Reflexive Cartography addresses the adaptation of cartography, including its digital forms (GIS, WebGIS, PPGIS), to the changing needs of society, and outlines the experimental context aimed at mapping a topological space. Using rigorous scientific analysis based on statement consistency, relevance of the proposals, and model accessibility, it charts the transition from topographical maps created by state agencies to open mapping produced by citizens. Adopting semiotic theory to uncover the complex communicative mechanisms of maps and to investigate their ability to produce their own messages and new perspectives, Reflexive Cartography outlines a shift in our way of conceptualizing maps: from a plastic metaphor of reality, as they are generally considered, to solid tools that play the role of agents, assisting citizens as they think and plan their own living place and make sense of the current world. - Applies a range of technologies to theoretical perspectives on mapping to innovatively map the world's geographic diversity - Features a multi-disciplinary perspective that weaves together geography, the geosciences, and the social sciences through territorial representation - Authored and edited by two of the world's foremost cartographic experts who combine more than 60 years of experience in research and in the classroom - Presents more than 60 figures to underscore key concepts

In 1986, Afghanistan was torn apart by a war with the Soviet Union. This graphic novel/photo-journal is a record of one reporter's arduous and dangerous journey through Afghanistan, accompanying the Doctors Without Borders. Didier Lefevre's photography, paired with the art of Emmanuel Guibert, tells the powerful story of a mission undertaken by men and women dedicated to mending the wounds of war. Emmanuel Guibert's most recent book for First Second was the critically acclaimed Alan's War, the memoir of a WWII G.I. His close friendship with Didier Lefevre inspired him to combine art and photography to create this momentous book.

**Gabriela Mistral's Letters to Doris Dana** Golden Books

The highly anticipated new book from the acclaimed author of *The Accident Season* is a gorgeous, twisty story about things gone missing, things returned from the past, and a group of teenagers, connected in ways they could never have imagined. One stormy Irish summer night, Olive and her best friend, Rose, begin to lose things. It starts with simple items like hairclips and jewelry, but soon it's clear that Rose has lost something much bigger, something she won't talk about, and Olive thinks her best friend is slipping away. Then seductive diary pages written by a girl named Laurel begin to appear all over town. And Olive meets three mysterious strangers: Ivy, Hazel, and her twin brother, Rowan, secretly squatting in an abandoned housing estate. The trio are wild and alluring, but they seem lost too—and like Rose, they're holding tight to painful secrets. When they discover the spellbook, it changes everything. Damp, tattered and ancient, it's full of hand-inked charms to conjure back things that have been lost. And it just might be their chance to find what they each need to set everything back to rights. Unless it's leading them toward things that were never meant to be found...

For an entire generation, the Spanish Civil War was the ultimate test of commitment and courage as Communism and Fascism faced each other across Europe. Nobody wrote more vividly or more painfully about this than Orwell (1903-1950), as he came face to face with the reality of the civil war in Catalonia. *Great Journeys* allows readers to travel both around the planet and back through the centuries - but also back into ideas and worlds frightening, ruthless and cruel in different ways from our own. Few reading experiences can begin to match that of engaging with writers who saw

astounding things- Great civilisations, walls of ice, violent and implacable jungles, deserts and mountains, multitudes of birds and flowers new to science. Reading these books is to see the world afresh, to rediscover a time when many cultures were quite strange to each other, where legends and stories were treated as facts and in which so much was still to be discovered.

The Nobel Prize-winning poet Gabriela Mistral is celebrated by her native Chile as the "mother of the nation" even though she spent most of her life in Mexico, Europe, and the United States. Throughout the Spanish-speaking world and especially in Chile, Mistral was characterized as a sad, traditionally Catholic spinster. Yet her voluminous correspondence with Doris Dana, long believed to be her secretary, reveals that the two women were lovers from 1948 until Mistral's death in 1957. These letters, published in Spanish in 2010 and now translated for the first time into English, provide insight into her work as a poet and illuminate her perspectives on politics, especially war and human rights. The correspondence also sheds light on the poet's personal life and corrects the long-standing misperceptions of her as a lonely, single, heterosexual woman.

