Medical Terminology Made Incredibly Easy! Elsevier Health Sciences

This is a handy reference book in the award-winning Incredibly Easy! style--perfect for those entering or needing a refresher in critical care nursing. Critical care nursing is one of the most demanding and complex areas of nursing practice. The critical care nurse has to be "broadly specialized" with a fluency in a wide range of interconnected concepts, body system physiology, pathophysiology, and highly technical interventions, while processing data from multiple sources--all this in an environment where there is no room for error and seconds really do count.

Books Out Loud Lippincott Williams & Wilkins

Nursing Pharmacology Made Incredibly Easy, 3rd Edition, provides the nursing student and practicing nurse with information about how drugs act and interact in the treatment of disease. The book focuses on mechanisms of drug action; details specific drugs by pharmacologic class; reviews the nursing process related to each drug category for all body systems, plus pain medications, anti-infective drugs, and cancer drugs; and highlights potentially dangerous interactions, including drug-herb interactions. It does all of this in the award-winning, lighthearted Incredibly Easy! style that makes intimidating concepts thoroughly approachable.

You can breathe a little easier knowing there's a proven way to master respiratory pharmacology!

For more than 30 years, Rau's Respiratory Care Pharmacology has been the preeminent text on the subject. With easy-to-grasp terminology, relatable explanations, and reader-friendly writing, it simplifies the process of learning pharmacology material like never before. Rau's is organized into three logical sections, covering the basics of respiratory care, frequently used drugs, and critical care medications. New to the 11th edition are recently approved FDA drugs, information on drug approvals, COVID-19 coverage, and new and updated Clinical Connection boxes that focus on important clinical questions, assisting you in connecting the information in the text to the clinical setting and addressing how Respiratory Therapists can help educate patients. Clinical scenarios with follow-up SOAP assessment help you assess your comprehension of the material. Self-assessment questions offer you thought-provoking opportunities to test your comprehension of key concepts. Learning objectives parallel the levels tested by the NBRC® exams to help you identify important information that goes beyond memorization and recall. Key terms with definitions provide easy access to the pharmacologic vocabulary you should embrace. Key points boxes in each chapter highlight important concepts in the lesson. Glossary of all key terms in the text aids you in understanding the terminology associated with respiratory care pharmacology. Appendices on common Units and Systems of Measurement and Acceptable Mixtures provide references to need-to-know information such as abbreviations, conversion charts for temperatures, liquid metric and solids, and a simple drug compatibility chart for drug mixtures. Alphabetical drug index provides a direct index to look up information based on drug name. NEW and UPDATED! Clinical Connection boxes assist you in connecting information in the text to the clinical setting, including providing patients a better understanding of their clinical conditions as related to their drug treatments. UPDATED! Chapter 1 reflects changes to drug approval. UPDATED! Chapter 3 reflects changes in aerosol medication devices and addresses aerosol-generating device issues and COVID-19. UPDATED! The latest FDA-approved medications are referenced in all chapters. UPDATED! Current asthma (GINA) and COPD (GOLD) guidelines include COVID-19 treatment protocols. Enhanced readability helps you more easily understand difficult material.
