mortar fire. Days of endless patrols, in an area laced with thousands of mines and booby traps as well as the ever-present but often unseen enemy. As difficult as those first three months were, McCarthy says it was a picnic compared to what would follow. Recounting his first fourteen months in Vietnam in gripping detail, in this book McCarthy draws on his own memory as well as official records to provide an unflinching firsthand account of what it was like to serve—and lead—as a Marine during the Vietnam War.

The Booby Trap and Other Bits and Boobs Chronicle Books

"In the book the authors look at different aspects of preparedness through the lens of the COVID-19 pandemic and the lessons we've learned. Some of the lessons should be obvious by now, but are in danger of being forgotten or de-prioritized when the dust finally settles. Others relate not to technical capabilities that we need, or best practices for public health, but to societal issues that we didn't foresee and which have to be considered in any future outbreak planning. For instance, what does preparedness look like if the federal government takes a strong coordinating role, and what does it look like if states and cities are left largely to fend for themselves (even competing against each other for scarce resources); and how do we plan for a scenario in which the best public health guidance is met with not only skepticism, but outright hostility by a large swathe of the country? The book offers concrete and conceptual guidance, but in doing so also asks difficult questions"--