From New York Times bestselling author of medieval fiction, Elizabeth Chadwick, comes a gripping and romantic novel about William Marshal and the Knights Templar. To save his soul, William Marshal, medieval England's greatest knight, begins a pilgrimage to the Holy Land with his brother—a perilous experience that will impact him for the rest of his life. The brothers are quickly enveloped by the turmoil in Jerusalem, the devious scheming and lusts of the powerful men and women who rule the kingdom. Soon, William becomes entangled with the mercurial Pascia de Riveri, concubine of the highest churchman in the land, treading a path so dangerous that there seems no way back for him. He and his brother will pay a terrible price in the Holy Land, and their only chance to see home again after the experience depends upon the Knights Templar and two silk shrouds. In this glorious adventure perfect for fans of Ken Follett and Philippa Gregory, bestselling author Elizabeth Chadwick sweeps the reader to the dramatic courts and crusades of medieval Jerusalem. More Novels of Elizabeth Chadwick's William Marshal: *The Greatest Knight* *The Scarlet Lion* *For the King's Favor* *Templar Silks To Defy a King*

A history of the development of world maps during the later medieval period in the centuries leading up to Columbus's journey. In the two centuries before Columbus, mapmaking was transformed. *The World Map, 1300-1492* investigates this important, transitional period of mapmaking. Beginning with a 1436 atlas of ten maps produced by Venetian Andrea Bianco, Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps. She finds that both the makers and users of maps struggled with changes brought about by technological innovation—the compass, quadrant, and astrolabe—rediscovery of classical mapmaking approaches, and increased travel. To reconcile the tensions between the conservative and progressive worldviews, mapmakers used a careful blend of the old and the new to depict a world that was changing—and growing—before their eyes. This engaging and informative study reveals how the ingenuity, creativity, and adaptability of these craftsmen helped pave the way for an age of discovery. "A comprehensive and complex picture of the changing face of medieval geography. With the mastery of a formidable palette of historiographic knowledge and well-reasoned discussions of the sources, *The World Map, 1300-1492* will certainly remain an important work to consult for both medieval and early modern scholars for many years to come." —Ian J. Aebel, *Terrae Incognitae*

This volume celebrates the 100th anniversary of the Association of American Geographers. It recognizes the importance of technologies in the production of geographical knowledge. The original

chapters presented here examine technologies that have affected geography as a discipline. Among the technologies discussed are cartography, the camera, aerial photography, computers, and other computer-related tools. The contributors address the impact of such technologies on geography and society, disciplinary inquiries into the social/technological interfaces, high-tech as well low-tech societies, and applications of technologies to the public and private sectors. Geography and Technology can be used as a textbook in geography courses and seminars investigating specific technologies and the impacts of technologies on society and policy. It will also be useful for those in the humanities, social, policy and engineering sciences, planning and development fields where technology questions are becoming of increased importance. Geography clearly has much to learn from other disciplines and fields about geography/technology linkages; others can likewise learn much from us.

"Brimming with ideas. . . . The Origins of Creativity approach[es] creativity scientifically but sensitively, feeling its roots without pulling them out."—Economist In a stirring exploration of human nature recalling his foundational work *Consilience*, Edward O. Wilson offers a "luminous" (Kirkus Reviews) reflection on the humanities and their integral relationship to science. Both endeavors, Wilson argues, have their roots in human creativity—the defining trait of our species. By studying fields as diverse as paleontology, evolution, and neurobiology, Wilson demonstrates that creative expression began not 10,000 years ago, as we have long assumed, but more than 100,000 years ago in the Paleolithic Age. A provocative investigation into what it means to be human, *The Origins of Creativity* reveals how the humanities have played an unexamined role in defining our species. With the eloquence, optimism, and pioneering inquiry we have come to expect from our leading biologist, Wilson proposes a transformational "Third Enlightenment" in which the blending of science and humanities will enable a deeper understanding of our human condition, and how it ultimately originated.

In the ancient history of Latin America, myths and legends abound of the visitation of Quetzalcoatl, often referred to as the Bearded White God. The Bearded White God of Ancient America relives and explains Cortez' stunning conquest of the vast Aztec empire in the context of the Quetzalcoatl myths and legends. This book gives you a great source for the ancient Latin American Quetzalcoatl myths and legends—from the rare remaining writings of the great Aztec and Incan empires to the writings of the early Spanish colonial priests, soldiers, and colonists who had access to those original native writings not destroyed in the conquest. The Bearded White God of Ancient America concludes with an intriguing study of the Quetzalcoatl myths in the context of LDS theology. Key Features: Addresses the following questions about the legend of Quetzalcoatl: Who was he? When did he appear? Where did he come from? Why did he come? What did he teach? Where did he go? a great source for the ancient Latin American Quetzalcoatl myths and legends. Concludes with an intriguing study of the Quetzalcoatl myths in the context of LDS theology.

As Spain continues to struggle with economic depression, one of the country's best-loved poets tells how appreciating small mementos and everyday objects can help fight back against the gloom. Luis Garcia Montero's insights reach beyond the turmoil of euro-zone austerity and speak to wider audiences beset by the instabilities of a rapidly-changing world. Now, for the first time, his prose work is available to English-speaking audiences in *A Form of Resistance*. The stories stem from the objects and the memories that inspire and reassure the author: the Zippo lighter that sparked his adolescent independence, his first vinyl record, an old packet of Goya cigarettes, and letters he wrote as a young boy to his father. These are personal vignettes but they also touch a universal nerve; they connect him - and us - to our sense of place in the world, a place where long forgotten events and experiences are recovered through keepsakes and utilitarian items. Holding on to that thread of history and keeping those memories alive is what Garcia Montero describes as a form of resistance. His original Spanish-language book *Una forma de resistencia* took its inspiration from John Steinbeck's *The Grapes of Wrath*. Garcia Montero writes: "The farmers of Oklahoma, condemned by drought and the banks, immigrated to California. They had to choose carefully which things they would lose forever. Against the so-called creative destruction of capitalism, metaphors and mementos preserve free will, love of life and respect for the past we embody." Luis Garcia Montero was born in Granada, Spain in 1958. His award-winning work includes *Habitaciones separadas* (Loewe Prize and Spain's National Literature Prize, 1994) and *La intimidación de la serpiente* (National Critics Prize, 2003). His novel, *Manana no sera lo que Dios quiera* (Alfaguara, 2009), won Book of the Year from the Booksellers' Guild of Madrid. Garcia Montero's poetry in English, translated by Katie King, is published online at *Words Without Borders* and in print in *New European Poets* by Graywolf Press. Katie King is a journalist, writer, and literary translator. Her career in journalism and publishing includes working as a correspondent for Reuters in Latin America, teaching journalism at George Washington University School of Media and Public Affairs in Washington, DC, and leading a variety of digital and online news and publishing projects in the U.S. and Europe since the mid-1990s. Katie has lived, studied, and worked in Spain. She is currently pursuing a PhD in Hispanic Studies at the University of Washington in Seattle."

Edward O. Wilson -- University Professor at Harvard, winner of two Pulitzer prizes, eloquent champion of biodiversity -- is arguably one of the most important thinkers of the twentieth century. His career represents both a blueprint and a challenge to those who seek to explore the frontiers of scientific understanding. Yet, until now, little has been told of his life and of the important events

that have shaped his thought. In *Naturalist*, Wilson describes for the first time both his growth as a scientist and the evolution of the science he has helped define. He traces the trajectory of his life -- from a childhood spent exploring the Gulf Coast of Alabama and Florida to life as a tenured professor at Harvard -- detailing how his youthful fascination with nature blossomed into a lifelong calling. He recounts with drama and wit the adventures of his days as a student at the University of Alabama and his four decades at Harvard University, where he has achieved renown as both teacher and researcher. As the narrative of Wilson's life unfolds, the reader is treated to an inside look at the origin and development of ideas that guide today's biological research. Theories that are now widely accepted in the scientific world were once untested hypotheses emerging from one man's broad-gauged studies. Throughout *Naturalist*, we see Wilson's mind and energies constantly striving to help establish many of the central principles of the field of evolutionary biology. The story of Wilson's life provides fascinating insights into the making of a scientist, and a valuable look at some of the most thought-provoking ideas of our time.

*Dialogues of Love* HarperCollins

"The book bursts to life with [Wilson's] observations of nature, from fire ants and social spiders to starlings."—Aarathi Prasad, *New York Times* Book Review An "endlessly fascinating" (Michael Ruse) work of scientific thought and synthesis, *Genesis* is Edward O. Wilson's twenty-first-century statement on Darwinian evolution. Asserting that religious creeds and philosophical questions can be reduced to purely genetic and evolutionary components, and that the human body and mind have a physical base obedient to the laws of physics and chemistry, Wilson demonstrates that the only way for us to fully understand human behavior is to study the evolutionary histories of nonhuman species. At least seventeen of these species—among them the African naked mole rat and the sponge-dwelling shrimp—have been found to have advanced societies based on altruism and cooperation. Braiding twenty-first-century scientific theory with the lyrical biological and humanistic observations for which Wilson is beloved, *Genesis* is "a magisterial history of social evolution, from clouds of midges or sparrows to the grotesqueries of ant colonies" (Kirkus Reviews, starred review).

From the bestselling author of *The Swallows of Kabul* comes this timely and haunting novel that powerfully illuminates the devastating human costs of terrorism. Dr. Amin Jaafari is an Arab-Israeli surgeon at a hospital in Tel Aviv. As an admired and respected member of his community, he has carved a space for himself and his wife, Sihem, at the crossroads of two troubled societies. Jaafari's world is abruptly shattered when Sihem is killed in a suicide bombing. As evidence mounts that Sihem could have been responsible for the catastrophic bombing, Jaafari begins a tortured search for answers. Faced with the ultimate betrayal, he must find a way to reconcile his cherished memories of his wife with the growing realization that she may have had another life, one that was entirely removed from the comfortable, modern existence that they shared.

*New York Times* Bestseller Finalist for the National Book Award (Nonfiction) How did humanity originate and why does a species like ours exist on this planet? Do we have a special place, even a destiny in the universe? Where are we going, and perhaps, the most difficult question of all, "Why?" In *The Meaning of Human Existence*, his most philosophical work to date, Pulitzer Prize-winning biologist Edward O. Wilson grapples with these and other existential questions, examining what makes human beings supremely different from all other species. Searching for meaning in what Nietzsche once called "the rainbow colors" around the outer edges of knowledge and imagination, Wilson takes his readers on a journey, in the process bridging science and philosophy to create a twenty-first-century treatise on human existence—from our earliest inception to a provocative look at what the future of mankind portends. Continuing his groundbreaking examination of our "Anthropocene Epoch," which he began with *The Social Conquest of Earth*, described by the *New York Times* as "a sweeping account of the human rise to domination of the biosphere," here Wilson posits that we, as a species, now know enough about the universe and ourselves that we can begin to approach questions about our place in the cosmos and the meaning of intelligent life in a systematic, indeed, in a testable way. Once criticized for a purely mechanistic view of human life and an overreliance on genetic predetermination, Wilson presents in *The Meaning of Human Existence* his most expansive and advanced theories on the sovereignty of human life, recognizing that, even though the human and the spider evolved similarly, the poet's sonnet is wholly different from the spider's web. Whether attempting to explicate "The Riddle of the Human Species," "Free Will," or "Religion"; warning of "The Collapse of Biodiversity"; or even creating a plausible "Portrait of E.T.," Wilson does indeed believe that humanity holds a special position in the known universe. The human epoch that began in biological evolution and passed into pre-, then recorded, history is now more than ever before in our hands. Yet alarmed that we are about to abandon natural selection by redesigning biology and human nature as we wish them, Wilson soberly concludes that advances in science and technology bring us our greatest moral dilemma since God stayed the hand of Abraham.

Literature and religion in one: a theme of hope for a new futurean era that can bring forth literature in which great theology and great aesthetics enter once again into an exemplary intimacy. ùHans Knng, from *Literature and Religion* Up until the seventeenth century, Western culture was essentially synonymous with Christian culture. Then, on the very border between the medieval and the modern worlds, this unity of authority and belief began to crumble. For the first time, an intellectual life developed that was independent of the church, and modern, rational man surged toward new models of the world, society, the church, and theology. In *Literature and Religion*, Hans Knng and Walter Jens survey the complex, vital, and contradictory search for faith over the past three hundred years through the key works of eight great writers.
